### Foreword

Thakur College of Engineering & Technology (TCET) since its inception has been instrumental in offering quality technical education to aspiring students through System-Driven-Student-Centric approach. In the last decade it has put its best efforts to focus on broad based education leading to holistic student development as per international graduate attributes. Based on our strengths, we are happy to share that, the University Grants Commission (UGC) has conferred "Autonomous Status" for 10 years to TCET under the revised UGC graded Autonomy Scheme 2018.

As per the mandate of UGC under Graded Autonomy Scheme, TCET aspires to strengthen its program offerings to make our budding Engineers "Globally Competent, Locally Relevant and Skill Oriented" through:

- Program Specific curricula with focus on research in the emerging areas of Engineering and Technology.
- Industry Specific/Industry Linked curricula through an "Employ ability Enhancement Scheme".
- All Round Personality Development model through its "Holistic Development Scheme".
- Extra ordinary Credits for National level Achievements, National level Competitive Exams, Standard Industrial Certifications and Major Contributions to the Society.
- Credits for specialized courses and online courses done through graded online MOOCS and other graded on line courses offered by the department from time to time.

The Choice Based Credit Grading System for Holistic Student Development (CBCGS - H 2019) is based on AICTE Model Curriculum and UGC (Minimum standards of instruction for grant of First Degree through Formal Education) Regulations, 2003 Autonomy Scheme includes Scholastic, Co-Scholastic and Non-scholastic Credits which are Compulsory for every student. Additional Credits are assigned for the Student Achievers under Specialization (optional credits in Emerging Areas) and Achievers credits (National/International level).

The Under-Graduate and the Post-Graduate curriculum has been designed with a thought of creating an inspiring Academic Culture in the institution, essential for teachers and students to access deeper knowledge and participate in its expansion and smooth transmission. The curriculum also focuses on to develop problem-solving skill in students and strengthen academic knowledge. The Doctoral Program will follow the UGC Guidelines/Norms from time to time.

The First Year (F.E.) proposed scheme is aligned with the Model Curriculum which offers courses on Basic Sciences, Engineering Sciences along with Humanities which imparts the fundamental which could later be useful for Research in Applied Science and Engineering. The scheme also emphasizes on professional skills which include Aptitude/ Logic Building and Life/Presentation Skills. In addition to the above, the course also comprises of Activity Based Learning which focuses on Society Outreach Programs and Yogic Practices. This will help students to develop Aptitude and Positive Attitude in life.

The Second Year (S.E.) proposed scheme includes Program Specific core subjects which would introduce to them the core areas of the particular course giving them in-depth knowledge and form the basic foundation in them.

 Zagdu Singh Charitable Trust's (Regd.)

 THAKUR COLLEGE OF ENGINEERING & TECHNOLOGY

 Autonomous College Affiliated to University of Mumbai

 Approved by All India Council for Technical Education(AICTE) and Government of Maharashtra(GoM)

 Conferred Autonomous Status by University Grants Commission (UGC) for 10 years w.e.f. A.Y 2019-20

 Amongst Top 200 Colleges in the Country, Ranked 193<sup>st</sup> in NIRF India Ranking 2019 in Engineering College category

 • ISO 9001:2015 Certified • Programmes Accredited by National Board of Accreditation (NBA), New Delhi

• Institute Accredited by National Assessment and Accreditation Council (NAAC), Bangalore

The Third Year (T.E.) scheme offers Domain Specific "Industry Electives" which satisfies the current Industry demands and requirements. The student's knowledge enhances and makes them abreast with the current technology. The syllabus scheme provides credits for on line courses from Semester VI onwards. This is to motivate the students to enhance their knowledge and encourage Self-Learning amongst students.

The Final Year, Bachelor of Engineering (B.E.) scheme is aligned towards Generalized Knowledge which is an important component of crystallized intelligence. It is done by offering them "Open Electives" which would help them grow both on personal as well as academic level and develop the openness to experience and analyze situations for better solutions.

The impact of these could be seen under Project Based Learning (PBL), Activity Based Learning (ABL) and Research Based Learning (RBL) as students adopt these methodologies to do projects based on Technological Solutions or real-world scenarios.

The curriculum also focuses on promoting Holistic Student Development (HSD) which includes courses on Professional Skills which focus on Basic Technology Skills for Second Year, Industry/Research/Entrepreneurship Skills for Third and Final Year. PBL is common for SE, TE and BE under HSD along with ABL (Co-curricular/Extracurricular/Extension) for SE students and RBL (Online/MOOCS) for TE and BE students. The students are also encouraged to take up Internships at core companies which would enhance their skills and make them updated with the current industry needs.

The Examination Scheme is also revised and has been made keeping in view the kind of pressure; a student undergoes during continuous evaluation. The proposed scheme includes Formative and Summative Evaluation methods which would help in foster development and improvement in student during the course and simultaneously be able to assess whether the results have been able to meet the set target. This system would be deployed systematically which would drastically reduce the burden on the students.

This scheme would help students to grow academically, professionally and holistically to become Globally Competent Professionals with Values.

Sd/-(Dr. B. K. Mishra) Principal

### **Board of Studies Chairman's Preamble**

The B. E. Computer Engineering programme is no doubt an exciting and extraordinary creative discipline propelling students towards innovation and technology. Students studying this discipline learn technical skills such as programming, problem-solving, and many more.

The objective of the programme is to make learners industry ready by enabling them to apply his/her enhanced skill and knowledge to solve complex problems using advanced analytical tools and algorithms for processing, analyzing and drawing meaningful insights out of it to identify, formulate, and solve engineering problems. Studying Computer Science is much more than just logic, algorithms, abstraction, and computability. However, it expands to Operating System, Computer Graphics, Software Engineering, Networking, Machine Learning, programming languages and many more.

Now a day Computer Engineering field has become so popular. These are being used in various domains. It is used in Finance, Travel, business, marketing, sales, automation, credit and insurance, social media, government sectors, healthcare, education, expert systems, speech recognition and machine vision, and a host of other emerging areas. It comes with a range of opportunities for the students such as agile learning, technical innovations, and global job prospects.

The pedagogical sequence is learner centric starting with basic engineering sciences introductory courses in mathematics, programming and professional core courses to provide a strong technical foundation and then to specific areas of, Machine Learning, Soft Computing, Data Warehousing and Mining, Big Data Analytics etc. The programme is flexible enough to allow a learner to specialize in any topic of interest by opting elective courses and working on a research project in that area.

Thakur College of Engineering & Technology has taken a lead in incorporating philosophy of Choice Based Credit Grading Scheme with Holistic Student Development (CBCGS-H 2019) in the process of curriculum development.

The Program Educational Objectives, Program Outcomes and Program Specific Outcomes for the program are proposed and are part of the scheme and syllabus. My sincere thanks to contributors from academia and industry for their inputs in framing the syllabus. I appreciate and thank the Principal, Dr. B.K. Mishra and Vice-Principal, Dr. Deven Shah of Thakur College of Engineering and Technology for their valuable inputs. I appreciate the efforts taken by the Vice- Principal, Dr. Deven Shah for conducting several brainstorming sessions with all BOS points in the curriculum. Special Thanks to the Members of the Board of Studies and Academic Council for the critical inputs that has helped in adding value to the curriculum.

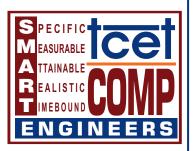

I trust and believe that the curriculum appeals and meets the expectation of all stakeholders.

Sd/-Dr. Harshali Patil Chairman, Board of Studies, Department of Computer Engineering TCET

### **B.E.** Computer Engineering

Nurturing Budding Engineers to become SMART Professionals with Social Sensitivity
---

VISION	To Become the Department of National Relevance in the Field of Computer Engineering.
MISSION	"To nurture students with sound engineering knowledge in the field of computing through effective use of modern tools with a focus on global employability by imbibing leadership qualities, ethical attitude, lifelong learning and social sensitivity"

Program Educational Objectives	<ul> <li>PEO 1: To attract and prepare learners to attain sound knowledge in the field of Computer engineering. <ul> <li>a)</li> </ul> </li> <li>1.1. To attract students by providing conducive academic environment and to enhance quality of students by rigorous monitoring and control.</li> <li>1.2. To prepare learners with a sound foundation in the mathematical, scientific and engineering fundamentals.</li> <li>1.3. To prepare learners to use modern tools effectively to solve real life problems.</li> <li>1.4 To equip learners with broad education relevant to field of computing in the global and social context.</li> <li>PEO 2: To prepare learners to attain need-based skills and competencies with a focus on futuristic needs at the national and international level.</li> <li>2.1. To ensure employability by need-based training spread over the entire course and contemporary local and global requirements.</li> <li>2.2. To prepare Learners for higher studies and life-long learning through active involvement of learners with research oriented and industry-based projects.</li> <li>PEO 3: To prepare learners to become valued professionals and responsible citizens.</li> <li>3.1. To encourage and motivate students through well planned co-curricular and extracurricular activities for all-round personality development.</li> <li>3.2. To inculcate professional and ethical attitude, leadership qualities and commitment to social responsibilities.</li> </ul>
Program Specific Outcomes	<ul> <li>PSO 1 :Ability to develop academic aptitude and apply knowledge of computing and mathematics to computer science problems and thereby design and develop Software and Hardware Systems.</li> <li>PSO 2 :Ability to enhance research skills and utilize advanced computing tools for analysis, design and implementation of computing systems for resolving real life / social problems</li> <li>PSO 3 : Ability to utilize multidisciplinary knowledge required for satisfying industry / global requirements and hence develop an attitude for life-long learning</li> <li>PSO 4 : Ability to have all round personality with skills like leadership, verbal &amp; written communication , team work, sensitivity towards society in order to become valued and responsible professionals.</li> </ul>

### Nurturing Budding Engineers to become SMART Professionals with Social Sensitivity

### **Programme Outcomes:**

PO 01	<b>ENGINEERING KNOWLEDGE:</b> <b>Apply</b> Knowledge of Mathematics, Science, engineering fundamentals and an engineering specialization to the <b>solution</b> of <b>complex</b> engineering <b>problems.</b>
-------	---

PO 02	<b>PROBLEM ANALYSIS:</b> Identify, Formulate, Research Literature and Analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
-------	--

(	DESIGN / DEVELOPMENT OF SOLUTIONS:
PO 03	<b>Design</b> solutions for complex engineering problems and design system components or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal and environmental considerations.

PO 04	<b>CONDUCT INVESTIGATIONS OF COMPLEX PROBLEMS:</b> Using research based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of information to provide valid conclusions
	conclusions

PO 05	<b>MODERN TOOL USAGE:</b> <b>Create</b> , <b>select</b> and <b>apply</b> appropriate techniques, resources and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of limitations.
-------	--

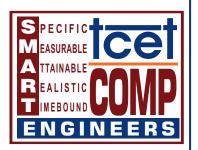

PO 06 THE ENGINEER AND SOCIETY: Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice

###

- 1. For effective conduct, Induction training program will be conducted for one week before the start of first semester and 2 weeks during the semester with regular timetable.
- 2. Academic practical load shall be conducted in batches.
- IA In-Semester Assessment, ESE End Semester Examination and under IA, 20 marks of ISE (In-Semester Examination) will be conducted for 1 hour and 10 marks of ISE (In-Semester Examination) will be conducted for 45 minutes and 20/10 marks of IE (Innovative Examination) whereas, 60 marks of ESE will be conducted for 1 hour.
- 4. Professional Skills-I and Activity Based Learning-I activities will run in the form of integrated theory and practical course.

\*This is part of Summer Internship but can start in winter. Students may go up to 160 hours to acquire maximum 4 credits in Second Semester.

Total hours mentioned should be completed till end of Semester 2. Credits will be awarded at the end of Second Semester and will be reflected in the Grade Card of Second Semester.

Student will get 1-year span to acquire the credits. Students should collectively acquire total contact hrs in below given activities in a span of 1 year. Student will submit a report to earn Term work marks in internship.

### Following activities should be considered for Summer Internship: -

1) Participation in In-house Internship at the end of 1st and 2nd Semester of 2 week each.

2) Other activity which also will be considered are: Workshop/ Training, Festival (Technical/Business/Others) Events, Contribution in Incubation/ Innovation / Entrepreneurship Cell/ Institutional Innovation Council, Learning at Departmental Lab/Tinkering lab/Institutional Workshop

Note: - For Above Activities mentioned in point 2, if Student is part of Organizing Committee or Participating a Competition at University/State/National/international Level then it will be considered as Internship else it will be considered as Activity Points.

@ As per AICTE, Students has to earn 100 Points by participating in 400 Hrs. of activities during 4 years of Engineering. After Completing 48 hrs. of Activities, Students can earn 12 Points. This Points will not be reflected in Grade Card. Separate transcript will be issued to students after completion of Final Year.

Estd. in 2000

1. IA- In-Semester Assessment, ESE- End Semester Examination, PR- Practical Examination, TW – Term Work Examination, OR- Oral Examination, AC- Activity evaluation

\* This is part of Summer Internship but can start in winter. Students may go upto 240 hrs. to aquire maximum 6 credits in Semester 4.

Total hrs. mentioned should be completed till end of Semester 4. Credits will be awarded at the end of 4<sup>th</sup> Semester and will be reflected in the Grade Card of 4<sup>th</sup> Semester.

Student will get 1 year span to acquire the credits. Students should collectively acquire total contact hrs in below given activities in a span of 1 year. Student will submit a report to earn Termwork marks in internship.

### Following activities should be considered for Summer Internship:-

1) Participitation in inhouse internship at the end of 3<sup>rd</sup> and 4<sup>th</sup> Semester of 2 week each.

2) Other activity which also will be considered are: Participation in Hackathon, Development of new Product/ Business Plan / Registration of startup, Participation in IPR workshop/Leadership talks/Idea/ Design / Innovation/Technical Expos, Internship with Industry / Govt. / NGO/ PSU/MSME/Online Internship, Long Term Goals under Rural Internship

Note:- For Above Activities mentioned in point 2, if Student is part of Organizing Committee or Participating a Compitition at University/State/National/international Level then it will be considered as Internship else it will be considered as Activity Points.

@ As per AICTE, Students has to earn 100 Points by participating in 400 Hrs. of activities during 4 years of Engineering. After Completing 48 hrs. of Activities, Students can earn 12 Points. This Points will not be reflected in Grade Card. Separate transcript will be issued to students after completion of Final Year.

1. IA- In-Semester Assessment, ESE- End Semester Examination, PR- Practical Examination, TW - Term Work Examination, OR- Oral Examination, AC- Activity evaluation

@-Professional Elective Courses Lab will be conducted in the form Capstone Project 2.

#As per AICTE, Students has to earn 100 Points by participating in 400 Hrs. of activities during 4 years of Engineering. After Completing 52 hrs. of Activities, Students can earn 13 Points. 3. ThisPoints will not be reflected in Grade Card. Separate transcript will be issued to students after completion of Final Year.

\*Total hrs. mentioned should be completed till end of Semester 8. Credits will be awarded at the end of 8th Semester and will be reflected in the Grade Card of 8th Semester. Student will submit 4. a report to earn Teamwork marks in internship.

Prerequisite: Computer Basics, Procedural Programming Languages

**<u>Course Objectives:</u>** The objective of the course is to understand the discrete mathematical preliminaries and apply the knowledge of sets, relations, functions, graphs, lattices and transform calculus in formal representation of various computing constructs.

#### **<u>Course Outcomes:</u>** Students will be able to:

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the basic concepts of set theory and able to apply basic set operations in problem solving.	L1, L2, L3
2	Understand relation and function and their properties and also able to understand their use in programming applications.	L2, L3
3	Understand Partially ordered set, lattice concept in various application.	L1, L2, L3
4	Understand the concept of graph, Euler graph, Hamiltonian graph and special kind of graph and also able to model real world problems using graph theory.	L1, L3
5	Apply the Laplace Transform, Inverse Laplace Transform and its properties to solve ODE.	L1, L2, L3
6	Apply the concept of Fourier Transform and Inverse Fourier transform through properties.	L1, L3

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development [CBCGS - H 2019] Under TCET Autonomy Scheme - 2019

### **Detailed Syllabus:**

1	Introduction to Set Theory and Proofing Techniques Definition of Sets, Venn Diagrams, complements, cartesian products, power sets, counting principle, cardinality and countability (Countable and Uncountable sets) Laws of set theory, Power set and Products Partitions of sets. The Principle of Inclusion and Exclusion Pigeonhole Principle, Mathematical Induction. Relation and Functions Relation: Definition, types of relation, composition of relations, pictorial representation of relation (Digraphs), properties of relation, partial ordering relation. Operations on relations, Closures, Warshall's algorithm.	6	L1, L2, L3	
	power sets, counting principle, cardinality and countability (Countable and Uncountable sets) Laws of set theory, Power set and Products Partitions of sets. The Principle of Inclusion and Exclusion Pigeonhole Principle, Mathematical Induction. <b>Relation and Functions</b> <b>Relation</b> : Definition, types of relation, composition of relations, pictorial representation of relation (Digraphs), properties of relation, partial ordering		L1, L2, L3	
	<b>Relation</b> : Definition, types of relation, composition of relations, pictorial representation of relation (Digraphs), properties of relation, partial ordering	7		
	representation of relation (Digraphs), properties of relation, partial ordering	7		
2	<b>Function</b> : Definition and types of function, composition of functions, Generating Functions.	,	L2, L3	
	Lattices			
3	Posets, Hasse Diagram, chain , Upper bounds, Lower bounds, GLB & LUB of sets, Definition & properties of Lattice, sublattice Distributive& modular Lattices, complemented & bounded Lattices , Complete lattices.	7	L1, L2, L3	
	Graph Theory			
4	Definitions: graphs, digraphs, Multigraphs, Paths and cycles (Hamiltonian and Eulerian), Subgraphs, Isomorphism, Special kinds of graphs: bipartite graphs, planer graphs, Graph coloring, trees.	8	L1, L3	
	Transform Calculus -I			
5	Laplace Transform, Properties of Laplace Transform, Laplace transform of periodic functions, Finding inverse Laplace transform by first shifting, partial fraction and differentiation method.	8	L1, L2, L3	
	Transform Calculus -II			
6	Convolution theorem, Solving ODEs by Laplace Transform method, Fourier Transform and Inverse Fourier transform of constant and exponential function, Properties of Fourier Transform	9	L1, L3	
F	Total Hours	45

Prerequisite: Computer Basics, Procedural Programming Languages

**<u>Course Objective:</u>** The course intends to deliver the fundamentals of data structures by providing a platform to learn, compare and apply them in real world scenario.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Compare linear and non-linear data structures.	L1, L2
2	Apply operations like insertion, deletion, searching and traversing on stack and queue data structure.	L1, L2, L3
3	Apply operations like insertion, deletion, searching and traversing on linked list data structure.	L1, L2, L3
4	Apply operations like insertion, deletion, searching and traversing on tree data structure.	L1, L2, L3
5	Apply operations like insertion, deletion, searching and traversing on graph data structure.	L1, L2, L3
6	Analyze appropriate sorting and searching technique for given problem.	L1, L2, L3, L4

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

### **Detailed Syllabus:**

Modu le No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Data Structure		
	Introduction, Types of data Structures, Abstract data type, Importance of ADT, Operations on data structures.	3	L1, L2
2	Stacks and Queues		
	<b>Stack</b> : ADT of stack, operations on stack, array implementation of stack, applications of stack. <b>Queue:</b> ADT of queue, operations on queue, array implementation of queue, Types of queues: circular queue, priority queue, double ended queue, applications of queue.	7	L1, L2, L3
3	Linked lists		
	<b>Linked list</b> : ADT of Linked lists, operations on linked list, Types of linked lists: Single linked list, Double Linked list, Circular linked list, Implementation of linked list, stack implementation using linked list, queue implementation using linked list, Applications of linked list.	8	L1, L2, L3
4	Introduction to Non Linear Data Structure		
	<b>Trees:</b> Terminologies, Binary tree and its types, Binary tree operations and implementation, Tree traversing techniques, Expression tree, AVL tree, Threaded Binary Tree, Multiday search tree (B and B+), Application of tree.	13	L1, L2, L3
5	Graphs		
	<b>Graph:</b> Terminologies, Graph representation: Matrix and Adjacency list, Graph traversing techniques: BFS, DFS, Applications of graph.	6	L1, L2, L3
6	Searching and Sorting		
	Searching: Linear search, binary search Sorting: Insertion sort, Merge sort, Quick sort, Bucket sort Hashing: Hash functions, Hash table, Hashing technique, Collision resolution technique	8	L1, L2, L3, L4
	Total Hours	45

**<u>Course Objective:</u>** The course intends to deliver the fundamental knowledge of database management system and apply this knowledge for implementing and analyzing real world problems.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

SN	Course Objectives	Cognitive levels of attainment as per Bloom's Taxonomy
1	Demonstrate the fundamental elements of relational database Management Systems	L1, L2
2	Outline ER and EER diagram for the real life problem and convert it to Relational Database.	L1, L2,L3
3	Solve and build basic SQL Queries on given Data.	L1, L2, L3
4	Solve and build Advanced SQL Queries on given Data.	L1, L2, L3
5	Develop a relational database using concept of functional dependencies.	L1, L2, L3
6	Interpret the concepts of transaction, concurrency and recovery	L1, L2

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Database Concepts	3	L1, L2
	Basic Concepts of Data, Database and DBMS, Applications of Databases,		
	Advantages of DBMS over File Processing System, Three Level Architecture of		
	Database System, Data Abstraction and Data Independence, Database Languages,		
	Database Users, Database Administrator and its roles, Overall		
2	System structure.		
2	Entity Relationship Model(ER), Relational Model and Extended ER Model	6	L1, L2,L3
	The Entity-Relationship (ER) Model: Entity with its types Attributes with its		
	types, Relationships with its Types. Real life Examples of ER Diagram.		
	<b>Relational Model</b> : Structure of Relational Databases, Keys with its Types		
	<b>Extended ER Model (EER):</b> Concept of Specialization, Generalization and		
3	Aggregation, Mapping of ER and EER to Relational Model. Introduction to Structured Query Language (SQL)	9	L1, L2, L3
3		9	L1, L2, L5
	Overview of SQL, Data Definition Language Commands, Data Manipulation Language Commands, Data Control Language Commands, Transaction Control		
	Language Commands, Data Control Language Commands, Transaction Control Language Commands, Constraints, Set and String Operations, Aggregate		
	Functions, Group by and Having Clause.		
4	Advanced SQL with Integrity, Security and Authorization	11	L1, L2, L3
•	Nested Sub queries, Referential Integrity in SQL, Joins, Views, Assertion,		11, 12, 15
	Trigger, Database Security and Authorization, Granting of Privileges, Revoking		
	of Authorization in SQL		
	Relational Algebra Operations and Tuple relational calculus		
5	Relational Database Design	8	L1, L2, L3
	Pitfalls in Relational Database Design, Concept of Normalization, Functional	1	, ,
	Dependencies, 1 NF, 2 NF, 3 NF, BCNF, 4 NF		
6	Transaction, Recovery and Concurrency Control	8	L1, L2
	Transaction Management: Transaction Concept, Transaction States, ACID		
	Properties of Transaction, Serial and Concurrent Executions, Conflict and View		
	Serializability.		
	Concurrency Control: Lock Based Protocols, Deadlock Handling		
	Recovery: Failure Classification, Log based recovery, Checkpoint, Shadow		
	Paging.	45	
	Total Hours	45

Prerequisite: Basic Mathematics

**<u>Course Objective:</u>** This course intends to deliver basics of modern computer organization and architectures, covering the interaction between computer hardware and software at various levels and to analyze performance issues in processor and memory design of a digital computer.

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Explain basic structure and working of computer.	L1, L2
2	Apply various computer arithmetic operations.	L1, L2, L3
3	Explain the working of control unit.	L1, L2
4	Understand various types of memory of digital computer.	L1, L2, L3
5	Compare between different types I/O modes of transfer.	L1, L2
6	Understand basic concepts of pipelining.	L1, L2, L3

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction of Computer Organization and Architecture		L1, L2
	Basic organization of computer and block level description of the functional units. Introduction to computer organization & Architecture, ALU and its organization, Evolution of Computers, Von Neumann model, Instruction cycle, Machine Instructions, Addressing Modes, Instruction Format, Introduction to System buses, Multi-bus organization.	6	
2	Data Representation and Arithmetic Algorithm		L1, L2, L3
	Signed number representation, fixed point computation algorithms, Booth multiplication, Division - non-restoring and restoring techniques, floating point arithmetic algorithms. IEEE 754 floating point number representation.	7	, _ <b>_</b> , _e
3	Control Unit Design		L1, L2
	Control Unit: Soft wired (Micro-programmed) and Hardwired control unit design methods, Address sequencing, Microprogram Sequencer, Micro operation, Micro instruction Format, Control Memory, Concepts of nano programming, Introduction to RISC and CISC architectures and design issues.	6	,
4	Memory Organization		L1, L2
	Classifications of primary and secondary memories, Types of RAM and ROM, Memory hierarchy and characteristics, Allocation Policies, Cache memory: concept, architecture, mapping, Cache coherency, Interleaved and Associative memory.	8	
5	I/O Organization		L1, L2
	Input/ Output systems, Types of data transfer techniques: Programmed I/O, Interrupt driven ,Direct Memory Access and DMA controller, Types of Interrupts, Bus Arbitration, Interface circuits - Parallel and serial port. Features of PCI and PCI Express bus.	9	
6	Pipelining & Parallel Processing		L1, L2
	Introduction to pipelining, Performance measures of pipelining, Synchronous and Asynchronous pipelining, Instruction level pipelining (ILP), Pipelining hazards, Handling of Branch instructions. Multiprocessor (loosely & tightly coupled) and Multicomputer (UNA, NUMA, COMA).	9	
	Total Hours	45	

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

### List of Practical/ Experiments:

Practical Number	Type of Experiment	Practical/ Experiment Topic	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Basic Experiments	Demonstrate Computer Anatomy- Memory, Ports, Motherboard and add-on cards.	2	L1, L2
2		Develop a program to calculate 1's compliment and 2's compliment of a Binary number.	2	L1, L2, L3
3		Develop a program to calculate Binary and octal addition and multiplication	2	L1, L2, L3
4		Construct of Register and Counter	2	L1, L2, L3
5		Develop a program to convert in IEEE 754 format	2	L1, L2, L3
6		Develop a program to perform Booth's Multiplication on binary numbers	2	L1, L2, L3
7		Develop a C/Java program for Non- restoring Division	2	L1, L2, L3
8	Design Experiments	Develop a C/Java program for Restoring Division	2	L1, L2, L3
9	Design Experiments	Experiment with mapping techniques of Direct Mapped Cache memory.	2	L1, L2, L3

Image: Composition of the state of the								
		Experiment with mapping techniques of	2	L1, L2, L3

Prerequisite: Bi	ology, chemis	try, geograp	hy, geology	, physics.					

Course Objective:

The course intends to deliver the fundamental concepts of Environmental Sciences. It will also help in understanding & analyzing the major challenges and current issues in Environment and evaluate possible solutions.

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Relate the concept of Environmental Sciences and provide solutions to the major challenges and current issues in Environment.	L1, L2
2	Relate the fundamentals and importance of Natural Resources and understand the importance of Biodiversity and its Conservation.	L1, L2
3	Interpret and Analyze various types of Environmental Pollution and their effects on plants and animals	L1, L2, L3, L4
4	Relate and Apply various laws available in the country to protect the Environment.	L1, L2, L3
5	Interpret and Analyze address social issues for sustainable development.	L1, L2, L3, L4
6	Relate and Analyze the importance of Environmental Monitoring.	L1, L2, L3, L4

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Concepts of Environmental Sciences Environment, Levels of organizations in environment, Structure and functions in an ecosystem; Biosphere, its Origin and distribution on land in water and in air.	2	L1, L2
2	Natural Resources, Biodiversity and its conservation		
	Renewable and Non-renewable Resources, Forests, water, minerals, Food and land (with example of one case study); Energy, Growing energy needs, energy sources (conventional and alternative), Biodiversity at global, national and local levels; India as a mega-diversity nation; and strategies for conservation of Biodiversity.	3	L1, L2
3	Environmental Pollution		
	Types of pollution- Air, water (including urban, rural, marine), soil, noise, thermal, nuclear; Pollution prevention; Management of pollution-Rural/Urban/Industrial waste management [with case study of any one type, e.g., power (thermal/nuclear), fertilizer, tannin, leather, chemical, sugar], Solid/Liquid waste management, disaster management.	3	L1, L2, L3, L4
4	Environmental Biotechnology		
	Biotechnology for environmental protection- Biological indicators, bio- sensors; Remedial measures- Bio-remediation, photo remediation, bio- pesticides, bio-fertilizers; Bio-reactors- Design and application	2	L1, L2, L3
5	Social Issues and Environment		
	Problems relating to urban environment- Population pressure, water scarcity, industrialization; remedial measures; Climate change- Reasons, effects (global warming, ozone layer depletion, acid rain) with one case study; Legal issues-Environmental legislation (Acts and issues involved), Environmental ethics	3	L1, L2, L3, L4
6	Environmental Monitoring		
	Monitoring- Identification of environmental problem, tools for monitoring (remote sensing, GIS); Sampling strategies- Air, water, soil sampling techniques	2	L1, L2, L3, L4
	Total Hours	15	

DEPARTMENT OF COMPUTER ENGINEERING (COMP) (Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

### List of Practical/ Experiments:

Practical Number	Type of Experiment	Practical/ Experiment Topic	Hrs.	<b>RBT</b> Levels
1	Basic Experiments	Apply installation steps to set the environment variables and run a simple java program.	2	L1, L2
2		Experiment with various ways to accept data through keyboard for 1D and 2D array	2	L1, L2
3		Experiment with class creation including members and methods, accepting and displaying details for single object.	2	L1, L2, L3
4		Experiment with constructor and constructor overloading	2	L1, L2, L3
5		Experiment with String and String Buffer	2	L1, L2, L3
6		Experiment with single and multilevel inheritance (Use super keyword).	2	L1, L2, L3
7		Experiment with demonstration of try, catch, throw, throws and finally	2	L1, L2, L3
8	Design Experiments	Experiment with creating user defined package	2	L1, L2, L3
9		Experiment with implementing multithreading using Thread class and Runnable interface	2	L1, L2, L3
10		Experiment with Applet to demonstrate Graphics, Font and Color class	2	L1, L2, L3
11		Experiment with creation of GUI application with event handling using AWT controls	2	L1, L2, L3
12		Make use of database connectivity to develop java application.	2	L1, L2, L3
13	Mini/Minor Projects/ Seminar/ Case Studies	<ul> <li>Mini Project based on content of the syllabus. (Group of 2-3 students)</li> <li>1. Gaming System</li> <li>2. Hotel Reservation System</li> <li>3. Airline Reservation System</li> <li>4. Hospital Management System</li> <li>5. Online chat application</li> <li>6. E-commerce website</li> </ul>	6	L1, L2, L3

Module	Topics	Hrs.	Cognitive levels of
No.	<b>K</b> and		attainment as per
			<b>Bloom's Taxonomy</b>
1	Extempore/Debate		L1, L2, L3
	I. Introduction to debate, Definition and types of Debate		
	Brainstorming session among students on various topics floated for	4	
	debate. Topics can be Academic or Parliamentary, Financial,		
	International affairs, technology trends, Technical or philosophical.		
	Extempore speech by each student for /against topic for 1 minute.		
	<b>II.Debate competition</b> . Formation of four teams for two topics. Two		
	teams (For and against) for topic I will debate first and the other two		
	team will be audience and for topic II vice-versa.		
	Evaluation by faculty as per format.		
2	General Knowledge (Technical and Current Affairs)		L1, L2, L3
	I. Introduction to Quiz, Definition, Types of quiz, Rules of quiz, quiz	4	
	rounds. Quiz competition on Technical topic with 50 MCQ.		
	<b>II.</b> Puzzle/ <b>Quiz competition on current affairs</b> with 50 MCQ.		
	Evaluation by faculty as per format.		
3	Personality Development	4	L1, L2, L3
	I. Word association (Test Sentence Building) (2 Hrs.) Students are	4	
	shown 60 English words one after other and a short sentence using the		
	words shown are to be written. Each word will appear for 15 seconds		
	and sentence is to be written within this period only. At least 45 words		
	are to be attempted to get good marks II. Thematic Apperception Test (Short Story Writing)(2 Hrs.)		
	12 Slides will be projected, and stories are to be written in 03 Minutes.		
	Discussions on Stories written by students		
	<b>Evaluation by faculty as per format.</b>		
4	Extended Work		L1, L2, L3
	<b>Introduction to Street play-T</b> ypes of Street play, Writing and		21, 22, 20
	demonstration of street Play on social Issues:-Water	6	
	conservation Waste Management Plastic Ban etc.		
	Evaluation by faculty as per format		
5	Awareness creationon social issues		L1, L2, L3
	Students will develop material like placard, posters etc. for creating		
	awareness on issue like	6	
	• Education on social Issues like social media, youth related		
	issues etc.		
	Education on health issues		
	• Education on issues related to senior citizen etc.		
	The education/ awareness needs to be conducted in campus through		
	presentation(placards, posters etc.).		
	Evaluation by faculty as per format		
	Data collection and Analysis:		
	survey's needs to be developed and conducted, data analysis and		
	results interpretation		

	Under ICET Autonomy Scheme - 2019		
	Evaluation by faculty as per format		
6	Extempore/Debate		L1, L2, L3
	I. Introduction to debate, Definition and types of Debate		
	Brainstorming session among students on various topics floated for	6	
	debate. Topics can be Academic or Parliamentary, Financial,		
	International affairs, technology trends, Technical or philosophical.		
	Extempore speech by each student for /against topic for 1 minute.		
	<b>II.</b> Debate competition. Formation of four teams for two topics. Two		
	teams (For and against) for topic I will debate first and the other		
	two team will be audience and for topic II vice-versa.		
	Evaluation by faculty as per format.

**<u>Course Objective</u>**: The course intends to apply the concept of probability, Correlation and Regression, Laplace Transform and Fourier transform to the engineering problems and to evaluate the optimization of two and three variables.

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Apply the concept of probability random variables, mathematical expectations and variance.	L1, L2, L3
2	Differentiate the discrete and continuous random variables.	L1, L3
3	Evaluate the Maximization and minimization of two and three variables.	L1, L2, L3
4	Apply the concept of Correlation and Regression to the engineering problems.	L1, L2, L3
5	Develop an understanding of how to read and construct valid mathematical statements, arguments and understand mathematical statements.	L1, L3
6	Understand use of groups and codes in Encoding-Decoding and apply discrete structures into other computing problems such as formal specification, verification, artificial intelligence, cryptography, Data Analysis and Data Mining.	L1, L3

**TCET DEPARTMENT OF COMPUTER ENGINEERING (COMP)** (Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Basic Probability		L1, L2, L3
	Probability spaces, conditional probability, independence; Discrete random variables, Independent random variables, sums of independent random variables; Expectation of Discrete and Continuous Random Variables, Moments, Variance of a sum, Conditional Probability	6	
2	Basic Statistics Measures of Central tendency, Moments, skewness and Kurtosis, Binomial, Poisson and Normal distribution and evaluation of statistical parameters for these three distributions	6	L1, L3
3	Linear Programming problems Types of solutions to linear programming problems, standard form of L.P.P. Simplex method, Big M method (Penalty method) to solve L.P.P, Duality, Dual simplex method and Revised simplex method to solve L.P.P.	8	L1, L2, L3
4	Applied Statistics Correlation and regression – Rank correlation, Curve fitting by the method of least squares- fitting of straight lines, second degree parabolas and more general curves	8	L1, L2, L3
5	Logic           Propositions and logical operations, Truth tables Equivalence,           Implications Laws of logic, Normal Forms, Predicates and           Quantifiers, Mathematical Induction	7	L1, L3
6	Algebraic Structures Algebraic structures with one binary operation: semigroup, monoid and group, Abelian group, Cyclic groups Homomorphism, Isomorphism, Field and Extension of field. Coding theory: Coding of binary information and error detection, decoding and error correction.	10	L1, L3
	Total Hours	45

**<u>Course Objective:</u>** The objective of the course is to study various techniques for effective problem solving along with different algorithm designing paradigms in computer science, to illustrate the efficient ways of problem solving for any given problem.

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Analyze the complexities of various problems in different domains.	L1, L2, L3, L4
2	Apply and analyze the complexity of divide and conquer strategy.	L1, L2, L3, L4
3	Apply and analyze the complexity of greedy method, dynamic programming strategy, backtracking and branch and bound strategy.	L1, L2, L3, L4
4	Understand, apply and analyze different string matching algorithms	L1, L2, L3, L4
5	Compare and contrast various algorithm designing strategies to apply in real world problems.	L1, L2, L3, L4
6	Demonstrate the classes P, NP, and NP-Complete.	L1, L2

DEPARTMENT OF COMPUTER ENGINEERING (COMP) (Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

Modul e No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Algorithm Analysis		L1, L2, L3, L4
	Performance analysis, space and time complexity, Order of Growth of function. Asymptotic notations, Mathematical background for algorithm analysis, Analysis of selection sort, insertion sort. Recurrences: -The substitution method -Recursion tree method -Master method. <b>Divide and Conquer:</b> Finding Minimum and maximum, Binary search, Merge sort, Quick sort.	9	
2	Greedy Method		L1, L2, L3, L4
	<b>Greedy Method</b> : General method, Single source shortest path, Knapsack problem, Minimum cost spanning trees-Kruskal and prim's algorithm, Job sequencing with deadlines.	5	
3	Dynamic Programming		L1, L2, L3, L4
	<b>Dynamic Programming</b> : General method, Multistage graphs, single source shortest path, all pair shortest path, 0/1 knapsack, Travelling salesman problem, Longest common subsequence.	6	
4	Backtracking and Branch & Bound	10	L1, L2, L3, L4
	<ul><li>Backtracking: General method, 8 queen problem (N-queen problem), Sum of subsets.</li><li>Branch and Bound: General method, 15 puzzle problem, Travelling salesman problem.</li></ul>		
5	String Matching Algorithms	8	L1, L2, L3, L4
	The naïve string matching Algorithm, The Rabin Karp algorithm, String matching with finite automata, The knuth-Morris-Pratt algorithm, Boyer Moore algorithm.		
6	Introduction to Non Deterministic algorithm	7	L1, L2
	Polynomial time, Polynomial time verification, classes NP, NP Completeness and polynomial time reduction.		
	Total Hours	45

**<u>Course Objective:</u>** The course intends to deliver the fundamental knowledge of Operating system and apply this knowledge for implementing and analyzing Process, Memory, I/O disk and File management techniques.

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the role of operating system in a computer	L1, L2
2	Make use of various Scheduling algorithms.	L1, L2, L3
3	Apply the principles of concurrency.	L1, L2, L3
4	Examine deadlock, prevention and avoidance algorithms	L1, L2, L3
5	Compare and contrast various memory management schemes	L1, L2
6	Develop a prototype file systems.	L1, L2, L3

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Overview of Operating System		
	Operating System Objectives and Functions, The Evolution of Operating Systems, Operating System Structures, System Calls, Developments Leading to Modern Operating Systems, Virtual Machines	4	L1, L2
2	Process Management		
	<b>Processes and Threads:</b> Process: Concept of a Process, Process States, Process Description, Operations on Processes, Execution of the Operating System; Threads: Processes and Threads, Concept of Multithreading, Types of Threads, Thread programming Using Pthreads; Scheduling: CPU Scheduling, Thread Scheduling.	4	L1, L2, L3
3	Concurrency Control and Deadlock Handling		
	Concurrency Control: Principles of Concurrency, Requirements for Mutual Exclusion, Mutual Exclusion: Hardware Support, Operating System Support (Semaphores and Mutex), Programming Language Support (Monitors), Classical synchronization problems: Readers/Writers Problem, Producer and Consumer problem, Inter- process communication. Deadlock: Principles of Deadlock, Deadlock Modeling, Strategies to deal with deadlock: The Ostrich Algorithm, Deadlock Prevention, Deadlock Avoidance, Deadlock detection and recovery, An Integrated Deadlock Strategy, Example: Dining Philosophers Problem.	10	L1, L2,L3
4	Memory Management		L1, L2, L3
	Memory Management: Memory Management Requirements, Memory Partitioning: Fixed Partitioning, Dynamic Partitioning, Buddy System, Relocation, Paging, Segmentation. Virtual Memory: What is Virtual Memory, Demand Paging, Page Replacement, Allocation, Thrashing; Allocating Kernel Memory.	10	
5	Input / Output And File Management		L1, L2
	I/O Management and Disk Scheduling: I/O Devices, Organization of the I/O Function, Operating System Design Issues, I/O Buffering, Disk Scheduling(FIFO, SSTF, SCAN, C-SCAN, LOOK, C-LOOK), Disk Cache. File Management: Overview, File Organization and Access, File Directories, File Sharing, Record Blocking, Secondary Storage Management.	10	
6	Case Study: LINUX Operating System	7	L1, L2,L3
	Overview of Linux, Architecture, Process management, Memory Management, I/O Management, BASH Shell scripting: Basic shell commands, shell as a scripting language.		
	Total Hours	45

**The weightage of marks for continuous evaluation of Term work/Report:** Formative (40%), Timely completion of practical (40%) and Attendance / Learning Attitude (20%)

Prerequisite: Computer System Basics, Programming Language (C/C++/Java)

**Course Objective:** The course intends to deliver fundamental knowledge about various aspects of computer networks and apply the knowledge acquired to understand/solve problems in networking.

Sr. No.	Course Objectives	Cognitive levels of attainment as per Bloom's Taxonomy
1	Explain the basic concepts of digital communication.	L1, L2
2	Explain the concepts and fundamentals of computer networks and reference models.	L1, L2
3	Differentiate between types of transmission media, multiplexing techniques and switching techniques	L1, L2, L3
4	List the functionalities of Data link layer and analyze various design issues.	L1, L2, L3, L4
5	List the routing protocols of Network layer and solve subnetting and super-netting problems.	L1, L2, L3, L4
6	Illustrate how the application layer protocols utilizes transport layer protocols (TCP/UDP)	L1, L2, L3, L4

DEPARTMENT OF COMPUTER ENGINEERING (COMP) (Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Basics of Digital Communication		
	Introduction: Theoretical basis for communication; Maximum data rate of a	5	L1, L2
	channel: Transmission impairments; Attenuation distortion, Delay		
	distortion, Noise; Data transmission modes: Serial & Parallel, Simplex, Half		
	duplex & full duplex, Synchronous & Asynchronous transmission		
2	Introduction to Computer Networks		L1, L2
	Definition of a Computer Network; Components of a computer network:	-	
	Classification of networks, network types, Network topologies, networking devices.	6	
	Network Software & Network Standardization: Networks Software;		
	Protocol hierarchy, Design issues for the layers, Service Primitives:		
	<b>Reference models:</b> Introduction and comparison of the OSI Reference Model and TCP/IP Reference Model		
3	Physical Layer		L1, L2, L3
	Introduction: Switching Techniques; Comparison of switching techniques;		
	Multiplexing: FDM,TDM,WDM	7	
	Transmission Medium: Guided & Unguided Transmission medium: Twisted		
	pair, Coaxial cable, Optical fiber, Wireless transmission		
	DLL Design Issues (Šervices, Framing, Error Control, Flow Control)		
4	Data Link Layer	_	L1, L2, L3, L4
	Error Detection and Correction (Hamming Code, CRC, Checksum),	8	
	Elementary Data Link protocols for flow control, Modium Access Control sub lower Channel Allocation mehlem Tures of	0	
	<b>Medium Access Control sub layer:</b> Channel Allocation problem, Types of Multiple Access Protocol, Local Area Networks -Ethernet (802.3)		
5	Network Layer	10	L1, L2, L3, L4
5	Introduction and Design issues of Network layer; Routing: Principles of	10	L1, L2, L5, L4
	Routing, Types of routing algorithms, Comparison of routing algorithms;		
	Protocols at network layer;		
	<b>Congestion</b> : Factors of congestion and Congestion control algorithms: Open		
	loop congestion control, Closed loop congestion control, QoS parameters,		
	Token & Leaky bucket algorithms		
6	Transport Layer & Application Layer	9	L1, L2, L3, L4
	The Transport Service: Transport service primitives, Connection	1	
	management (Handshake), UDP, TCP, TCP Flow control (sliding Window),		
	TCP Congestion Control: Slow Start		
	Application layer: DNS: Name Space, Resource Record and Types of Name		
	Server. HTTP, SMTP, Telnet, FTP, DHCP		
	Total Hours	45

**Course Objective:** The course intends to give the student a understating of drawing basic primitive techniques, 2D-3D transformation and apply the concepts for rendering 3D objects.

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the basic concepts of Computer Graphics.	L1, L2
2	Demonstrate various algorithms for scan conversion and filling of basic objects and their analysis.	L1, L2, L3
3	Apply 2D geometric transformations on graphical objects.	L1, L2, L3
4	Apply viewing and clipping transformation on graphical objects.	L1, L2, L3
5	Explore 3D solid model representation techniques and projections.	L1, L2, L3
6	Understand visible surface detection techniques, illumination models and applications of animation.	L1, L2,L3

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Computer Graphics Definition, applications, Raster and Random scan display, Input Device, Output Device (Cathode Ray Tube, CRTs for Color Display, The Shadow - Mask CRT, Direct View Storage Tube, Tablets, The light Pen)	4	L1, L2
2	Basic Drawing Primitives Coordinate system, Pixel plotting, Line Drawing algorithm: Digital Differential Analyzer, Bresenhem Line Drawing, Bresenhem and midpoint Circle Drawing algorithm, Midpoint Ellipse drawing algorithm, Aliasing, Antialiasing techniques(Pre and post filtering, super sampling, and pixel phasing) Filled area primitives: Inside-outside test, boundary and flood-fill, scan- line fill	8	L1, L2, L3
3	2D Geometric Transformation Homogenous coordinates, Translation, scaling, fixed point. scaling, rotation, rotation about arbitrary point, , shearing, reflection, composite transformations	6	L1, L2, L3
4	Viewing and Clipping Viewing transformation and Window to Viewport coordinate transformation, Line Clipping Algorithms: Cohen Sutherland, Midpoint Subdivision, Liang Barsky, Polygon Clipping Algorithms: Sutherland Hodgeman, Weiler Artherton	9	L1, L2, L3
5	<b>3D Transformation</b> 3D display methods, Wireframe model, sweep representation, Octrees, Binary space partitioning, curved lines and surfaces, cubic spline interpolation methods, Bezier, B-spline curves, Fractals, parallel and perspective projection,3D translation, scaling, rotation, Rotation about arbitrary axis	9	L1, L2, L3
6	Hidden Surface Removal and Animation Visible surface detection concepts, back-face detection, Z buffer method, Painters algorithm, Warnock algorithm, Illumination and Shading Models: Ambient, Specular and Diffuse reflections, Phong and Gouraud shading, Halftoning and Dithering techniques Animation: Key Frame Animation, Animation Sequence, Motion Control Methods, Morphing, Warping- Mesh Warping.	9	L1, L2,L3
	Total Hours	45

## List of Practical/ Experiments:

Practical Number	Type of Experiment	Practical/ Experiment Topic	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Basic Experiments	Develop a program for DDA and Bresenham Line Drawing algorithms	2	L1, L2, L3
2		Implement midpoint Circle/Ellipse algorithm	2	L1, L2, L3
3		Develop a program for Boundary fill and Flood fill algorithm(using 4-connected and 8-connected approaches)	2	L1, L2, L3
4		Develop a program for Basic transformation on 2D objects (Translation, Scaling, Rotation)	2	L1, L2, L3

-		Design and develop a program for line	2	L1, L2, L3
5		Clipping Algorithm	-	21, 22, 20
	Design Experiments		4	L1, L2, L3
6	Design Experiments	Design and Develop a program for	4	L1, L2, L3
6		Polygon clipping		
	-			
		a)Develop a program for Bezier curve for	4	L1, L2, L3
7		n control points		
		b) Design a program to draw Fractals		
0		Implement Basic primitives using Open	2	L1, L2, L3
8		GL		
	Case Studies	Case Study	2	L1, L2, L3
		1. Computer Graphics in Automotive		
		Design		
9		2. Code sign case study in Computer		
		Graphics		
		3. Computer Graphics for Office		
		Automation.		
		Mini Project	8	
	Mini/Minor	1. Walking Robot		
10	<b>Projects/ Seminar</b>	2. Maze Game		
		3. Bus Stop Simulation		L1, L2, L3,L4
		4. Bull's Eye		
		Total Hours	30	

SE Semester-IV

#### Choice Based Credit Grading Scheme with Holistic and Multidisciplinary Education (CBCGS-HME 2020) Proposed TCET Autonomy Scheme (w.e.f. A.Y. 2021-22)

	B.E. ( Computer Engineering )					S.E. SEM : IV			
	Course Name : Value Education					Course Code : MC-CS401			
Teachin	Teaching Scheme (Program Specific)         Examination				tion Scheme (Formative/ Summative)				
Modes of 7	Feaching / L	earning / W	eightage		Mo	des of C	Continuous Assessm	ent / Evaluatio	n
	Hours Per Week				Theory (100)		Practical/Oral (25)	Term Work (25)	Total
Theory	Tutorial	Practical	Contact Hours	Credits	IA	ESE	PR/OR	TW	
1	-	-	1	-	-	-	-	25	25
The	The weightage of marks for continuous evaluation of Term work/Report: Formative (40%), Timely completion of practical (40%) and Attendance / Learning Attitude (20%)								
Prerequisite:	NA.								

**<u>Course Objective:</u>** The course intends to deliver fundamental knowledge of various aspects to understand the concept of Ethics in Engineering & Human values, significance of values in Self-development, ethical human value and apply values needed for peaceful society, aware value education, towards personal, national and global development.

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Develop commitment to professional ethics, responsibilities and norms of the engineering practice.	L1, L2, L3
2	Develop a good moral character and social attitude.	L1, L2, L3
3	Determine the proper use of engineering knowledge to bring uplift in quality of life, along with peace and conflict resolution.	L1, L2, L3
4	Propagate ethics and values in society.	L1, L2, L3
5	Apply values such as care and compassion; honesty and trustworthiness;	L1, L2, L3
6	Global development through integrity; respect; responsibility and understanding tolerance and inclusion.	L1, L2, L3, L4

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Value Education - Introduction		L1, L2,L3
	Understanding the importance of Value Education, Need in modern Society, Benefits for students, Adding Value to Life, Self-Exploration as the Process for Value Education.	2	
2	Values and Ethics		L1, L2, L3
	Definition, Concept, Classification, value based life, Present day materialistic approach, importance of value in human lives, Humility, Attitude, self- confidence, Theory, Criteria and Sources of values. Ethics, Role of Ethics, Educational Ethics, imparting ethics in educational age, integrating spirituality with education.	3	
3	Right Understanding		L1, L2, L3
	Providing the Basis for Universal Human values and Ethical Human Conduct, Basis for the Holistic Alternative Unit Universal Human Order, Professional Ethics in the Light of Right Understanding, Vision for Holistic Technologies, and Journey towards the Holistic Alternative- The Road Ahead.	3	
4	Dealing with Habits		
	Introduction to Habits- Simple, Serious and Grave bad Habits, Cause of Addiction to bad habits, How some bad habit are bad though they feel good, what implies one to go on with bad habits, How to have right perception, The Power of Good habits, importance of right association.	2	L1, L2, L3
5	Dealing with Stress		L1, L2, L3
	About Stress, definition and causes, Positive stress, Negative Stress, Statistics of Stress, and Suicides the present day Stupid idea. How to deal with cries in our life, Art of Tolerance, Making Right Choice, Life Style Management.	3	
6	Harmony at Various Levels		
	Understanding the Human Being as co-existence of self and body Harmony in Self, Harmony with the body, Harmony in the Family, Harmony in the Society, Harmony in Nature, Harmony in Existence.	2	L1, L2, L3, L4
	Total Hours	15

#### **Course Objectives:**

The Course intends to get industry like exposure in the college laboratories by carrying out projects using subject studied till 4<sup>th</sup> semester. Also design innovative techniques / methods to develop the products. To gain knowledge of marketing and publicizing products developed.

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	To apply subjects knowledge in the college laboratories for carrying out projects	L1, L2,L3
2	Able to developed innovative techniques / methods to develop the products	L1, L2,L3
3	Able to do marketing and publicity of products developed	L1, L2,L3

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

# **Detailed Syllabus:**

Module No.	Topics	Cognitive levels of attainment as per Bloom's Taxonomy
	Program Specific Internship	
1	Emerging technologies in domains offered by Department of Computer Engineering Applying classroom and laboratory knowledge to design, develop and deploy the products	L1, L2, L3
	Inter disciplinary Internship	
2	To explore and understand issues and challenges in the other disciplines (EXTC, ELEX, MECH and CIVIL) Design , develop and deploy cost effective products using multidisciplinary approach	L1, L2, L3
	Industry Specific Internship	
3	issues and challenges in industry Industry specific problems Design , develop and deploy products for startup and SMEs	L1, L2, L3
	Interpersonal Internship	
4	Interpersonal skills such as leadership, marketing ,publicity and corporate ethics and communication Problem solving , presentation , negotiation skills	L1, L2, L3
	Social Internship	
5	Different real life issues in the society Identify societal problems and provide engineering solutions to solve these problems	L1, L2, L3
	Academic Internship	
6	Report preparation, preparation of presentations, copy table book preparation, business proposal and IPR Capture aspirations & expectations through interviews of students. Ways to connect research in technical institutes with industry. Taking inputs from self, local stakeholders and global stake holders which will help to develop process with comparative and competitive study.	L1, L2, L3

-	-	30	30	1	-	-	25	25	- 50
The	AC : Activity The weightage of marks for continuous evaluation of Term work/Report: Formative (40%), Timely completion of practical (40%) and Attendance / Learning Attitude (20%)								
Prerequisit	e: Basics of	Computer Pr	rogramming	g, General l	knowled	ge, Social	awareness		

**Course Objectives:** he larger objective of the course is to develop the Society Sensitive Citizens by creating awareness among students and take up the initiatives in the Activity mode for the needy. The course intends to deliver the understanding of the concepts of critical thinking, encourage the students to look beyond their textual knowledge, establish the relationship between theory and the applications of the learned concepts. It also intends to address the social issues and help the society in the area of work.

SN	Course Outcome	Cognitive level attainment as per revised Bloom Taxonomy
1	Apply procedures for Creative writing, which will give them wings of imagination with self-expression in the topic. Learn on multidisciplinary subjects.	L1, L2, L3
2	Understand the importance of the <i>extempore</i> speech which will help them to think and develop presence of mind. Exposure to Group discussion will provide an opportunity to all team members to give their ideas and opinion on a certain topic. It increases one's listening skills and confidence in speaking. Team building improves.	L1, L2
3	Interpret the strengths of survey research including its effectiveness, generalizability, reliability, and versatility. Students will be able to make the awareness about various social issues.	L1, L2, L3

	m •		a
Module	Topics	Hrs	Cognitive
No.			level
			attainment
			as per
			revised
			Bloom
			Taxonomy
1	Creative writing (technical/non-technical		L1, L2, L3
	I. Introduction to creative writing.		
	a) Orientation and Introduction to Writing skills both article form and paper writing.	2	
	Information about the rules and regulations about original writing. Templates of good		
	journals eg. (IEEE format) with emphasize on originality, plagiarism check.		
	Topic distribution in different categories as per choice of students Select the topic of		
	article/ paper either from choice or in consultation with teacher. Discussion forum or		
	Use of internet is allowed for the same.		
	Brainstorming and prewriting		
	Form teams divide into 8 teams. 5 students per team.		
	Form the skeleton of the paper with data properly designed. check the plagiarism and		
	shaping the article/paper with the team.		
	II. Drafting and editing		
	Continuation of the article/paper shaping, taking care of plagiarism		
	Submit the article /paper introduction in one page outlining the salient features of the		
	topic in hard copy. Students can have the freedom of choosing mentor faculty from	2	
	college if needed. Finalizing the article/ paper.		
	<b>Demonstration by students</b> and evaluation (Presentation of papers of 4 teams with		
	inputs from mentors/teachers )		
	Evaluation by faculty as per format.		
2	Lecturette (Extempore speech)		L1, L2, L3
	I. Introduction		
	Orientation and Introduction to lecturette/ extempore rules	2	
	The candidate is required to deliver a short talk for 03 minutes to the group watching	2	
	him.		
	Choice of topic discussion. Technical/ Non-technical		
	A suitable topic is to be chosen out of 04 topics given.		
	03 minutes will be given for thinking, jotting down points and organizing the speech		
	without any help.		
	Candidate has to introduce himself/herself in brief before starting the talk.		
	II. Extempore/Presentation by each student Evaluation by faculty as per format.		
3	Group Discussion		L1, L2, L3
	I. Introduction and orientation about Group discussion and rules . GDs form an	2	
	important part of the short-listing process for recruitment or admission in a company or	2	
	institution. Types of GD Topics such as social, political, economic, technical etc. Topic		
	choice to be given to students and based on that Team formation on the chosen topic		
	Brainstorming among the students to form teams on topics selected.		
	.Prepare the points for group discussion. Formation of four teams for two topics.		

	Under TCET Autonomy Scheme - 2019	Estd. in 2	2001
	Two teams (For and against) for topic I will debate first and the other two team will be		
	audience and for topic II vice-versa.		
	<b>II. Paraphrasing/summarizing.</b> Evaluation will be based on Creativity skills		
	supported by listening and participating proactively by presentation of teams.		
	Group discussion among the teams members sequentially, other teams will be audience	2	
	to discussing team and vice versa.	-	
	Evaluation by faculty as per format		
4	Survey designing and study		L1, L2, L3
	<b>I. Introduction and Orientation</b> to research methodology emphasizing on survey		11, 12, 13
	designing. Surveys can be administered in many modes, including: online surveys,	2	
	email surveys, social media surveys, paper surveys, mobile surveys, telephone surveys,	2	
	and face-to-face interviewsurveys. Brainstorming and establishing the goal of the		
	project Form teams, divide into 8 teams. 5 students per team.		
	Select the topic of survey topic with feasible insight either from choice or in		
	consultation with teacher. Discussion forum or Use of internet is allowed for the same.		
	Structuring and Designing the Questionnaire		
	Create the sample questionnaires(max 10) mapping with goal established		
	Interview the peer team members for data (all students should be asked.) Field survey		
	topics can also be collected.	2	
	<b>II.</b> Collection of the data and use the tools for analyses of the survey incorporated if		
	any. Finalizing the results		
	Data analyses in the form of written article and graphs projection for the same.		
	Presentation of survey results by teams		
	(a)Demonstration by students 4 teams		
	b) Presentation of another 4 teams		
	Submission of projects as hard copy		
	Evaluation by faculties		
5	Extended Work		L1, L2, L3
	I Orientation and Introduction about social responsibilities.		
	Team formation	4	
	5 students in each team.		
	Visit to nearby community to provide necessary help based on the following topics		
	(a)Food Waste (TCET canteen) and societies.		
	Keep record of food waste daily in kilogram, help in designing the display of food		
	wastage every day.		
	Similarly extend the idea in their own society during festivals, gatherings.		
	(B) Health awareness	4	
	Take the record of the societies in which they reside, collect the information about	4	
	vaccinations (age wise, validity of time etc)		
	Record maintenance		
	(c) <b>3-minute Film making or case study</b> on the above two themes by teams and	6	
	presentation.		
	Evaluation by faculty as per format.		
	Total Hours	30	1

**<u>Course Objectives</u>**: The course intends to understand basics of soft skills, learn essential life skills, understand and develop self and incorporate ethics and etiquette in day to day life

#### **Course Outcomes:**

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand basics of soft skills	L1,L2,L3
2	Learn essential life skills	L1,L2,L3
3	Understand and develop self	L1,L2,L3
4	Understand others with empathy	L1,L2,L3
5	Use employment skills for placement and higher studies	L1,L2,L3
6	Incorporate ethics and etiquette in day to day life	L1,L2,L3

DEPARTMENT OF COMPUTER ENGINEERING (COMP) (Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Soft Skills	6	L1,L2,L3
	1. Meaning and Concept		
	2. Importance of soft Skills		
	3. Soft Skills for Lifelong learning- Building a better world		
2	Essential Soft Skills		L1,L2,L3
	1. Personal integrity		
	2. Taking responsibility	8	
	3. Professionalism		
	4. Communication		
	5. Critical Thinking		
	6. Creativity and Innovation		
3	Self-Development	8	L1,L2,L3
	1. Self-assessment, Awareness, Perception and Attitudes, Values		
	and belief, Personal goal setting, career planning, Self-esteem.		
	2. Personal memory		
	3. Rapid reading & Taking notes		
	4. Complex problem solving		
	5. Creativity		
4	Introduction to Interpersonal Skills	8	L1,L2,L3
	1. Team work: Mentorship, Motivation		
	2. Problem Solving		
	3. Decision Making		
	4. Time Management		
	5. Emotional Intelligence		
	6. Negotiation Skills		
	7. Stress Management		
5	Employability Skills	8	L1,L2,L3
	1. Cover letter		
	2. Resume		
	3. Group Discussion		
	4. Presentation skills		
	5. Interview skills		
6	Introduction to Corporate Ethics and Etiquette	7	L1,L2,L3
	Business etiquette (meeting etiquette, Dining etiquette, Interview		. ,
	etiquette, Professional and work etiquette and Social		
	Skills), Greetings and art of conversation		
	1. Dressing and grooming		
	2. Ethical codes of conduct in business Intonation Pattern for		
	effective presentation		
	Total Hours	45

**<u>Course Objective:</u>** The Objective of this course is to deliver the fundamental concepts of theory of computation describing formal mathematical models of computation such as FA,PDA,LBA and TM by comparing their power, limitations, languages and their applications in computation and complexity theory and also to learn that not all problems are solvable by computers.

Sr. No.	Course Outcomes	Cognitive levels of attainment as
		per Bloom's
		Taxonomy
1	Describe formal models of computation, such as finite automata, pushdown	L1, L2, L3
	automata, and Turing machines.	
2	Design Finite Automata's for different Regular Expressions and Languages.	L1, L2, L3
3	Compare different types of Grammars and design context free grammars for	L1, L2, L3
	formal languages.	
4	Construct and analyze Push Down automata and Turing Machine for formal	L1, L2, L3,L4
	languages.	
5	Classify machines by their power to recognize languages.	L1, L2, L3,L4
6	Express the understanding of the decidability and decidability problems.	L1,L2

DEPARTMENT OF COMPUTER ENGINEERING (COMP) (Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

# Ice Estd. in 2001

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Basic Concepts and Finite Automata		
	Basic Concepts: Alphabets, Strings, Languages, Closure properties.		
	FA without output: Finite Automata (FA), Deterministic Finite Automata	9	L1, L2, L3
	(DFA) and Nondeterministic Finite Automata (NFA): Definitions, transition		
	diagrams and Language recognizers, NFA to DFA Conversion,		
	Equivalence of Deterministic and Nondeterministic Finite Automata,		
	Applications of Finite Automata, Finite Automata with Epsilon Transitions,		
	Eliminating Epsilon transitions, Minimization of DFA.		
	<b>FA with output:</b> Definition and construction of Moore and Mealy machines		
	and Equivalence, Applications and limitations of FA.		
2	Regular Expressions and Languages		
	Regular Expression (RE): Equivalence of RE and FA, Arden's Theorem,	6	L1,L2, L3
	RE Applications. Grammars and Chomsky hierarchy.		
	Regular Language (RL): Proving languages to be Nonregular -Pumping		
	lemma and Closure properties of regular languages.		
3	Context Free Grammar		
	Definition, Sentential forms, Leftmost and Rightmost derivations, Parse tree,	_	
	Ambiguity. Simplification and Applications. Normal Forms: Chomsky	7	L1,L2, L3
	Normal Forms (CNF) and Greibach Normal Forms (GNF), CFLs - Pumping		
	lemma, Closure properties		
4	Push Down Automata		
	Definition, Model, Acceptance of CFL, Acceptance by Final State and	7	L1, L2,L3,L4
	Acceptance by Empty stack and its Equivalence, Deterministic PDA, Non-		
	Deterministic PDA, Equivalence of CFG and PDA, Application of PDA		
5	Turing Machine		
	Definition, Transitions, Design of TM as generator, decider and acceptor.		L1, L2, L3,L4
	Variants of TM: Multitrack, Multitape, Universal TM, Equivalence of Single	10	
	and Multi Tape TMs. Applications, Power and Limitations of TMs.		
6	Undecidability		
	Properties of recursive and recursively enumerable languages, Decidability		L1, L2
	and Undecidability, Halting problem, Linear bounded automata (LBA),	6	
	Rice's Theorem, Post's correspondence problem (PCP).		
	Total Hours	45

2	DOS, Multiprocessor OS, Mobile OS, RTOS, Cloud OS)	4	
2	Unix Kernel and File Management	4	L1, L2, L3, L4
	System Structure, User Perspective, Architecture of Unix Operating		
	System, Buffer cache: Header, Buffer Pool, Retrieving, Reading and Writing Buffer, File Representation: inodes: Structure of file Directories,		
	Path conversion to inode, superblock, inode assignment, allocation of disk		
	blocks		
3	Unix Process and Memory management	10	L1, L2, L3, L4
	Detailed design of Process Structure: Kernel Data structures for process,		, , ,
	Structure of Uarea and Process table, Process states and Transitions,		
	Context of a Process: Static and Dynamic area of context, Saving the		
	Context Layout of System Memory, Regions, Mapping regions with		
	Process, page table and mapping virtual address to physical address.		
4	Distributed Operating system concepts		L1, L2, L3, L4
	Goals, Distributed Computing Models, Hardware Concepts, Software	10	
	Concepts, Architecture of DOS. Design Issues: Transparency, Flexibility,		
	Scalability, Reliability, Performance, fault tolerance		
5	Multiprocessor Operating System		L1, L2, L3, L4
	Introduction, Basic multiprocessor system architectures, design issues,	0	
	Threads, Process synchronization: the test and set instruction, the swap	9	
	instruction, implementation of the process wait, Processor scheduling:		
6	Issues, Co-scheduling, Smart scheduling, Affinity Based scheduling Real Time Operating Systems and Mobile OS		L1, L2, L3
0	Characteristics of Real Time operating Systems, Classification of Real	8	$L_1, L_2, L_3$
	Time Operating Systems, Scheduling in RTOS: Clock driven cyclic, Event	5	
	driven: EDF and rate monotonic scheduling. Mobile OS: Architecture,		
	Android OS, iOS, Virtual OS, Cloud OS and their design issues		
	Total Hours	45

**Course Objective:** This course introduces the basic concepts and principles in mobile computing. It covers the TCP/IP extensions for mobile networking and provides opportunities to the students to gain hands-on experiences in developing mobile applications.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

SN	Course Outcomes	<b>RBT level</b>
1	Identify with the basic concepts and principles in mobile computing.	L1, L2
2	Understand the components and functioning of mobile networking.	L1, L2, L3
3	Describe the technologies in telecommunication with their underlying architectures.	L1, L2
4	Explain mobility management	L1, L2, L3
5	Illustrate how mobile Ad-hoc networks function	L1, L2, L3
6	Implement small android based applications.	L1, L2, L3

## **Detailed Syllabus:**

Module	Topics	Hrs	<b>RBT Levels</b>
No.		•	
1	Introduction to mobile computing		
	Mobile Computing vs. Wireless Networking ; Mobile Computing Applications;		
	Characteristics of Mobile computing;		
	Medium Access Control: Motivation for specialized MAC, Introduction to	06	L1,L2
	multiple Access techniques (MACA), Wireless MAC Issues		
2	Mobile IP and TCP		
	Mobile IP: IP Packet Delivery, Agent Advertisement and Discovery,		
	Registration, Tunneling and Encapsulation, Reverse Tunneling		
	Mobile TCP: Traditional TCP, Classical TCP Improvements (like Indirect		
	TCP, Snooping TCP & Mobile TCP, Fast Retransmit/ Fast Recovery,	09	L1, L2,L3
	Transmission/Timeout Freezing, Selective Retransmission)		
3	Mobile Telecommunication Systems		
	GSM Mobile services, System Architecture, Radio interface, Protocols,		
	Localization and Calling, Handover, security (A3,A5 & A8);		
	GPRS system and protocol architecture; UTRAN, UMTS core network;	07	L1, L2
	Improvements on Core Network		
4	Mobile ad-hoc networks		
	Ad-Hoc Networks: Basic Concept, Characteristics, Applications; Design Issues;		
	Vehicular Ad Hoc networks (VANET);MANET Vs VANET; Security in ad-hoc	06	
	networks		L1, L2, L3
5	Mobility Management		
	Co- channel Interference; Mobility: Types of Handoffs.		L1, L2, L3
	Routing - Classification of Routing Algorithms, Algorithms such as DSR,	08	
	AODV, DSDV etc.		
6	Mobile Application Development		
	Structure of Mobile Computing Application; Characteristics of mobile devices;		L1, L2, L3
	Native applications vs. Web-Applications; Internet Protocols for mobile apps;	09	
	Mobile Platforms: Introduction to Android, Layers, android components,		
	mapping application to process. Android development basics.

**Course Objective:** The course should be able to introduce students about basic fundamentals and key aspects of Multimedia system, provide knowledge of compression techniques of different multimedia components, students to understand multimedia communication standards along with technology environment & provide an opportunity to gain hands-on experience in building multimedia applications.

#### Course Outcomes: Upon completion of the course students will be able to

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	To identify basics of multimedia and multimedia system architecture.	L1, L2, L3
2	To understand different multimedia components	L1, L2
3	To explain file formats for different multimedia components.	L1, L2, L3, L4
4	To analyze the different compression algorithms.	L1, L2, L3, L4
5	To describe various multimedia communication techniques.	L1, L2, L3
6	To apply different security techniques in multimedia environment.	L1, L2, L3, L4

## **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Multimedia System: An Introduction		
	Multimedia Elements, Multimedia Applications, Multimedia System Architecture, Evolving Technologies for Multimedia Systems, Defining Objects for Multimedia Systems, Multimedia Data Interface Standards, The need for Data Compression, Multimedia Database	8	L1, L2, L3
2	Compression & Decompression And Data File format Standards		
	Types of Compression, Binary Image Compression Schemes Color, Gray Scale and Still Video Image Compression, Video Image Compression, Audio Compression, Rich Text Format, TIFF File Format, Resource Interchange File Format (RIFF), MIDI File Format JPEG DIB File Format for Still and Motion Image, AVI File Format, MPEG Standards, Differentiate between JPEG & MPEG Techniques	9	L1, L2
3	Multimedia Input/output technologies& Storage Retrieval Technologies		
	Key Technologies Issues, Pen Input, Video and Image Display Systems, video comparison technique, Print output Technologies, Image Scanners ,Digital Camera, Video Images and Animation, Full-Motion Video, Magnetic Media Technology,Optical Media , Hierarchical Storage Management , Cache Management For Storage Systems, Image Stacking	9	L1, L2, L3, L4
4	Architectural & Telecommunications Considerations And Multimedia		
	Application DesignGeneral Purpose Architecture for Multimedia Support: Introduction toMultimedia PC/Workstation Architecture, Characteristics of MMX instructionset, I/O systems: Overview of USB port and IEEE 1394 interface, OperatingSystem Support for Multimedia ,Specialized Computational Processors,Memory Systems, Distributed Objects Models, Multimedia ApplicationsClasses, Types of Multimedia System, Virtual Reality Design, Components ofMultimedia Systems, Distributed Application Design Issues	9	L1, L2, L3, L4
5	Multimedia Authoring & User Interface And Hypermedia Messaging		
	Multimedia Authoring System, Hypermedia Application Design Considerations, User Interface Design, Mobile Messaging, Hypermedia, Message Components, Hypermedia Linking and Embedding, Creating Hypermedia Messages, Hyper multimedia message standards, different types of hyper media, Hyper Media Application's	6	L1, L2, L3
6	Distributed Multimedia Systems		
	Components of a Distributed Multimedia System, architecture of DMS, distributed Client-Server Operations, fault tolerant distributed, digital media fundamentals, Multimedia Object Servers, Multi-server Network Topologies, Distributed Multimedia Databases	4	L1, L2, L3, L4
	Total Hours	45	1

**<u>Course Objectives:</u>** To understand fundamental of Indian constitutional system, Union structure, Judiciary Structure with hierarchy and it function

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

SN	Course Objectives	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the rights and duties of Individual and government	L1, L2
2	To understand the government structure and hierarchy	L1, L2
3	To understand right of Indian who residing in India or outside India and understand citizenship law	L1, L2
4	To understand and apply the personal, social and economic rights to citizens of India	L1, L2, L3
5	To analyze the functions and powers of state and its limbs i.e. Legislature, Executive.	L1, L2, L3, L4
6	Understand the structure and modalities of state i.e. legislature, executive and judiciary	L1, L2, L3, L4

#### **Detailed Syllabus:**

Module No.	Topics Introduction	Hrs •	Cognitive levels of attainment as per Bloom's Taxonomy L1, L2
1	Constitution' meaning of the term,, Indian Constitution: Sources and		L1, L2
	constitution incaring of the term, indian constitution. Sources and constitutional history, Features: Citizenship, Preamble, Fundamental Rights and Duties, Directive Principles of State Policy		
2	Union Government and its Administration	2	
	Structure of the Indian Union: Federalism, Centre- State relationship, President: Role, power and position, PM and Council of ministers, Cabinet and Central Secretariat, Lok Sabha, Rajya Sabha		L1, L2
3	Citizenship	3	L1, L2
	Citizenship at the commencement of the Constitution ,Rights of citizenship of certain persons who have migrated to India from Pakistan, Rights of citizenship of certain migrants to Pakistan , Rights of citizenship of certain persons of Indian origin residing outside India , Persons voluntarily acquiring citizenship of a foreign State not to be citizens, Continuance of the rights of citizenship, Parliament to regulate the right of citizenship by law .		
4	Fundamental Rights	2	L1, L2, L3
	Definition, Laws inconsistent with or in derogation of the fundamental rights, Right to equality, Right to freedom, Right against exploitation, Right to freedom of religion, Cultural and educational Right, Right to constitution Remedies.		
5	The Union	3	L1, L2, L3,
	Executive( President & Vice President) ,General (office of Parliament), Conduct of Business		L4
6	The Union Judiciary	3	L1, L2, L3,
	Establishment and constitution of Supreme Court Salaries		L4
	Total Hours	15

-	-	-	160 * - 240*	4*-6*				
Note :								

1. Internship will be done in institute laboratory in collaboration with industries.

2. Evaluation and assessment will be done as per AICTE guidelines.

**Prerequisite:** Fundamental knowledge of respective programmes

#### **Course Objectives:**

To get industry like exposure in the institute laboratories by carrying out activities / projects. Also design innovative techniques / methods to develop the products.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Apply subjects knowledge in the college laboratories for carrying out projects	L3, L4,L5
2	Developed innovative techniques / methods to develop the products	L3, L4,L5
3	Contribute for the society	L3, L4,L5

#### **Detailed Syllabus:**

Module No.	Topics	Cognitive levels of attainment as per Bloom's Taxonomy
	Program Specific Internship	
1	• Training and certification on emerging technologies in domains	
	offered by Department of Computer Engineering	L3, L4,L5
	<ul> <li>Applying classroom and laboratory knowledge to design, develop and deploy the products</li> </ul>	
	Inter disciplinary Internship	
2	• To explore and understand issues and challenges in the other disciplines (EXTC, ELEX, MECH and CIVIL)	L3, L4,L5
	• Design, develop and deploy cost effective products using multidisciplinary approach	
	Industry Specific Internship	
3	• To explore and understand issues and challenges in industry	
	• Developing solutions for industry specific problems	L3, L4,L5
	• Design , develop and deploy products for startup and SMEs	
	Interpersonal Internship	
	• To develop interpersonal skills such as leadership, marketing	
4	,publicity and corporate ethics and communication	L3, L4,L5
	• To get competence in problem solving , presentation , negotiation skills	
	Social Internship	
5	• Identify and study different real life issues in the society	L3, L4,L5
	• Identify societal problems and provide engineering solutions to solve these problems	L3, L4,L3
	Academic Internship	
	• Study report preparation, preparation of presentations, copy table book preparation , business proposal and IPR	
	• Capture aspirations & expectations through interviews of students.	
	• Ways to connect research in technical institutes with industry.	L3, L4,L5
6	• Taking inputs from self, local stakeholders and global stake holders which will help to develop process with comparative and competitive study.

# **Detailed Syllabus:**

Module No.	Topics	Cognitive level attainment as per revised Bloom's Taxo nomy
1	Introduction to the Internet	L1,
	The World Wide Web, Web Browsers, Uniform Resource Locators, WWW Architecture – SMTP – POP3 – File Transfer Protocol The Hypertext Transfer Protocol, HTTP request – response — Generation of dynamic web pages- W3C Validator, How web works - Setting up the environment (LAMP/XAMP/WAMP server)	L2
2	HTML/XHTML	L1, L2, L3,
	Basics of HTML, formatting and fonts, commenting code, color, hyperlink, lists, tables Images, forms, XHTML, Meta tags, Character entities, frames and frame sets, Browser architecture and Web site structure. Overview and features of HTML5, Syntactic Differences between HTML and XHTML	L4
3	Introduction to Cascading Style Sheets	L1, L2, L3,
	Cascading Style Sheets: Levels of Style Sheets - Style Specification Formats, Selector Forms, Property-Value Forms, Font Properties, List Properties, Alignment of Text, Color, The Box Model, Background Images, The span and div Tags.	L4
4	Introduction to JavaScript	L1, L2, L3, L4,
	Introduction: client-side scripting-First program: Displaying a Line of Text-JavaScript Alert-Dynamic Page-Web Application-Variables in JavaScript-Data Types in JavaScript-Operators and Expressions-Simple If Statement- If Else Statement- Nested If Else Statement-Switch Case-For Loop-While Loop-Functions-Events-Arrays- Objects –Math and Date in JavaScript-Redirect to Another HTML Page	L5
5	Introduction to Data Interchange Formats	L1, L2, L3,
	XML: The Syntax of XML, XML Document Structure, Namespaces, XML Schemas, Displaying Raw XML Documents, Displaying XML Documents with CSS, XSLT Style Sheets, XML Applications. JSON(Basics Only): Overview, Syntax, Datatypes, Objects, Schema, Comparison with XML	L4
6	Introduction to PHP and MySQL	L1, L2, L3, L4,
	Basic commands with PHP examples, Connection to server, creating database, selecting a database, listing database, listing table names, creating a table, inserting data, altering tables, queries, deleting database, deleting data and tables, PHP myadmin and database bugs	L5

**<u>Course Objectives:</u>** This course is focused to engage the learner in research by upgrading domain knowledge by participation in technical quiz and debate, critical thinking, innovative idea generation and technical writing.

<b><u>Course Outcomes:</u></b> Upon completion of the course students will be able to:
--

S.N.	Course Outcome	Cognitive level attainment as per revised Bloom Taxonomy
1	Upgrade the knowledge of latest technologies in their discipline in a	L1, L2
	competitive environment.	
2	Create new idea for problem solving related to industry or societal	L1, L2, L3
	issues.	
3	Understand research methodologies.	L1, L2, L3, L4
4	Students will be able to write a technical paper.	L1, L2, L3, L4, L5

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

# **Detailed Syllabus:**

Module No.		Topics	Hrs.	Cognitive level attainment as per revised Bloom Taxonomy
1	Technical	Quiz and Technical Debate	8	L1, L2
	I.	Quiz competition on technical topics from different domains with		
		50 MCQ (Questions will vary according to department).		
	II.	Formation of 8 teams for four topics. 2 teams (For and Against) for		
		topic I will debate first and the other teams will be audience.		
2	Idea gener	ration with design thinking aspects and related literature survey	7	L1, L2, L3
	I.	Introduction to design thinking and its stages.		
	II.	Formation of groups, generation of an idea and conducting literature		
		survey.		
3	Proof of co	oncept and validation of idea through survey	8	L1, L2,
	Seminar o	on Research methodology		L3,L4
	I.	Validate the idea by conducting the survey (through Google docs,		
		interviews or any other suitable method).		
	II.	Seminar on different research methods and procedures for		
		8designing and conducting scientific research.		
4		iting skills (Seminar/workshop)	7	L1, L2,
		tation of Selected Idea and its validation		L3,L4,L5
	I.	Seminar or workshop on paper writing skills.		
	II.	Write a research paper on idea generated.		
		Total Hours	30

Prerequisite: Computer Networks

**<u>Course Objectives:</u>** The objective of the course is to introduce classical encryption techniques to explore the working principles and utilities of various cryptographic algorithms, the design issues of various authentication protocols and to build programs for secure communication.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Illustrating various system security goals and concepts, classical encryption techniques and acquire fundamental knowledge on the concepts of modular arithmetic and number theory.	L1, L2, L3, L4
2	Illustrate and apply different encryption and decryption techniques to solve problems related to confidentiality and authentication	L1, L2, L3, L4
3	Evaluate the knowledge of cryptographic checksums and performance of different message digest algorithms for verifying the integrity of varying message sizes.	L1, L2, L3, L4
4	Analyze different digital signature algorithms to achieve authentication and design secure applications	L1, L2, L3, L4
5	Analyze different attacks on networks and evaluate the performance of firewalls and security protocols like SSL, IPSec, and PGP.	L1, L2, L3, L4
6	Analyze and apply system security concept to recognize malicious code.	L1, L2, L3, L4

# **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction & Number Theory		
	Security Goals, Services, Mechanisms and attacks, Classical Encryption techniques, Symmetric cipher model, mono-alphabetic and polyalphabetic substitution techniques: Vigenere cipher, Playfair cipher, transpositiontechniques: keyed and keyless transposition ciphers, steganography. Modular Arithmetic and Number Theory, Euclid's algorithm-–Prime numbers-Fermat's and Euler's theorem	8	L1, L2, L3, L4
2	Symmetric and Asymmetric key Cryptography and key Management		
	Block cipher principles, block cipher modes of operation, DES, Double DES, Triple DES, Advanced Encryption Standard (AES), Stream Ciphers: RC5 algorithm. Public key cryptography: Principles of public key cryptosystems-The RSA algorithm, The knapsack algorithm, Diffie Hellman Key exchange algorithm.	11	L1, L2, L3, L4
3	Hashes, Message Digests and Digital Certificates		L1, L2, L3,
	Cryptographic hash functions, Properties of secure hash function, MD5, SHA-1, MAC, HMAC, and CMAC. Digital Certificate: X.509, PKI	4	L4
4	Authentication Protocols & Digital signature schemes		
	User Authentication and Entity Authentication, One-way and mutual authentication schemes, Needham Schroeder Authentication protocol, Kerberos Authentication protocol. Digital Signature Schemes – RSA schemes.	6	L1, L2, L3, L4
5	Network Security and Applications		
	Network security basics: TCP/IP vulnerabilities (Layer wise), Packet Sniffing, ARP spoofing, port scanning, IP spoofing, TCP syn flood, DNS Spoofing. Denial of Service: Classic DOS attacks, Source Address spoofing, ICMP flood, SYN flood, UDP flood, Distributed Denial of Service, Defenses against Denial of Service Attacks. Internet Security Protocols: SSL, IPSEC, Secure Email: PGP, Firewalls, IDS and types, Honey pots	10	L1, L2, L3, L4
6	System Security		
	Software Vulnerabilities: Buffer Overflow, Format string, cross-site scripting, SQL injection, Malware: Viruses, Worms, Trojans, Logic Bomb, Bots, Rootkits.	6	L1, L2, L3, L4
	Total Hours	45

**Course Objective:** The Objective of this course is to compare the role and functioning of various system programs over application program, understand the role of various system programs from program development to program execution and design of Assemblers, Macro processor, Linker, Loader, Compiler.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Identify and use of various System and Application software for program development.	L1, L2, L3
2	Design and develop Assemblers and Macro processors.	L1, L2, L3
3	List various functions of loader and describe various loading scheme.	L1, L2
4	Illustrate the working of compiler and design and develop hand written and automatic lexical analyzer.	L1, L2, L3
5	Apply various parsing techniques to design new language structures with the help of grammars.	L1, L2, L3
6	Apply code optimization techniques to optimize intermediate code and generate target machine code.	L1,L2,L3

#### **Detailed Syllabus**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Overview of System Software		· · · · · · · · · · · · · · · · · · ·
	Introduction to System Software with examples, Software Hierarchy,		
	Differentiate between system software and application software.	4	L1, L2, L3
	Introduction to Language Processors: Compiler, Assembler, Interpreter.		
2	Assemblers and Macro Processors		
	Assemblers: Elements of Assembly Language Programming, Basic		
	Assembler functions, Design of the Assembler, Types of Assemblers, Two	10	L1,L2, L3
	pass assembler – IBM 360/370, Format of databases, Algorithm ,Single pass		
	Assembler for Intel x86.		
	Macro Processors: Macros, Basic Functions of Macro Processor, Features		
	of Macro Facility, Design of Two pass Macro Processor, Format of		
	Databases and Algorithm.		
3	Linkers and Loaders	-	
	Linkers: Introduction, Relocation of Linking Concept, Design of a Linker.		
	Loaders: Loader and Function of Loader, Loader schemes, Design of Direct	5	L1,L2
	linking loader.		
4	Introduction to Compilers and Lexical Analysis	-	
	Introduction to Compilers: Design issues, passes, phases.		
	Lexical Analysis: The Role of a Lexical analyzer, Input buffering,	4	L1, L2,L3
	specification and recognition of tokens, Automatic construction of lexical		
	analyzer using LEX		
5	Parsing		
	Syntax Analysis: The Role of Parser, Top down parsing- Predictive parsers		
	(LL), Bottom Up parsing - Operator precedence parsing, SLR, LR (1), LALR,	12	L1, L2, L3
	automatic construction of parsers using YACC.		
	Introduction to Semantic Analysis: Need of semantic analysis, type		
	checking and type conversion		
6	Compilers: Synthesis Phase		
	Syntax Directed Translation and Intermediate Code Generation:		
	Attribute grammar, S and L attributed grammar, bottom up and top down	10	L1, L2,L3
	evaluations of S and L attributed grammar, Intermediate code – need, Types		
	of Intermediate codes, and Implementation of Three address codes.		
	<b>Code Optimization:</b> Need and sources of optimization, Code optimization		
	techniques: Machine Dependent and Machine Independent.		
	Code Generation: Issues in the design of code generator, code generation		
	algorithm. Basic block and flow graph.		
	Total Hours	45

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Fundamental of Algorithms		
	Introduction- 08 Complexity-complexity of recursive algorithms, finding		
	complexity by tree method, master method, proving technique (contradiction, mathematical induction).	8	L1, L2
2	Probabilistic Analysis and Randomized Algorithm	8	L1,L2
	The hiring problem Indicator random variables Randomized algorithms Probabilistic analysis .		
3	Maximum Flow	8	L1,L2
	Flow networks , the ford Fulkerson method ,max bipartite 08 matching , push Relabel Algorithm , The relabel to front algorithm.		
4	Advanced Data Structure		
	Introduction to trees and heap Red-Black Trees: properties of red-black trees, Operations on Red-black trees Binomial Heaps: Binomial trees and binomial heaps, Operation on Binomial heaps Analysis of all above operations	12	L1, L2,L3
5	Computational Geometry	5	L1, L2, L3
	Line Segment properties, Determining whether any pair of segment intersects, finding the convex hull, Finding the closest pair of points.		
6	NP Completeness	4	L1, L2, L3,L4
	NP-Completeness: NP-Completeness and reducibility, NP- 08 Completeness proofs, NP-Complete problems-The vertexcover problem, The travelling salesman problem		
	Total Hours	45

ESE: End Semester Examination - Paper Duration - 3 Hours									

completion of practical (40%) and Attendance / Learning Attitude (20%)

Prerequisite: Basics of programming, Basics of Networks

Course Objective: To understand different Internet Technologies and to learn java-specific web services architecture.

### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand and Use HTML5 and CSS3	L1, L2,L3
2	Comprehend Client side programming	L1, L2, L3
3	Implement server side scripting	L1,L2, L3
4	Understand the main concepts of PHP	L1,L2,L3
5	Explain why XML is used and describe its syntax	L1, L2, L3
6	Explain the basics of AJAX and Web Services	L1, L2,L3,L4

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	WEB ESSENTIALS		
	Clients, Servers and Communication-The Internet-Basic Internet protocols-World wide web-HTTP Request/Response Message-Web Clients/Servers-HTML5-Tables-Lists-Images-HTML5:control elements-Semantic elements -Drag and Drop -Audio -Video controls -		L1, L2,L3
	CSS3-Inline, embedded and external style sheets-Rule cascading- Inheritance-Backgrounds-Border Images-Colors-Shadows-Text- Transformations-Transitions- Animations.	6	
2	CLIENT SIDE PROGRAMMING		
	Java Script: An introduction to JavaScript–JavaScript DOM Model- Date and Objects,-Regular Expressions- Exception Handling- Validation-Built-in objects-Event Handling- DHTML with JavaScript- JSON introduction – Syntax – Function Files – Http Request – SQL.	8	L1, L2, L3
3	SERVER SIDE PROGRAMMING		
	Servlets: Java Servlet Architecture- Servlet Life Cycle- Form GET and POST actions- Session Handling- Understanding Cookies- Installing and Configuring Apache Tomcat Web Server- DATABASE CONNECTIVITY: JDBC perspectives, JDBC program example – JSP: Understanding Java Server Pages-JSP Standard Tag Library (JSTL)-Creating HTML forms by embedding JSP code.	8	L1,L2, L3
4	РНР		
	An introduction to PHP: PHP- Using PHP- Variables- Program control- Built-in functions- Form Validation- Regular Expressions – File handling – Cookies – Connecting to Database.	8	L1,L2,L3
5	XML		
	XML: Basic XML- Document Type Definition- XML Schema DOM and Presenting XML, XML Parsers and Validation, XSL and XSLT Transformation, News Feed (RSS and ATOM).	7	L1, L2, L3
6	INTRODUCTION TO AJAX and WEB SERVICES		
	AJAX: Ajax Client Server Architecture-XML Http Request Object- Call Back Methods; Web Services: Introduction- Java web services Basics – Creating, Publishing, Testing and Describing a Web services (WSDL)-Consuming a web service, Database Driven web service from an application –SOAP.	8	L1, L2,L3,L4
	Total Hours	45

**Course Objective:** The course should be able to introduce methods and theory for development of data warehouses and data analysis using data mining and familiarize students with pre-processing of data, modelling and design of data warehouses, algorithms for classification, clustering and association rule analysis.

### Course Outcomes: Upon completion of the course students will be able to

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand fundamentals of Data warehouse and Dimensional modelling	L1, L2, L3, L4
2	Design data warehouse with dimensional modelling and apply OLAP operations	L1, L2, L3, L4, L5
3	Apply appropriate data mining algorithms to solve real world problems	L1, L2, L3, L4, L5
4	Compare and evaluate different data mining techniques like classification, prediction and clustering	L1, L2, L3, L4, L5
5	Apply association rule mining technique on large dataset	L1, L2, L3, L4, L5
6	Describe complex data types with respect to spatial and web mining	L1, L2, L3

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Data Warehouse and Dimensional modelling		
	Introduction to Strategic Information, Need for Strategic Information, Features of Data Warehouse, Data warehouses versus Data Marts, Top-down versus Bottom-up approach. Data warehouse architecture, metadata, E-R modelling versus Dimensional Modelling, Information Package Diagram, STAR schema, STAR schema keys, Snowflake Schema, Fact Constellation Schema, Factless Fact tables, Update to the dimension tables, Aggregate fact tables	8	L1, L2, L3, L4
2	ETL Process and OLAP		
	Major steps in ETL process, Data extraction: Techniques, Data transformation: Basic tasks, Major transformation types, Data Loading: Applying Data, OLTP Vs OLAP, OLAP definition, Dimensional Analysis, Hypercubes, OLAP operations: Drill down, Roll up, Slice, Dice and Rotation, OLAP models : MOLAP, ROLAP, HOLAP	6	L1, L2, L3, L4, L5
3	Introduction to Data Mining, Data Exploration and Preprocessing		
	Data Mining Task Primitives, Architecture, Techniques, KDD process, Issues in Data Mining, Applications of Data Mining, Data Exploration :Types of Attributes, Statistical Description of Data, Data Visualization, Data Preprocessing: Cleaning, Integration, Reduction: Attribute subset selection, Histograms, Clustering and Sampling, Data Transformation & Data Discretization: Normalization, Binning, Concept hierarchy generation, Concept Description: Attribute oriented Induction for Data Characterization.	9	L1, L2, L3, L4, L5
4	<b>Classification, Prediction and Clustering</b>		
	Basic Concepts, Decision Tree using Information Gain, Induction: Attribute Selection Measures, Tree pruning, Bayesian Classification: Naive Bayes, Classifier Rule - Based Classification: Using IFTHEN Rules for classification, Prediction: Simple linear regression, Multiple linear regression Model Evaluation & Selection: Accuracy and Error measures, Holdout, Random Sampling, Cross Validation, Bootstrap, Clustering: Distance Measures, Partitioning Methods (k-Means, k-Medoids), Hierarchical Methods(Agglomerative, Divisive)	12	L1, L2, L3, L4, L5
5	Mining Frequent Patterns and Association Rules		
	Market Basket Analysis, Frequent Item sets, Closed Item sets, and Association Rule, Frequent Pattern Mining, Efficient and Scalable Frequent Item set Mining Methods: Apriori Algorithm, Association Rule Generation, Improving the Efficiency of Apriori, FP growth, Mining frequent Item sets using Vertical Data Format, Introduction to Mining Multilevel Association Rules and Multidimensional Association Rules	6	L1, L2, L3, L4, L5
6	Spatial and Web Mining		
	Spatial Data, Spatial Vs. Classical Data Mining, Spatial Data Structures, Mining Spatial Association and Co-location Patterns, Spatial Clustering Techniques: CLARANS Extension, Web Mining: Web Content Mining, Web Structure Mining, Web Usage mining, Applications of Web Mining	4	L1, L2, L3
		45	4
	Total Hours	45

**<u>Course Objective</u>**: The objective of this course is to understand the basic concept of DT Signal, perform signal manipulation, Compute Convolution and Correlation operations and illustrate DFT and FFT algorithms

### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No	Course Outcome	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the concept of DT Signal and perform signal manipulation.	L1, L2, L3, L4, L5
2	Analyze the DT system in time domain.	L1, L2, L3, L4
3	Evaluate DTFT and DFT of signals in time domain.	L1, L2, L3, L4, L5
4	Develop and sketch FFT flow-graph.	L1, L2, L3, L4, L5
5	Evaluate Fast DSP Algorithms.	L1, L2, L3, L4, L5
6	Understand the concept of digital filters	L1, L2

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
	Discrete Time Signal		
	Introduction to Digital Signal Processing, Discrete Time Signals, Continuous Signals, Sampling and Reconstruction, Standard DT Signals,		
1	Concept of Digital Frequency, Representation of DT signal using Standard DT Signals, Mathematical Operations on Signal (shifting, addition, subtraction, multiplication), Classification of Signals, Linear Convolution	12	
	formulation (without mathematical proof), Circular Convolution formulation (without mathematical proof), Matrix Representation of Circular Convolution, Linear by Circular Convolution. Auto and Cross Correlation formula evaluation.		L1, L2, L3, L4, L5

	Discrete Time System		
	Introduction to Discrete Time System, Classification of DT Systems		
2	(Linear/Non Linear, Causal/Non Causal, Time Invariant/Time Variant		
2	Systems, Stable/ Unstable), BIBO Time Domain Stability Criteria. LTI		
	system, Concept of Impulse Response and Step Response		
		8	L1, L2, L3, L4
	Discrete Fourier Transform		
	Introduction to DTFT, DFT, Relation between DFT and DTFT, Properties of		
	DFT without mathematical proof (Scaling and Linearity, Periodicity, Time		
3	Shift and Frequency Shift, Time Reversal, Convolution Property and	10	L1, L2, L3, L4,
	Parseval's Energy Theorem). DFT computation using DFT properties.		L1, L2, L3, L4, L5
	Transfer function of DT System in frequency domain using DFT.		LJ
	Linear and Circular Convolution using DFT, Introduction to 2-D DFT		
	Fast Fourier Transform		
4	Radix-2 DIT-FFT algorithm, DIT-FFT Flowgraph for N=4, 6 & 8, Inverse 06	8	L1, L2, L3, L4,
-	FFT algorithm. Spectral Analysis using FFT, Comparison of complex and	0	L5
	real, multiplication and additions of DFT and FFT.		
	DSP Algorithms		L1, L2, L3, L4,
5	Fast Circular Convolution Algorithm, Fast Linear Convolution Algorithm,	6	L5
	Convolution of long sequences (Overlap Add and Overlap Save Method)		
	Digital Filters and Applications of DSP		
6	Introduction to digital Filters, Concept of IIR filter and FIR filter, Case	4	
0	study of Real Time DSP applications to Speech Signal Processing and	-	1112
	Biomedical Signal Processing.		L1, L2
	Total Hours	<b>48</b>

Course Objective: The Objective of this course is to introduce Soft computing concepts and techniques and foster their abilities in designing appropriate technique for a given scenario.

### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	To introduce the ideas of soft computational techniques based on human experience.	L1, L2
2	To conceptualize fuzzy logic and its implementation for various real world applications.	L1, L2, L3
3	To generate an ability to design, analyze and perform experiments on real life problems using various Neural Learning Algorithms.	L1, L2, L3, L4
4	To provide the mathematical background to carry out optimization using Genetic Algorithms.	L1, L2, L3
5	To introduce hybrid Soft Computing techniques.	L1, L2
6	To introduce advanced Soft Computing techniques.	L1, L2

# 

DEPARTMENT OF COMPUTER ENGINEERING (COMP) (Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

### **Detailed Syllabus:**

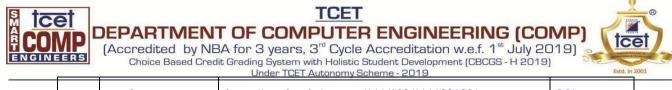

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Soft Computing	3	L1, L2
	What is Soft Computing, Soft Computing vs Hard Computing, Evolution of Soft Computing, Constituents of Soft Computing, Applications		
2	Fuzzy Set Theory	8	L1, L2, L3
	Brief Review of Conventional Set Theory, Introduction to Fuzzy Sets, Properties of Fuzzy Sets, Operations on Fuzzy Sets, Membership Functions. Fuzzy Extension Principle, Fuzzy Relations and rules, Projection and Cylindrical Extension of Fuzzy Relations, Fuzzy Composition, Fuzzification and Defuzzification, Fuzzy Inference System, Types of Fuzzy Models, Applications.		
3	Artificial Neural Networks		L1, L2, L3, L4
	Biological Neurons and their Artificial Models, NN Architecture, Activation Function, Learning Rules. Linearly and Non-Linearly Separable Pattern Classification, Single Layer Perceptron, MultiLayer Perceptron, Multi-layer Feedforward Network, Back-propagation Training, ART, SOM, Application of ANN to solve Real Life problems.	14	
4	Genetic Algorithm	8	L1, L2, L3
	Biological Background, basic terminologies, simple genetic algorithm, operators in Genetic Algorithm, Types of encoding, crossover, selection, mutation, etc., Fitness function, Convergence, Problem solving using Genetic Algorithm		
4	Hybrid Systems		L1, L2, L3
	Sequential, Auxillary and Hybrid Systems Neuro Fuzzy Hybrid systems, Neuro Genetic Hybrid systems, Fuzzy Genetic Hybrid systems	6	
6	Introduction to Advanced Soft Computing techniques		L1, L2
	Introduction to Deep Learning, Introduction to rough set theory, Introduction to Evolutionary Algorithms	6	
	Total Hours	45

Prerequ	isite: Marke	ting Fundamer	ntals, Digital	Assets, Digi	tal Syster	n Setup a	nd automation			

**Course Objective:** The course will transform you into a complete digital marketer with expertise in the top eight digital marketing domains — search engine optimization, social media, pay-per-click, conversion optimization, digital analytics, content, mobile, and email marketing. Fast-track your career in digital marketing today with practical training you can apply on the job.

### <u>Course Outcomes:</u> Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand Digital Business Models	L1,L2
2	Understand A.I. and machine learning terminologies, mind-set and its application in marketing	L1,L2
3	Build sophisticated machine learning models – learn how to gather and clean data, select an algorithm, train, evaluate and deploy a model	L1,L2
4	Predict churn, sales or score leads with tools	L1,L2,L5
5	Segment customers; build clustering models to drive personalization.	L1,L2,L5,L6
6	Build computer vision models for social visual listening, use natural language processing to predict consumption preferences.	L2,L5

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction - Digital Marketing	7	L1,L2
	Digital Marketing Skills empowered by AI :SEO, Search Engine		
	Marketing, Social Media Marketing, Web Analytics, Email		
	Marketing, Content Marketing, Influencer Marketing, Conversion		
	Rate Optimization, Tools Based Marketing, Lifecycle Marketing		
	Automation. Psychographic-segmentation		
2	Full Funnel Marketing	8	L1,L2,L3
-	Acquisition: Content marketing, landing page testing, campaign	0	21,22,20
	optimization, conversion rate optimization, lead scoring,		
	competition and trend analysis, predict sales, optimize product		
	pricing, programmatic media buying, segmentation and		
	clustering for targeting, personalization.		
	Activation		
	Personalization, , behavioral		
	segmentation Psychographic-		
	segmentation		
	Retention		
	Predict churn, customer care chatbot, sentiment analysis, visual social listening, personalization		
	Revenue		
	Predict and maximize customer lifetime value,		
	recommendersystems, market basket analysis		
	Referral		
	Predict whether user recommend your product		
3	Marketing framework and tools	8	L1,L2,L3,L5
	Planning:Hubspot, Brightedge, Node, Crayon, Equals3,		
	Marketmuse, Pathmatics, Calibermind, Alegion, Netra		
	<b>Production</b> : Acrolinx, Narrative Science, Clarifai,		
	GumGum, phrasee, curate Attention insight

# **Course Objective:**

The objective of the course is to introduce to the students about the integration people involved in the software process with the development and tools required for automation of the project development.

### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the importance of process automation and models of software process	L1, L2
2	Analyze the security and configuration management	L1, L2, L3,L4
3	Understand and apply the build concepts using a build tool	L1, L2, L3,L4
4	Understand the testing concepts and applythem to the project	L1, L2, L3,L4
5	Identify the activities in agile project management and use a tool for the same	L1, L2, L3,L4
6	Understand and identify the various principles of quality assurance	L1, L2, L3,L4

# **Detailed Syllabus:**

Modu le No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to process Automation	6	L1, L2
	Importance of process automation, types of models, prescriptive and descriptive		
	models, Devops model, process modelling objectives and goals		
2	Automation of config management	8	L1, L2, L3,L4
	Overview of configuration management, Github and git tool		
3	Build automation	4	L1, L2, L3,L4
	Overview of build management, Jenkins tool for build management		
4	Test automation	8	L1, L2, L3,L4
	Overview of testing concepts, test cases, selenium tool		
5	Project management	8	L1, L2, L3,L4
	Project management concepts, agile team, Atlasian jira project management tool		
6	Quality management	11	L1, L2, L3,L4
	Quality concepts and metrics, CMMI, ISO, spice, six sigma, Total Quality management		
	Total Hours	45

### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to

FRS

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Recognize an overview of basic entrepreneurship concepts	L1, L2
2	Design a business plan and understand importance of capital	L1, L2, L3, L4, L5, L6
3	Discuss the rules and legislation w.r.t. entrepreneurship	L1, L2
4	Identify sources for organizational assistance in this field	L1, L2
5	Use knowledge gained for effective management of business	L1, L2, L3
6	Recognize ways of achieving success in business	L1, L2

tce

Estd. in 2001

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
	Overview of Entrepreneurship Definition, Importance, Roles and Functions, Evolution of term		
1	'Entrepreneurship', Factors influencing Entrepreneurship, Characteristics of an Entrepreneur, of Types of Entrepreneur, Contribution of Government Agencies in Sourcing information for Entrepreneurship, Role of Entrepreneurship in the National Economy	5	L1, L2
	Business Plans and importance of capital to Entrepreneurship		
2	Preliminary and Marketing Plans, Management and Personnel, Start-up Costs and Financing as well as Projected Financial Statements, Legal Section, Insurance, Suppliers and Risks, Assumptions and Conclusion, Capital and its Importance to the Entrepreneur Entrepreneurship And Business Development: Starting a New Business, Buying an Existing Business, New Product Development, Business Growth and the Entrepreneur Law and its Relevance to Business Operations	10	L1, L2, L3, L4, L5, L6
	Rules and Legislation		
3	Applicability of Legislation, Industries Development (Regulations) Act, 1951, Factories Act, 1948, The Industrial Employment (Standing Orders) Act, 1946, West Bengal Shops and Establishment Act, 1963, Environment (Protection) Act, 1986, The sale of Goods Act, 1950, Industrial Dispute Act 1947	6	L1, L2
	Organization Assistance		
4	Assistance to an entrepreneur, New Ventures, Industrial Park (Meaning, features, & examples), Special Economic Zone (Meaning, features & examples), Financial assistance by different agencies, MSME Act Small Scale Industries, Carry on Business (COB) license, Environmental Clearance, National Small Industries Corporation (NSIC), Government Stores Purchase scheme (e-tender process), Excise exemptions and concession, Exemption from income tax, Quality Standards with special reference to ISO, Financial assistance to MSME, Modernization assistance to small scale unit, The Small Industries Development Bank of India (SIDBI), The State Small Industries Development Corporation (SSIDC), Export oriented units, Shilpabandhu-M Incentives for entrepreneurs, Other agencies for industrial assistance, Directorate General of Supplies and Disposals(DGS & D), Khadi and Village Industries Commission (KVIC), Industrial Estate	11	L1, L2
	Effective Management of Business		
5	Issues and problems faced by micro and small enterprises and effective management of M and S enterprises (risk management, credit availability, technology innovation, supply chain management, linkage with large industries), exercises, e-Marketing Women Entrepreneurship Development, Social entrepreneurship-role and need, EDP cell, role of sustainability and sustainable development for SMEs, case studies, exercises	8	L1, L2, L3
	Achieving success in small business		
6	Stages of the small business life cycle, four types of firm-level growth strategies, Options – harvesting or closing small business Critical Success factors of small business	5	L1, L2
	Total Hours	45

of practical (40%) and Attendance / Learning Attitude (20%)

Prerequisite: Cryptography and Network Security

**<u>Course Objective</u>**: The course intends to deliver the fundamental knowledge to understand concepts of cyber law, intellectual property, cybercrimes, trademarks, domain theft, tools used in cyber security and analyze security policies, protocols applied in Indian IT Act 2008, security standards compliances.

### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the concept of cybercrime and its effect on outside world	L1
2	Interpret and apply IT law in various legal issues, Analyse security challenges and issues	L1, L2, L3, L4
3	Understand and analyse various attack using tools like wire shark, key logger etc.	L1
4	Distinguish different aspects of cyber law	L1, L2, L3, L4
5	Study India IT Act and analyse different case studies	L1, L2, L3, L4
6	Apply Information Security Standards compliance during software design and development	L1, L2, L3, L4

TCET DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>th</sup> Cycle Accreditation w.e.f. 1<sup>th</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 20<sup>-2</sup>) Under TCET Autonomy Sphere - 2019

Module No	Topics	Hrs	Cognitive levels of attainment as per Bloom's Taxonomy
	Introduction to Cybercrime		
1	Introduction to Cybercrime: Cybercrime definition and origins of the world,Cybercrime and information security, Classifications of cybercrime, Cybercrime and the Indian ITA 2000, A global Perspective on cybercrimes	06	Ll
	Symmetric and Asymmetric Cryptography		
2	Introduction to symmetric cryptography, Substitution cipher, transposition cipher, stream and block cipher, and arithmetic modes for block ciphers, Introduction to asymmetric cryptography Primes, factorization, Fermat's little theorem, Euler's theorem, and extended Euclidean algorithm, RSA, attacks on RSA, Diffie Hellman key exchange, Message integrity, message authentication, MAC, hash function, H MAC	08	L1, L2, L3, L4
	Cyber offenses & Cybercrime		
3	Cyber offenses & Cybercrime: How criminal plan the attacks, Social Engg, Cyber stalking, Cyber café and Cybercrimes, Bot nets, Attack vector, Cloud computing, Proliferation of Mobile and Wireless Devices, Trends in Mobility, Credit Card Frauds in Mobile and Wireless Computing Era, Security Challenges Posed by Mobile Devices, Registry Settings for Mobile Devices, Authentication Service Security, Attacks on Mobile/Cell Phones, Mobile Devices: Security Implications for Organizations, Organizational Measures for Handling Mobile, Devices- Related Security Issues, Organizational Security Policies and Measures in Mobile Computing Era, Laptops	09	L1
	Tools and Methods Used in Cyber line		
4	Phishing, Password Cracking, Key loggers and Spywares, Virus and Worms, Steganography, DoS and DDoS Attacks, SQL Injection, Buffer Over Flow, Attacks on Wireless Networks, Phishing, Identity Theft (ID Theft)	08	L1, L2, L3, L4
	The Concept of Cyberspace		
5	E-Commerce, The Contract Aspects in Cyber Law ,The Security Aspect of Cyber Law ,The Intellectual Property Aspect in Cyber Law , The Evidence Aspect in Cyber Law , The Criminal Aspect in Cyber Law, Global Trends in Cyber Law , Legal Framework for Electronic Data Interchange Law Relating to Electronic Banking , The Need for an Indian Cyber Law	08	L1, L2, L3, L4
	Indian IT Act.		
6	Cyber Crime and Criminal Justice: Penalties, Adjudication and Appeals Under the IT Act, 2000, IT Act. 2008 and its Amendments	06	L1, L2, L3, L4
	Total Hours	45	

TCET DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>nd</sup> Cycle Accreditation w.e.f. 1<sup>nd</sup> July 2019] Choice Based Credit Greding System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Spheme - 2019

IA: In-Semester Assessment- Paper Duration-1 .5 Hours									
ESE : End Semester Examination - Paper Duration - 3 Hours									
The	weightage of		ontinuous e			-	Formative (40%), T	imelycompletion	

of practical (40%) and Attendance (20%)

Prerequisite: Product Design and Development, Quality and Reliability Engineering

### **Course Objectives:**

Course intend to provide an exposure to new product development program and guidelines for designing and developing a product and apply the knowledge of Product Data Management & PLM strategies.

### **Course Outcomes:**

SN	Course Outcomes	Cognitive levels as per bloom's Taxonomy
1	Illustrate knowledge about phases of PLM, PLM strategies and methodology forPLM feasibility study and PDM implementation	L1, L2
2	Illustrate various approaches and techniques for designing and developingproducts.	L1
3	Apply product engineering guidelines / thumb rules in designing productsfor moulding, machining, sheet metal working etc	L1, L2, L3, L4
4	Acquire knowledge in applying virtual product development tools for components, machining and manufacturing plant	L1, L2, L3, L4
5	Apply Integration of Environmental Aspects in Product Design	L1, L2, L3, L4
6.	Illustrate knowledge about Life Cycle Assessment and Life Cycle Cost Analysis	L1, L2

TCET DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>th</sup> Cycle Accreditation w.e.f. 1<sup>th</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 20<sup>-2</sup>) Under TCET Autonomy Scheme - 2019

Module No.	Topics	Hrs.	Cognitive levels as per bloom's Taxonomy
	Introduction to Product Lifecycle Management (PLM) and PLM Strategies		
1	Product Lifecycle Management (PLM), Need for PLM, Product Lifecycle Phases, Opportunities of Globalization, Pre-PLM Environment, PLM Paradigm, Importance & Benefits of PLM, Widespread Impact of PLM, Focus and Application, A PLM Project, Starting the PLM Initiative, PLM Applications, Industrial strategies,		L1, L2
	Strategy elements, its identification, selection and implementation, Developing PLM Vision and PLM Strategy, Change management for PLM	10	
	Product Design		
2	Product Design: Product Design and Development Process, Engineering Design, Organization and Decomposition in Product Design, Typologies of Design Process Models, Reference Model, Product Design in the Context of the Product Development Process, Relation with the Development Process Planning Phase, Relation with the Post design Planning Phase, Methodological Evolution in Product Design, Concurrent Engineering, Characteristic Features of Concurrent Engineering, Concurrent Engineering and Life Cycle Approach, New Product Development (NPD) and Strategies, Product Configuration and Variant Management, The Design for X System, Objective Properties and Design for X Tools, Choice of Design for X Tools and Their Use in the Design Process	9	LI
	Product Data Management (PDM)		
3	Product Data Management (PDM):Product and Product Data, PDM systems and importance, Components of PDM, Reason for implementing a PDM system, financial justification of PDM, barriers to PDM implementation	5	L1, L2, L3, L4
	Virtual Product Development Tools		
4	Virtual Product Development Tools: For components, machines, and manufacturing plants, 3D CAD systems and realistic rendering techniques, Digital mock-up, Model building, Model analysis, Modeling and simulations in Product Design, Examples/Case studies	5	L1, L2, L3, L4
	Integration of Environmental Aspects in Product Design		
5	Integration of Environmental Aspects in Product Design: Sustainable Development, Design for Environment, Need for Life Cycle Environmental Strategies, Useful Life Extension Strategies,End-of-Life Strategies, Introduction of Environmental Strategies into the Design Process, Life Cycle	5	L1, L2, L3, L4
	Environmental Strategies and Considerations for Product Design		
	Life Cycle Assessment and Life Cycle Cost Analysis		

Icet         COMP         Comp         Endities         Department of competition with Holistic Student Development (CBCGS - H 2019)         Concentration of the competition o								
6	Life Cycle Assessment and Life Cycle Cost Analysis: Properties, and Framework of Life Cycle Assessment, Phases of LCA in ISO Standards, Fields of Application and Limitations of Life Cycle Assessment, Cost Analysis and the Life Cycle Approach, General Framework for LCCA, Evolution of Models for Product Life Cycle Cost Analysis. Introduction to Industry4.0, Design principles and Challenges, Applications of Industry 4.0	5	L1, L2

**Total weightage of marks for continuous evaluation of Term work/Report:** Formative (40%), Timely Completion of Practical (40%) and Attendance/ Learning Attitude (20%)

Prerequisite: History, Value Education, Moral Science

**Course Objective:** The course aims at imparting basic principles of thought process, reasoning and inferencing with focus on sustainability as the core of Indian Traditional knowledge Systems connecting society and nature. It also focuses on Holistic life style of yogic science and wisdom important in modern society with rapid technological advancements and societal disruptions with an introduction to Indian Knowledge Systems, Indian philosophical traditions, Indian perspective of modern scientific world-view, and basic principles of Yoga and holistic health care system.

### **<u>Course Outcomes:</u>** Upon completion of the course student will be able to:

S.No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Develop knowledge of trade and commerce in classical and medieval India.	L1, L2
2	Correlate the understanding of Indian Knowledge System with modern Science.	L1, L2, L3
3	Develop the knowledge of Ancient Indian science and technology and India's contribution to the world.	L1, L2
4	Know and analyse the effects of colonization on Indian culture and civilization.	L1, L2, L3,L4
5	Understand the role and position of women in traditional and modern Indian society	L1, L2
6	Develop the knowledge of Globalization and growth of India Economy since Independence.	L1, L2, L3, L4

#### TCET DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3" Cycle Accreditation w.e.f. 1" July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2013) Under "CET Autonomy Scheme - 2019

Module No.	Topics	Hrs	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction		L1, L2
	Ancient India —— Classical India – Dharma as the bedrock of Indian society – Trade and commerce in classical and medieval India and the story of Indian supremacy in the Indian ocean region;	2	
2	Basic structure of Indian Knowledge System		L1, L2
	The vedas, the vedic society and the Sanatana Dharma, classical sanskrit literature – Modern Science and Indian Knowledge System -Yoga and Holistic Health care Indian Philosophy – the orthodox (Vaidika) and the heterodox (atheistic) schools; Ramayana and Mahabharata; Bhagavad Gita;	3	
3	India's contribution to the world: spirituality, philosophy and Sciences		L1, L2, L3
	Saints and sages of India; Ancient Indian medicine: towards an unbiased perspective; Ancient Indian mathematics; Ancient Indian astronomy; Ancient Indian science and technology.	2	
4	Indian economy – before and after colonization:		L1, L2, L3
	What attracted the rest of the world to India?; India on the eve of the arrival of European merchants; The story of colonization and the havoc it wrecked on Indian culture and civilization; Macaulay and the start of the distortion of Indian education and history; a brief survey; The emergence of modern India.	3	
5	Women in Indian society		L1, L2, L3
	The role and position of women in Hindu civilization; Gleanings from the Vedas, Brihadarnyaka Upanishad, Saptasati Devi Mahatmyam, Ramayana, Mahabharata, Manusmriti, Kautilya'sArthasastra and Mrichchhakatikam of Sudraka; The role and position of Indian women.	3	
6	Modern India		L1, L2,L3
	The national movement for freedom and social emancipation; Swami Vivekananda, Sri Aurobindo, Rabindranath Tagore; Understanding Mahatma Gandhi; A new nation is born as a republic – the pangs of birth and growth; India since Independence – the saga of socio- political movements; Problems facing the nation today; Globalization and Indian Economy; Bharatavarsha today and the way ahead: Regeneration ofIndian National Resources.	2	
	Total Hrs.	15

**<u>Course Objectives</u>**: This course is focused to engage the learner in research using critical thinking, problem solving, coding and technical writing related to upcoming latest technologies.

S.N.	Course Outcome	Cognitive level attainment as per revised Bloom Taxonomy
1	Upgrade the knowledge of latest technologies and developments in their domain.	L1, L2
	Develop prototype based on idea which providing solutions to industry, research organization, academic organization, community or society as a whole.	L1, L2, L3,L4,15,L6
3	Design and develop the code /model for given problem definition in a Competitive environment and contribute for grants.	L1, L2, L3,L4,I5,L6
4	Write a research paper and understand technical writing.	L1, L2, L3,L4,15

#### **Detailed Syllabus:**

Module No.	Topics	Cognitive level attainment as per revised Bloom Taxonomy
1	Participation in online community / Forums/writing Blogs	L1, L2
	I. Registration on online community/forum/followblogs /Twitter etc.	
	Creating own Blogs and Linked in profile.	
	II. Evaluation is based on report submission on activities learned through	
	registration on various platforms. Student need to submit Linkedin profile	
	address, Blog URL is recommended	
	Presentation and Evaluation	
2	Proto type development/ Mathematical model development based on Idea	L1, L2, L3,L4,15,L6
	I. Proto type development: Introduction to Research Methodology	
	techniques. Introduction and importance of prototype development.	
	Transforming Idea into prototype with implementation/working model.	
	II. Presentations by students, Experience sharing by entrepreneurs or	
	Hackathon Winners.	
3	Presentation and Evaluation	
3	Building Competitive Attitude	L1, L2, L3,L4,l5,L6
	I. Participation in Project competitions/Coding competitions/Working	
	<b>for research grant/Consultancy: a)</b> Participating at institute/National level/University level/ Conference /participate in competitions. <b>b</b> )	
	Participation in funded project/consultancy projects <b>c</b> ) Experience sharing	
	by good coders/winners	
	II. Evaluation based on Presentation/Certificates/ Grant	
	received/Consultancy received Presentation and Evaluation	
4	Research Paper Publication	L1, L2, L3,L4,L5,L6
	I. Introduction to Research paper writing: Write a paper/case studyon	
	review of literature based on idea and developed prototype.	
	II. Publishing: Identification of appropriate journal or conference at	
	University level / State level/National level for submission and Preparation of a review paper.	
	Evaluation of Research paper based on quality and acceptance of research paper.

Prerequi	site: Softwa	re Engineerii	ng							

**Course Objectives:** To understand the importance of software architecture in building effective, efficient & competitive software product by applying principal design decisions governing the system & designing applications from architectural perspective by identifying different functional and non-functional properties of complex software system

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy Levels
1	Understand & gain knowledge of various approaches to document a software system	L1,L2
2	Understand to describe functional and non-functional requirements	L1, L2,L3
3	Apply & use proper architecture for software	L1, L2,L3
4	Analyze & categorize different components used in the software system	L1,L2,L3,L4
5	Identify & evaluate different architectural styles	L1,L2,L3,L4
6	Create & improve quality of software by selecting proper architecture	L1,L2,L3,L4

#### **Detailed Syllabus (Total No. of Hours: 45):**

Mod ule No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Software Architecture and Software Product Life Cycle	7	L1,L2
	Evolution of Software Development, Fundamentals of Software Engineering, Elements of Software Architecture. Management View, Software Engineering View, Engineering Design View, Architectural View		
2	Architectural Design Process and Introduction to Software Design	8	L1, L2,L3
	Understanding the problem, Identifying design elements and their relationship.		
	Evaluating the Architecture, Transforming the Architecture, Problems in Software Architectural Design, Function form and Fabrication, The scope of Design,		
	Psychology and Philosophy of Design, General Methodology of Design		
3	Complexity, Modularity, Models and Knowledge Representation	10	L1, L2,L3
	Complexity, Modularity, What are Models, What are Models used for, What roles		
	do Models Play, Modeling the Problem and Solution Domain, Views		
4	Architecture Representation and Architectural Design Principles	10	L1,L2,L3,
	Goals of Architecture Representation, Foundation of Architectural		L4
	Representation, Architectural Description Language, Architectural Level of		
	Design, Architecting with Design Operators, Functional Design Strategies		
5	Architectural Styles, Patterns and Meta models	5	L1,L2,L3,
-	Defining Architectural Patterns and Style, Common Architectural Styles,	-	L4
	Understanding Metamodels, Applying Reference Models, Fundamental		
	Metamodel for describing Software Component		
6	Architectural Description and Architectural Framework, Architecture Quality	5	L1, L2, L3,L4
	Standardizing Architectural Description, Creating an Architectural		
	Description, Applying Architectural Description, Software Architecture		
	Framework, 4+1 View Model of Architecture, Reference Model for Open		
	Distributed Processing, Importance of Assessing Software Quality, How to		
	improve Quality. DevOps practice and Architecture <b>Total Hours</b>	45	
	I otal Hours	43

**<u>Course Objectives:</u>** To learn concepts of parallel processing as it pertains to parallel computing. To design, develop and analyze parallel programs on high performance computing resources using parallel programming paradigms.

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy Levels
1	Understand & gain knowledge of various Parallel computing, scope of parallel computing	L1,L2
2	Understand to describe System Architectures	L1, L2,L3
3	Apply & use proper Parallel Algorithms	L1, L2,L3
4	Analyze & categorize different Parallel Algorithms & Applications	L1,L2,L3,L4
5	Identify & evaluate different Parallel Programming	L1,L2,L3,L4
6	Create & improve quality of Analytical Modelling of Parallel Programs	L1,L2,L3,L4

#### Detailed Syllabus (Total No. of Hours: 45):

Mod ule No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Parallel Computing	7	L1,L2
	Parallel computing, scope of parallel computing, Abstract model of serial & parallel computation, pipelining, data parallelism, control parallelism, scalability, topologies in processor organization, parallel computing design consideration, parallel algorithms & parallel architectures, applications of parallel computing.		
2	System Architectures	8	L1, L2,L3
	Shared memory multiprocessors( UMA-Uniform memory Access), Distributed memorymultiprocessors( NUMA- Non Uniform memory Access), SIMD, Systolic processor, Cluster computing, Grid computing, Multicore Systems		
3	Parallel Algorithms	7	L1, L2,L3
	Introduction to parallel algorithms, parallel algorithm models, Decomposition Techniques, characteristics of tasks & interactions, mapping techniques for load balancing, methods for containing interaction overheads.		
4	Parallel Algorithms & Applications	10	L1,L2,L3,
	Matrix multiplication, parallel reduction, parallel sorting: bubble, quick sort, Graph algorithm: Minimum spanning tree (prim's algorithm), Fast Fourier transform: serial algorithm, transpose algorithm.		L4
5	Parallel Programming	8	L1,L2,L3,
	Paradigms, parallel programming models, shared memory programming, message passing programming, MPI, PVM, Threads.		L4
6	Analytical Modelling of Parallel Programs		L1, L2, L3,L4
	Sources of overhead in parallel programs, performance metrics for parallel systems, effect of granularity&data mapping on performance, scalability of parallel systems, analysis of parallel programs.	5	
	Total Hours	45

**<u>Course Objective</u>**: The objective of this course is to impart necessary knowledge of the network and its infrastructure furthermore, to develop skills required to build optimal IT infrastructure.

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the complexities of various Challenges in IT infrastructure	L1, L2
2	Apply Network Infrastructure Tools to real life Examples.	L1, L2, L3
3	Demonstrate understanding of the network topologirs	L1, L2,L3
4	Apply and analyze the complexity of the Network and its infrastructure	L1, L2, L3, L4
5	Demonstrate various simulation tools .	L1, L2, L3
6	Discuss applications of IT infrastructure for real life applications	L1, L2

#### Detailed Syllabus (Total No. of Hours: 45):

Module No.	Topics	Hrs ·	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction: Network and IT infrastructure		L1, L2
	Enterprise Network Design: Understanding Network Requirement analysis, Architecture and Design Process Network Architecture: Component Architecture Architectural models: topological, flow model, Functional model Addressing and Routing Architecture, Network Management Architecture, Performance Architecture .Approach Network Structure Model: Hierarchical Network Model, Enterprise wide network Architecture model- Enterprise Edge Area.	5	
2	Wired and Wireless LAN/MAN technologies		L1, L2,L3
	Enterprise LAN Design: Ethernet Design Rule. 100 Mbps Fast Ethernet Design rules, gigabit Ethernet Design Rules, 10 Gigabit Ethernet Design rules, 10GE Media types Understanding Working of Repeater, hub, Bridge, routers, Layer2/3 Switch Campus LAN Design Best Practice Server Farm Design, DMZ design. Campus LAN QoS consideration Multicast Traffic Consideration	6	
3	The Data Center: Design, implementation and management		L1, L2,L3
	Data Center Design: Data Center Design: Technical and economic considerations, Strategic IT infrastructure investment ,TCO of Data Center , Server technologies and architectures Architecture Consideration: Infrastructure Model, Service Layers Model of Cloud computing Architecture Consideration: Telecommunications Infrastructure Standard for Data Centers Telecommunications Infrastructure Standard for Data Centers , Implementation Best Practices Purpose of TIA-942, Data Center Topology Data Center Tiers.Server virtualization: Value proposition and technical challenges	12	
4	Wired and Wireless WAN technologies	10	L1, L2, L3,
	Enterprise Wireless LAN Architecture: Key components of LAN/MAN infrastructure Hierarchical LAN design, Implementation of VLANs in a converged network , understanding 802.11X standards, LWAPP WLAN Controller. WLAN technologies and topologies, Wireless Network Components, WLAN enterprise design, WLAN performance, WLAN monitoring and troubleshooting, LAN/MAN Wireless technologies and Wi-FI: protocols (802.11, WiMAX), WLAN security. Intra and inter controller roaming., Video/Voice over IP		L4
5	SAN and SDN	6	L1, L2, L3
	SAN: Importance of storage Network, Data Protection Storage Network Architecture, Storage Network Backup and Recovery, Storage and Network in Storage Network, Software for Storage Network, Adopting and Managing SAN. Software Defined Network : Introduction and functions of SDN and Open Flow , OpenFlow messages.		
6	Corporate Network Management	6	L1, L2

**Course Objective:** The objective of the course is to understand the technical aspects and life cycle of ERP systems, the steps and activities in ERP, understand tools and methodology used for designing ERP for an Enterprise and to identify and describe different types of ERP system.

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the basic structure of ERP	L1, L2
2	Identify, apply and analyze implementation strategy used for ERP.	L1, L2, L3, L4
3	Apply and analyze design principles for various business modules in ERP.	L1, L2, L3, L4
4	Compare and apply different emerging technologies for implementation of ERP.	L1, L2, L3, L4
5	Analyze security issues in ERP.	L1, L2, L3, L4
6	Acquire ERP concepts for real world applications.	L1, L2, L3, L4

#### **Detailed Syllabus (Total No. of Hours: 45):**

Modu le No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Enterprise Resource Planning (ERP)		
	Information System and Its Components, Value Chain Framework, Organizational Functional Units, Evolution of ERP Systems, Role of ERP in Organization, Three-Tier Architecture of ERP system.	8	L1, L2
2	ERP and Implementation		
	ERP implementation and strategy, Implementation Life cycle, Pre- implementation task, requirement definition, implementation Methodology.	8	L1, L2, L3, L4
3	ERP Business Modules		
	Finance, manufacturing, human resources, quality management, material management, marketing, Sales distribution and service. Case study on Supply Chain management (SCM), Customer relationship Management (CRM)	8	L1, L2, L3, L4
4	Introduction to ERP related Technologies		
	Business Process Re-engineering (BPR) ,Data warehousing ,Data Mining, On- line Analytical Processing(OLAP), Product Life Cycle Management (PLM),Geographical Information Management ,RFID, QR Code ,Bar Coding, E- commerce and their application in Enterprise planning	9	L1, L2, L3, L4
5	Extended ERP and security issues		
	Enterprise application Integration (EAI), open source ERP, cloud ERP Managing ERP Securities: Types of ERP security Issues, System Access security, Data Security and related technology for managing data security	6	L1, L2, L3, L4
6	Cases of ERP for Enterprises.		
	Cases of ERP like MySAP for Business suite implementation at ITC, ERP for Nestle GLOBE Project, Oracle ERP Implementation at Maruti Suzuki. Need of ERP for Small and Medium size enterprises.	6	L1, L2, L3, L4
	Total Hours	45

**<u>Course Objective:</u>** : This course will help to understand the fundamentals of image processing and to apply various processes on images for image understanding.

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Demonstrate fundamental steps in digital image processing	L1, L2
2	Use Histogram Processing Techniques	L1, L2, L3
3	Demonstrate Filtering in the Frequency Domain	L1, L2, L3
4	Make use of Image Compression.	L1, L2, L3, L4
5	Develop Image Restoration and Reconstruction	L1, L2, L3
6	Understand and apply knowledge to Image Segmentation	L1, L2, L3,L4

#### **Detailed Syllabus (Total No. of Hours: 45):**

ł

Module No.	Topics	Lectures	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction and Digital Image Fundamentals	05	L1,L2
	Digital Image Fundamentals, Human visual system, Image as a 2D data, Image representation – Gray scale and Color images, image sampling and quantization		
2	Image enhancement in Spatial domain:	8	L1, L2, L3
	Basic gray level Transformations, Histogram Processing Techniques, Spatial Filtering, Low pass filtering, High pass filtering		
3	Filtering in the Frequency Domain:	4	L1, L2, L3
	C Preliminary Concepts, Extension to functions of two variables, Image Smoothing, Image Sharpening, Homomorphic filtering		
4	Image Restoration and Reconstruction Color Image Processing	8	L1, L2, L3, L4
	Noise Models, Noise Reduction, Inverse Filtering, MMSE (Wiener) Filtering Color Fundamentals, Color Models, Pseudo color image processing		
5	Image Compression and Morphological Image Processing:	12	L1, L2, L3
	Fundamentals of redundancies, Basic Compression Methods: Huffman coding, Arithmetic coding, LZW coding, JPEG Compression standard Erosion, dilation, opening, closing, Basic Morphological Algorithms: 04 08 hole filling, connected components, thinning, skeletons		
6	Image Segmentation and Applications of Image Processing	8	L1, L2, L3
	point, line and edge detection, Thresholding, Regions Based segmentation, Edge linking and boundary detection, Hough transform Application of Image processing in process industries		
	TOTAL HOURS	45

DEPARTMENT OF COMPUTER ENGINEERING (COMP) (Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development [CBCGS - H 2019] Under TCET Autonomy Scheme - 2019

#### **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Neural Network		
	History of Deep Learning, McCulloch Pitts Neuron, Thresholding Logic, Perceptrons, Perceptron Learning Algorithm. Multilayer Perceptrons (MLPs), Representation Power of MLPs, Sigmoid Neurons, Gradient Descent.	8	L1, L2, L3
2	Deep Learning Fundamentals		
	FeedForward Neural Networks, Backpropagation. Gradient Descent (GD), Momentum Based GD, Nesterov Accelerated GD, Stochastic GD, AdaGrad, RMSProp	7	L1,L2, L3
3	PCA & Autoencoders		
	Principal Component Analysis and its interpretations, Singular Value Decomposition . Autoencoders and relation to PCA, Regularization in autoencoders, Denoising autoencoders, Sparse autoencoders, Contractive autoencoders	8	L1,L2, L3
4	Regularization & Normalization		
	Regularization: Bias Variance Tradeo-, L2 regularization, Early stopping, Dataset augmentation, Parameter sharing and tying. Greedy Layerwise Pre-training, Better activation functions, Better weight initialization methods, Batch Normalization	7	L1, L2,L3
5	Convolutional Neural Networks		
	Convolutional Neural Networks, LeNet, AlexNet, ZF-Net, VGGNet, GoogLeNet, ResNet. Learning Vectorial Representations of Words	8	L1, L2, L3, L4
6	Recurrent Neural Networks		
	Recurrent Neural Networks, LSTM , Backpropagation through time Encoder Decoder Models.	7	L1, L2, L4
	Total Hours	45

#### **Course Objective:**

The objective of the course is to introduce the concepts of Internet of Things (IoT), RFID and Sensor technology and to make students aware of security issues in Internet of Things. To summarize the design approaches to various IoT applications.

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Describe key technologies in Internet of Things.	L1, L2
2	Differentiate between IoT and M2M.	L1, L2, L3,L4
3	Analyze basic protocols in wireless sensor network.	L1, L2, L3,L4
4	Describe IoT based business model scenarios.	L1, L2
5	Describe security model and protocol for IoT.	L1, L2
6	Design IoT applications in different domain and be able to analyze their performance.	L1, L2, L3,L4,L5

	ESE : End Semester Evaluation- Paper Duration - 3 Hours										
	Mid Semester Assessment for Term work will be on continues basis										
		ring Mathem 's Taxonomy									

**Course Objectives:** Course should able to Introduce the principles of robotics, and apply mathematical Kinematic modeling for manipulation of Robot in 3-D Space ,also able to evaluate workspace of the robot , It will also use various actuator and sensor to provide vision for proper task planning of the Robot.

**<u>Course Outcomes:</u>** At the end of the course student should be able:

SN	Course Outcomes	<b>RBT Levels</b>
1	Describe typical robot and its characteristics.	L1,L2
2	Analyze& Evaluate kinematics parameters of robotic manipulator	L1,L2,L3,L4,L5
3	Analyze Inverse kinematics parameters of robotic manipulator.	L1,L2,L3,L4
4	Analyze & Evaluate Workspace & Trajectory path of the Robot	L1,L2,L3,L4,L5
5	Analyze motion of the robot for task planning	L1,L2,L3,L4
6	Apply Robotics to solve day to day problems using vision algorithms.	L1,L2,L3,L4

# **Detailed Syllabus:**

Module	Topics	Hrs.	Cognitive levels
No.			of attainment
1	Human Resource Management development	05	L1,L2
	Human Resource Management- Concept, Scope and Importance,		
	Interdisciplinary Approach Relationship with other Sciences, Competencies of		
	HR Manager, HRM functions.		
	Human resource development (HRD): changing role of HRM – Human		
	resource Planning, Technological change, Restructuring and rightsizing,		
	Empowerment, TQM, Managing ethical issues.		
2	Organizational Behaviour (OB)	06	L1,L2
	Introduction to OB Origin, Nature and Scope of Organizational Behaviour,		
	Relevance to Organizational Effectiveness and Contemporary issues.		
	Personality: Meaning and Determinants of Personality, Personality		
	development, Personality Types, Assessment of Personality Traits for Increasing		
	Self Awareness.		
	Perception: Attitude and Value, Effect of perception on Individual Decision-		
	making, Attitude and Behaviour.		
	Motivation: Theories of Motivation and their Applications for Behavioural		
	Change (Maslow, Herzberg, McGregor).Group Behaviour and Group Dynamics:		
	Work groups formal and informal groups and stages of group development, Team		
	Effectiveness: High performing teams, Team Roles, cross functional and self-		
	directed team.		
	Case study.		
3	Organizational Structure & Design	06	L1,L2,L3
	Structure, size, technology, Environment of organization; Organizational Roles		
	& conflicts: Concept of roles; role dynamics; role conflicts and stress.		
	Leadership: Concepts and skills of leadership, Leadership and managerial roles,		
	Leadership styles and contemporary issues in leadership.		
	Power and Politics: Sources and uses of power; Politics at workplace, Tactics and		
	strategies.		
4	Human resource Planning	06	L1,L2,L3
	Recruitment and Selection process, Job-enrichment, Empowerment - Job-		
	Satisfaction, employee morale.		
	Performance Appraisal Systems: Traditional & modern methods, Performance		
	Counseling, Career Planning.		
	Training & Development: Identification of Training Needs, Training Methods.		
5	Emerging Trends in HR	07	L1,L2,L3,L4
	Organizational development; Business Process Re-engineering (BPR), BPR as a		1
	tool for organizational development, managing processes & transformation in		
	HR. Organizational Change, Culture, Environment.		
	Cross Cultural Leadership and Decision Making: Cross Cultural		
	Communication and diversity at work, Causes of diversity, managing diversity		
	with special reference to handicapped, women and ageing people, intra company		
	cultural difference in employee motivation.

# **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels as per bloom's taxonomy
1	Introduction		
	Definition of Disaster, hazard, global and Indian scenario, general perspective, importance of study in human life, Direct and indirect effects of disasters, long term effects of disasters. Introduction to global warming and climate change	03	L1, L2,L3
2	Natural Disaster and Manmade disasters		
	Natural Disaster: Meaning and nature of natural disaster, Flood, Flash flood, drought, cloud burst, Earthquake, Landslides, Avalanches, Volcanic eruptions, Mudflow, Cyclone, Storm, Storm Surge, climate change, global warming, sea level rise, ozone depletion, Manmade Disasters: Chemical, Industrial, Nuclear and Fire Hazards. Role of growing population and subsequent industrialization, urbanization and changing lifestyle of human beings in frequent occurrences of manmade disasters	07	L1, L2,L3
3	Disaster Management, Policy and Administration		
	Disaster management: meaning, concept, importance, objective of disaster management policy, disaster risks in India, Paradigm shift in disaster management <b>Policy and administration:</b> Importance and principles of disaster management policies, command and co- ordination of in disaster management, rescue operations-how to start with and how to proceed in due course of time, study of flowchart showing the entire process.	06	L1, L2,L3
4	Institutional Framework for Disaster Management in India		
	Importance of public awareness, Preparation and execution of emergency management program. Scope and responsibilities of National Institute of Disaster Management (NIDM) and National disaster management authority (NDMA) in India. Methods and measures to avoid disasters, Management of casualties, set up of emergency facilities, importance of effective communication amongst different agencies in such situations. Use of Internet and softwares for effective disaster management. Applications of GIS, Remote sensing and GPS in this regard.	07	L1, L2,L3
5	Financing Relief Measures		
	Ways to raise finance for relief expenditure, role of government agencies and NGO's in this process, Legal aspects related to finance raising as well as overall management of disasters. Various NGO's and the works they have carried out in the past on the occurrence of various disasters, Ways to approach these teams. International relief aid agencies and their role in extreme events	10	L1, L2,L3
6	Preventive and Mitigation Measures		
	Pre-disaster, during disaster and post-disaster measures in some events in general. Structural mapping: Risk mapping, assessment and analysis, sea walls and embankments, Bio shield, shelters, early warning and communication. Non Structural Mitigation: Community based disaster preparedness, risk transfer and risk financing, capacity development and training, awareness and education, contingency plans. Do's and don'ts in case of disasters and effective implementation of relief aids.	06	L1, L2,L3
	Total	39

**<u>Course Objective</u>**: The objective of this course is to make students understand research problem formulation and analyze research related information.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

S. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand research problem formulation.	L1, L2, L3
2		L1, L2, L3, L4
3	Follow research ethics	L1, L2, L3
4	Understand that today's world is controlled by Computer, Information Technology, but tomorrow world will be ruled by ideas, concept, and creativity.	L1, L2, L3
	Understanding that when IPR would take such important place in growth of individuals & nation, it is needless to emphasis the need of information about Intellectual Property Right to be promoted among students in general & engineering in particular.	L1, L2, L3
	Understand that IPR protection provides an incentive to inventors for further research work and investment in R & D, which leads to creation of new and better products, and in turn brings about, economic growth and social benefits.	L1, L2, L3

#### **Course Outcome:**

SN	Course Outcomes	Cognitive levels as per bloom's Taxonomy
1	Understand the theoretical workings of the simplex method, the relationship between a linear program and its dual, including strong duality and complementary slackness.	L1, L2, L3, L4
2	Perform sensitivity analysis to determine the direction and magnitude of change of a model's optimal solution as the data change	L1, L2, L3, L4
3	Solve specialized linear programming problems like the transportation and assignmentproblems, solve network models like the shortest path, minimum spanning tree, and maximum flow problems	L1, L2, L3, L4
4	Understand the applications of integer programming and a queuing model and compute important performance measures	L1, L2, L3, L4
5	To apply conflict between two players	L1, L2, L3, L4
6	To apply EOQ model in inventory	L1, L2, L3, L4

B.E. Semester –VII Choice Based Credit Grading Scheme with Holistic Student Development (CBCGS-H 2019) TCET Autonomy Scheme (w.e.f. A.Y. 2021-22)

	B.E.	(Computer	Engineeri	ng)			B.E. S	EM : VII	
Course Name: Project-I							Course Code :	PROJ-CS701	
Tea	Yeaching Scheme (Program Specific) E					Examination Scheme (Formative/ Summative)			
Modes	Modes of Teaching / Learning / Weightage					Modes of Continuous Assessment / Evaluation			
Hours Per Week				Theory (100)		Practical/Oral (25)	Term Work (25)	Total	
Theory	Tutorial	Practical	Contact Hours	Credits	IA	ESE	PR/OR	TW	
-	-	6	6	3	-	-	25	25	50

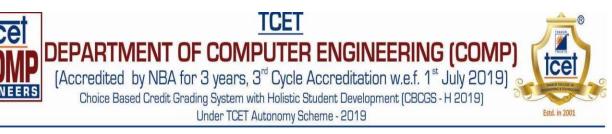

**Course Objectives:** The Project work enables students to develop further skills and knowledge gained during the programme by applying them to the analysis of a specific problem or issue, via a substantial piece of work carried out over an extended period. For students to demonstrate proficiency in the design of a research project, application of appropriate research methods, collection and analysis of data and presentation of results.

# **Guidelines:**

# **1. Project Topic:**

- To proceed with the project work it is very important to select a right topic. Project can be undertaken on any subject addressing IT programme. Research and development projects on problems of practical and theoretical interest should be encouraged.
- Project work must be carried out by the group of at least two students and maximum three and must be original.
- Students can certainly take ideas from anywhere, but be sure that they should evolve them in the unique way to suit their project requirements.
- The project work can be undertaken in a research institute or organization/company/any business establishment.
- Student must consult internal guide along with external guide (if any) in selection of topic.
- Head of department and senior staff in the department will take decision regarding selection of projects.
- Student has to submit weekly progress report to the internal guide and whereas internal guide has to keep track on the progress of the project and also has to maintain attendance report. This progress report can be used for awarding term work marks.
- In case of industry projects, visit by internal guide will be preferred.

**2. Project Report Format:** At the end of semester a project report should preferably contain at least following details:-

- Abstract
- Introduction
- Literature Survey
  - Survey Existing system
  - Limitation Existing system or research gap
  - Problem Statement and Objective
  - o Scope
- Proposed System
  - o Analysis/Framework/ Algorithm
  - Details of Hardware & Software
  - Design details
  - Methodology (your approach to solve the problem)
- Implementation
- Conclusion
- References

**3. Term Work:** Distribution of marks for term work shall be as follows:

- a. Weekly Attendance on Project Day
- b. Project work contribute
- c. Project Report (Spiral Bound)
- d. Term End Presentation (Internal)

The final certification and acceptance of TW ensures the satisfactory performance on the above aspects.

# 4. Oral & Practical:

Oral &Practical examination of Project-I should be conducted by Internal and External examiners approved by University of Mumbai. Students have to give presentation and demonstration on the Project I.

# **B.E. Semester –VII**

**Prerequisite:** Fundamental knowledge of respective Programmes

### **Course Objectives:**

To get industry like exposure in the institute laboratories by carrying out activities / projects. Also design innovative techniques / methods to develop the products.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Apply subjects knowledge in the college laboratories for carrying out projects	L3, L4,L5
2	Developed innovative techniques / methods to develop the products	L3, L4,L5
3	Contribute for the society	L3, L4,L5

#### **Detailed Syllabus:**

Module No.	Topics	Cognitive levels of attainment as per Bloom's Taxonomy
	Program Specific Internship	
1	• Training and certification on emerging technologies in domains	
	offered by Department of Computer Engineering	L3, L4,L5
	• Applying classroom and laboratory knowledge to design, develop	
	and deploy the products	
	Inter disciplinary Internship	L3, L4,L5

# Under TCET Autonomy Scheme - 2019

2	<ul> <li>To explore and understand issues and challenges in the other disciplines (EXTC, ELEX, MECH and CIVIL)</li> <li>Design , develop and deploy cost effective products using multidisciplinary approach</li> </ul>	
	Industry Specific Internship	
3	• To explore and understand issues and challenges in industry	
	Developing solutions for industry specific problems	L3, L4,L5
	• Design, develop and deploy products for startup and SMEs	
	Interpersonal Internship	
	To develop interpersonal skills such as leadership, marketing	
4	,publicity and corporate ethics and communication	L3, L4,L5
	• To get competence in problem solving , presentation , negotiation skills	
	Social Internship	
5	Identify and study different real life issues in the society	121415
	• Identify societal problems and provide engineering solutions to solve these problems	L3, L4,L5
	Academic Internship	
	Study report preparation, preparation of presentations, copy table     back approximation, huging a graph and JDP	
	<ul> <li>book preparation, business proposal and IPR</li> <li>Capture aspirations &amp; expectations through interviews of students.</li> </ul>	12 1415
		L3, L4,L5
	Ways to connect research in technical institutes with industry.     Taking inputs from self-least stakeholders and slobal stake holders.	
6	• Taking inputs from self, local stakeholders and global stake holders which will help to develop process with comparative and competitive study.

# B.E. Semester –VII Choice Based Credit Grading Scheme with Holistic Student Development (CBCGS-H 2019)

<b>B.E.</b> (Computer Engineering)				neering)		<b>B.E.</b> (	SEM : VIII)
	Cour	se Name : Prof	essional Skills-	VII (Software Te	Testing) Course Code: HSDCSPS701		
	Teaching	Scheme (Prog	ram Specific)		Examination	n Scheme (Formativ	e/ Summative)
1	Modes of Tea	ching / Learn	ing / Weighta	ge	Modes of Co	ontinuous Assessme	nt / Evaluation
		Hours Per W	eek		Presentation	Report	Term Work
Theory	Tutorial	Practical	Contact Hours	Credits	AC	AC	TW
15	-	30	45	2	50	25	75
I		L L	Audit	course evaluat	ed by Teacher Guardian		
		Mie	d Semester Ass	essment for Te	rm work will be on cont	inuous basis	

r rerequisite: Subject knowledge, Domain knowledge

**<u>Course Objective</u>**: The course intends to make students learn how to design and program Python applications. The course intends to develop professional skills necessary for becoming technically skilled personnel.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Illustrate concepts of testing and types of testing.	L1, L2
2	Install Selenium IDE and illustrate the concepts of Selenium suite tools.	L1,L2, L3
3	Record test cases using the IDE.	L1,L2, L3
4	Write test cases using the selenese commands.	L1,L2, L3
5	Identify the various webdriver commands and their usage.	L1, L2, L3
6	Apply skills of writing automated test scripts in different web applications	L1, L2, L3

# **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Basics of testing		
	Introduction to testing, types of testing, writing test cases for various module. Exercise to manually test the College website and report errors. Difference between manual and Automated	3	L1, L2
	testing, Automation testing tools, use of automation testing		
2	Introduction to Selenium		
	Selenium Suite tools, Install Selenium IDE	2	L1,L2, L3
3	Selenium IDE		
	Basics of Selenium IDE, test with Selenium IDE	2	L1,L2, L3
4	Selenium Commands – Selenese		
	Selenium Commands – Selenese(Actions, Assessors and Assertions), Create a script manually and test it on any website	3	L1,L2, L3
5	Selenium Webdriver		L1, L2, L3
	Selenium Webdriver, Webdriver commands and its implementation., Writing script using a webdriver, Use of findElement() and findElements() methods in Webdriver	3	
6	Case Study		
	Write a complete test script for testing of a website	2	L1,L2, L3
	Total Hours	15	

# **Books and References:**

#### List of Practical/ Experiments:

Practical Number	Type of Experiment	Practical/ Experiment Topic	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1		Write unit test cases in format	2	L1
2	Basic Experiments	Install Selenium IDE and record and playback	2	L1, L2
3		Record test case and update test cases	2	L1, L2, L3
4	Design Experiments	Write program using Selenese commands(Actions)	2	L1, L2, L3
5		Write program using Assessors	2	L1, L2, L3
6		Write program using Assertions	2	
7	Advanced Experiments	Write program using findElement() method in Webdriver	4	L1, L2, L3
8		Write program using and findElements() method in Webdriver	4	L1, L2, L3
9	Mini/Minor Projects/ Seminar/	<ol> <li>Online Second-hand Book Buying &amp; Selling Portal</li> <li>College E Print Service Management</li> <li>Online Pizza Ordering System</li> </ol>	6	L1, L2, L3
10	Case Studies/ Group Presentation	1. study other tools used for Software testing	4	L1, L2, L3
	1	Total Hours	30	

#### Choice Based Credit Grading Scheme with Holistic Student Development (CBCGS-H 2019) TCET Autonomy Scheme (w.e.f. A.Y. 2021-22)

		Mid Semes	ster Assessm	ent for Tern	n work will b	e on continuo	ous basis		
Prerequis	ite: Subject k	nowledge, Do	omain knowl	edge					

**<u>Course Objectives:</u>** This course is focused to engage the learner in testing & validation, developing business models & exploring possibilities in areas of research and consultancy.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

S.N.	Course Outcome	Cognitive level attainment as per revised Bloom Taxonomy
1	Upgrade the knowledge of latest technologies developments, tools and project development aspects.	L1, L2, L3
2	Assess their skills in competitive business environment.	L1, L2, L3,L4
3	Test their skills in the areas of consultancy.	L1, L2, L3,L4
4	Put across their work by publishing papers	L1, L2, L3,L4,15

#### **Detailed Syllabus:**

Module No.	Topics	Cognitive level attainment as per revised Bloom Taxonomy
1	Search of relevant industry/labs/start ups for project area	L1, L2, L3
	Identification of Industry for the cause, opportunity, documentation. Testing	
	of mathematical modeled as per standards available.	
	Submission of report/Presentation and evaluation	
2	Business plan of Prototype/ Business canvas development	L1, L2, L3,L4
	Preparing Business plan covering the following parameters:	
	I. Key Partners	
	II. Key Activities	
	III. Value Propositions	
	IV. Customer Relationships Customer Segments	
	V. Key Resources	
	VI. Channels	

# TCET DEPARTMENT OF COMPUTER ENGINEERING (COMP) (Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>st</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019)

Under TCET Autonomy Scheme - 2019

VII. Cost Structure	
VIII. Revenue Streams	
Presentation of Pitch and evaluation	
Participation in competition/Working for research grant	L1, L2, L3,L4
group/consultancy group/etc.	
Participation in project competitions	
a) Participating at institute /national level /university level /participate in	
competitions.	
b) Participation in funded project/consultancy projects	
II. Research grant: Identifying research grant proposal like University level,	
industry level etc, Proposal writing and preparing budget.	
III Evaluation : Evaluation based on level of participation , proposal	
made,etc	
Competition and evaluation	
Publish paper at institute /national level conference and Journals	L1, L2, L3,L4,L5
I. Identification of conference and track on the basis research	
proposal/theme (Institute/National/International)	
II. Participating at conference and Publishing paper.	
Evaluation of research review paper.

	ESE : End Semester Evaluation- Paper Duration - 3 Hours										
	Mid Semester Assessment for Term work will be on continues basis										
	Prerequisite: Engineering Mathematics RBT : Revised Bloom's Taxonomy										

**Course Objectives:** The objective of the course is to study contemporary knowledge in distributed systems and able to analyze and design distributed applications. It provide skill to measure the performance of distributed synchronization algorithms

**<u>Course Outcomes:</u>** At the end of the course student should be able:

SN	Course Outcomes	<b>RBT Levels</b>
1	CO1: Demonstrate knowledge of the basic elements and concepts related to distributed system technologies.	L1,L2
2	CO2: Illustrate the middleware technologies that support distributed applications such as RPC, RMI and Object based middleware.	L1,L2,L3,L4 , L5,L6
3	CO3:Analyze the various techniques used for clock synchronization and mutual exclusion	L1,L2,L3,L4
4	CO4: Demonstrate the concepts of Resource and Process management and synchronization algorithms	L1,L2,L3,L4
5	CO5: Demonstrate the concepts of Consistency and Replication Management	L1,L2,L3,L4
6	CO6: Understand the knowledge of Distributed File System to analyze various file systems like NFS, AFS and experience in building large-scale distributed applications.	L1,L2

Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019)

Estd. in 2001

Under TCET Autonomy Scheme - 2019

#### B.E. Semester –VIII Choice Based Credit Grading Scheme with Holistic Student Development (CBCGS-H 2019) Syllabus under Autonomy (w.e.f. A.Y. 2021-22)

	B.E. (Computer Engineering)						B.E. SEM: VIII			
	Course Name: Graph Theory					Course Code: PEC-CS8011				
Teaching Scheme (Program Specific)					Examina	ation Scheme (Forma	ative/ Summative	e)		
Modes of Teaching / Learning / Weightage					Modes o	f Continuous Assess	ment / Evaluatio	n		
Hours Per Week					eory 00)	Practical/Oral (25)	Term Work (25)	Total		
Theory	Tutorial	Practical	Contact Hours	Credits	IA	ESE	PR/OR	TW		
3	-	2@	5	4	25	75	25	25	150	
		IA	: In-Semest	er Assessm	ent - Paj	per Dura	tion – 1 Hour			
	ESE: End Semester Examination - Paper Duration - 3 Hours									
The w	The weightage of marks for continuous evaluation of Term work/Report: Formative (40%), Timely completion of practical (40%) and Attendance / Learning Attitude (20%)									
Prerequis	site: Discrete	Mathematics	, Algorithm	s, Data struc	ctures					

**<u>Course Objective:</u>** The objective of this course is to introduce students with the fundamental concepts in graph theory, explore its modern applications and to solve live problems that can be modeled by graphs.

#### <u>Course Outcomes:</u> Upon completion of the course students will be able to:

Sr. No	Course Outcome	Cognitive levels of attainment as per Bloom's Taxonomy
1	Solve problems using basic graph theory	L1, L2, L3, L4, L5, L6
2	Identify whether a graph has a Hamiltonian circuit or path and apply the concepts for problem solving.	L1, L2, L3, L4, L5, L6
3	Solve problems involving trees and connectivity and apply suitable graph model and algorithm for solving applications.	L1, L2, L3, L4, L5, L6
4	Represent Graphs in various forms and to introduce concepts like cut-set, cut- vertex, connectivity and separability.	L1, L2, L3, L4, L5, L6
5	Solve problems involving vertex and edge coloring	L1, L2, L3, L4, L5, L6
6	To explore modern applications of graph theory and apply principles and concepts of graph theory in practical situations	L1, L2, L3, L4, L5, L6

#### **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
	Introduction to Graph Theory		
1	Introduction, Graph Terminologies, Types of Graphs, complete, regular and bipartite graphs, Isomorphic graphs, Subgraphs, Multi Graph Matrix representations of graphs, applications of graphs.	7	L1, L2, L3, L4, L5, L6
	Paths and Circuits		
2	Walks, trails, paths, cycles, Connected graphs, Euler Graphs, Hamiltonian Paths and circuits, Weighted graphs and shortest paths, Dijkstra's shortest path algorithm, Floyd-Warshall shortest path algorithm. Applications-The Chinese Postman Problem, The Travelling Salesman Problem	8	L1, L2, L3, L4, L5, L6
	Trees and connectivity		
3	Trees, Properties, Distance and Centers in a tree, Types: Rooted Tree and Binary tree, Labeled Tree, Unlabeled Tree, Spanning Trees, Kirchoff-matrix- tree theorem, Minimum spanning trees, Kruskal's algorithm, Prim's algorithm	8	L1, L2, L3, L4, L5, L6
	Representations of Graphs		
4	Fundamental Circuits, Cut Sets, Properties, Fundamental Circuit and Cut- sets, Connectivity and Separability, Matrix Representation, Adjacency matrix, Incidence matrix, Circuit matrix, Cut-set matrix, Path Matrix, Properties.	7	L1, L2, L3, L4, L5, L6
	Vertex-colorings and planar graphs		L1, L2, L3, L4,
5	Graph Coloring, Chromatic Number, Chromatic Polynomial, Chromatic Partitioning, Matching, Covering, Edge colorings, Planar Graphs: Basic concepts, Euler's formula and its consequences, Planarity testing, 5-Color- theorem	8	L5, L6
	Applications of Graph Theory		
6	Applications of Graphs in switching and coding Theory, Graphs in Game theory, Graphs in Computer programming and other application in Science and engineering.	7	L1, L2, L3, L4, L5, L6
	Total Hours	45

**Course Objective:** The course intends to deliver advanced concepts about System Security to develop security management and policies for reducing Cyber-Attacks. It will also help in understanding and explore techniques used in Digital Forensics and analyze various software vulnerabilities, attacks and protection in Web Applications& Wi-Fi Networks

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Apply access control policies and control mechanisms to cyber-attacks	L1, L2, L3
2	Identify malicious code and targeted malicious code	L1, L2, L3
3	Analyze threats to web applications	L1, L2, L3, L4
4	Understand the vulnerabilities of Wi-Fi networks and explore different measures to secure wireless protocols, WLAN and VPN network	L1, L2, L3, L4
5	Asses ethical and legal issues associated with cyber-crimes and be able to mitigate impact of crimes with suitable policies	L1, L2, L3, L4, L5
6	Make use of different forensic tools to acquire and duplicate data from compromised systems and analyze the same	L1, L2, L3, L4

#### **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels as per blooms Taxonomy
1	Introduction & Access Control		L1, L2, L3
	Cyber-attacks, Vulnerabilities, Defense Strategies and Techniques, Authentication Methods and Protocols, Defense in Depth Strategies Access Control Policies: DAC, MAC, Multi-level Security Models: Biba Model, Bell La Padula Model	8	
2	Program & OS Security		L1, L2, L3
	Malicious and Non-Malicious programming errors, Targeted Malicious codes: Salami Attack, Control against Program threats, Operating System Security: Memory and Address protection, File Protection Mechanism, Linux and Windows: Vulnerabilities, File System Security	8	
3	Web Application Security	10	L1, L2, L3,
	OWASP, Web Security Considerations, User Authentication and Session Management, SSL, Privacy on Web, Web Browser Attacks, Account Harvesting, Web Bugs, Clickjacking, Cross-Site Request Forgery, Session Hijacking and Management, Phishing and Pharming Techniques, Web Service Security, OAuth 2.0	10	L4
4	Wireless Security		L1, L2, L3,
	Wi-Fi Security, WEP, WPA, WPA-2, Mobile Device Security- Security Threats, Device Security, GSM and UMTS Security, IEEE 802.11/802.11i Wireless LAN Security, VPN Security	6	L4
5	Legal and Ethical issues		L1, L2, L3,
	Cybercrime and its types, Intellectual property, Privacy, Ethical issues Protecting Programs and Data, Information and the Law, Rights of Employees and Employers, Redress for Software Failures, Computer Crime, Ethical Issues in Computer Security, Case studies of ethics	6	L4, L5
6	Digital Forensics		L1, L2, L3,
	Introduction to Digital Forensics, Acquiring Volatile Data from Windows and Unix systems, Forensic Duplication Techniques, Analysis of forensic images using open source tools like Autopsy and SIFT, Investigating logs from Unix and Windows systems, Investigating Windows Registry	7	L4
	Total Hours	45

#### Mini Project:

Sr. No.		Hrs.	Cognitive levels as per blooms Taxonomy				
1	Study various Network Scanning Tools for acquiring information	2	L1, L2				
2	Identify common vulnerabilities in computing systems / web applications / web sites	4	L1, L2				
3	Perform vulnerability scanning using tools like Nessus	2	L1, L2, L3				
4	Analyze web-application vulnerabilities using open source tools like Wapiti, browser exploitation framework (BeEf), etc.	2	L1, L2, L3				
5	Identify SQL injection vulnerabilities in a website database using SQLMap	2	L1, L2, L3				
6	Analyze static code using open source tools like RATS, Flawfinder etc	2	L1, L2, L3, L4				
7	Make use of forensics tools in Kali Linux for acquiring data	2	L1, L2, L3				
8	Make use of forensics tools in Kali Linux for analyzing data	2	L1, L2, L3				
9	Make use of forensics tools in Kali Linux for duplicating data	2	L1, L2, L3				
10	Analyze forensic images using open source tools like Autopsy, SIFT, FKT Imager	2	L1, L2, L3				
11	Design mitigation technique for the identified vulnerability	4	L1, L2, L3, L4				
12	Implement mitigation techniques	4	L1, L2, L3, L4				
	Total Hours: 30

#### **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Data Science Key Concepts		L1, L2
	Introduction, Terminology, Traits of Big data, Web Scraping, Analysis vs Reporting, Data Science process, Types of data, Example applications.	5	
2	Introduction to Programming Tools for Data Science		L1, L2,L3
	Toolkits using Python: Matplotlib, NumPy, Scikit-learn, NLTK Visualizing Data: Bar Charts, Line Charts, Scatterplots Working with data: Reading Files, Scraping the Web, Using APIs (Example: Using the Twitter APIs), Cleaning and Munging, Manipulating Data, Rescaling, Dimensionality Reduction	6	
3	Mathematical Foundations		L1, L2,L3
	Statistics: Sample Selection, Describing and Summarizing Data, Descriptive Statistics: Describing Qualitative and Quantative Data, Histograms	12	,,
	Probability: Dependence and Independence, Conditional Probability, Bayes's Theorem, Random Variables, Continuous Distributions, The Normal Distribution, The Central Limit Theorem Hypothesis and Inference: Statistical Hypothesis Testing, Confidence		
4	Intervals, P-hacking, Bayesian Inference Data Management, Pre-processing, Exploratory Data Analysis and	10	L1, L2, L3, L4
-	Statistical Techniques	10	L1, L2, L3, L4
	Data collection and management: Introduction, Sources of data, Data collection and APIs, Recent trends in various data collection and analysis techniques, Exploring and fixing data, Data storage and management, Using multiple data Sources, Exploratory Data Analysis, Linear Discriminant analysis (LDA), Logistic regression: Bayesian logistic regression		
5	Data Visualization	6	L1, L2, L3
	Data Visualization: Introduction, Types of data visualization, Data for visualization: Data types, Data encodings, Retinal variables, Mapping variables to encodings, Visual encodings, Technologies for visualization, Bokeh (Python)		
6	Applications of Data Science	6	L1, L2
	Applications of Data Science, Recommendation System, Predictive Analytics, Text Mining, Sentiment Analysis and Case studies		
	Total Hours	45

**<u>Course Objective:</u>** To provide background in perception to educate VR creators on concepts and theories of how we perceive and interact with the world around us

Course Outcomes: Upon completion of the course students will be able to

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Apply the concepts of VR and AR in real life	L1, L2, L3
2	Reduce the greatest risk to VR	L1, L2, L3
3	Design the way users interact within the scenes they find themselves in	L1, L2, L3
4	Exposed to VR, AR and today's resources	L1, L2, L3, L4
5	Effectively use open source VR software.	L1, L2, L3
6	Understand different types Modeling techniques of VR	L1, L2

#### **Detailed Syllabus:**

Module No.	Topics	Hrs ·	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Virtual Reality Introduction: What Is Virtual Reality, A History of VR, An Overview of Various Realities, Immersion, Presence, and Reality Trade-Offs, The Basics: Design Guidelines, Objective and Subjective Reality, Perceptual Models and Processes, Perceptual Modalities	7	L1, L2, L3
2	Virtual Reality Perception Perception of Space and Time, Perceptual Stability, Attention, and Action,		L1, L2, L3
	Perception of Space and Time, Perceptual Stability, Attention, and Action, Perception: Design Guidelines, Adverse Health Effects, Motion Sickness, Eye Strain, Seizures, and Aftereffects, Hardware Challenges, Latency, Measuring Sickness, Reducing Adverse Effects, Adverse Health Effects: Design Guidelines	7	L1, L2, L3
3	Virtual Reality Interaction		
	Content Creation, Concepts of Content Creation, Environmental Design, Affecting Behavior, Transitioning to VR Content Creation, Content Creation: Design Guidelines, Interaction, Human-Centered Interaction, VR Interaction Concepts, Input Devices, Interaction Patterns and Techniques, Interaction: Design Guidelines	8	L1, L2, L3
4	Virtual and Augmented Reality		
	Design and Art Across Digital Realities, Designing for Our Senses, Virtual Reality for Art, 3D Art Optimization, Computer Vision That Makes Augmented Reality Possible Works, Virtual Reality and Augmented Reality: Cross-Platform Theory	7	L1, L2,L3,L4
5	Virtual Reality Toolkit		
	Virtual Reality Toolkit: Open Source Framework for the Community, Data and Machine Learning Visualization Design and Development in Spatial Computing, Character AI and Behaviors, The Virtual and Augmented Reality Health Technology Ecosystem	8	L1, L2, L3
6	Virtual Reality Modeling		
	VR Modeling and Programming Geometric Modeling: Virtual Object Shape, Object Visual Appearance. Kinematics Modeling: Object Position, Transformation Invariants, Object Hierarchies, Physical Modeling: Collision Detection, Surface Deformation, Force Computation. Behavior Modeling. Programming through VRML/X3D: Defining and Using Nodes and Shapes, VRML Browsers, Java 3D, OpenCV for augmented reality	8	L1, L2
	Total Hours	45

**Course Objective:** The objective of the course is to familiarize the students with the use of a structured methodology/approach for each and every unique project undertaken, including utilizing project management concepts, tools and techniques and appraise the students with the project management life cycle and make them knowledgeable about the various phases from project initiation through closure.

Sr No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Apply selection criteria and select an appropriate project from different options	L1, L2, L3, L4
2	Write work break down structure for a project and develop a schedule based on it	L1, L2, L3, L4
3	Identify opportunities and threats to the project and decide an approach to deal with them strategically.	L1, L2, L3, L4
4	Use Earned value technique and determine & predict status of the project.	L1, L2, L3, L4
5	Compare and contrast various project execution, Monitoring and Controlling Projects, Project Contracting, Project Leadership and Ethics and Closing the Project	L1, L2, L3, L4
6	Capture lessons learned during project phases and document them for future reference	L1, L2

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>rd</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

#### **Detailed Syllabus:**

Module No.	Topics	Hr s.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Project Management FoundationDefinition of a project, Project Vs Operations, Necessity of project management, Triple constraints, Project life cycles (typical & atypical) Project phases and stage gate process. Role of project manager, Negotiations and resolving conflicts, Project management in various organization structures, PM knowledge areas as per Project Management Institute (PMI).	6	L1, L2, L3, L4
2	Initiating Projects How to get a project started, Selecting project strategically, Project selection models (Numeric /Scoring Models and Non-numeric models), Project portfolio process, Project sponsor and creating charter; Project proposal. Effective project team, Stages of team development & growth (forming, storming, norming &performing), team dynamics	6	L1, L2, L3, L4
3	Project Planning and SchedulingWork Breakdown structure (WBS) and linear responsibility chart, InterfaceCo-ordination and concurrent engineering, Project cost estimation andbudgeting, Top down and bottoms up budgeting, Networking andScheduling techniques. PERT, CPM, GANTT chart, Introduction to ProjectManagement Information System (PMIS).	8	L1, L2, L3, L4
4	Planning ProjectsCrashing project time, Resource loading and levelling, Goldratt's criticalchain, Project Stakeholders and Communication plan Risk Management inprojects: Risk management planning, Risk identification and risk register,Qualitative and quantitative risk assessment, Probability and impact matrix.Risk response strategies for positive and negative risks	8	L1, L2, L3, L4
5	Executing Projects, Monitoring and Controlling Projects & Project         Contracting         5.1       Executing Projects: Planning monitoring and controlling cycle, Information needs and reporting, engaging with all stakeholders of the projects, Team management, communication and project meetings         5.2       Monitoring and Controlling Projects: Earned Value Management techniques for measuring value of work completed; Using milestones for measurement; change requests and scope creep, Project audit.         5.3       Project Contracting : Project procurement management, contracting and outsourcing,	10	L1, L2, L3, L4
6	Project Leadership and Ethics & Closing the Project 6.1 Project Leadership and Ethics: Introduction to project leadership, ethics in projects, Multicultural and virtual projects 6.2 Closing the Project: Customer acceptance; Reasons of project termination, Various types of project terminations (Extinction, Addition, Integration, Starvation), Process of project termination, completing a final report; doing a lessons learned analysis; acknowledging successes and failures; Project management templates and other resources; Managing without authority; Areas of further study.	7	L1, L2
	Total Hours	45

**The weightage of marks for continuous evaluation of Term work/Report:** Formative (40%), Timely completion of practical (40%) and Attendance / Learning Attitude (20%)

#### Prerequisite: - Knowledge of Basic Electrical and Mechanical Systems

#### **Course objectives:**

To understand the importance energy security for sustainable development and the fundamentals of energy conservation. To introduce performance evaluation criteria of various electrical and thermal installations to facilitate the energy management. To relate the data collected during performance evaluation of systems for identification of energy saving opportunities. **Course outcomes:** After successful completion of the course student will be able:-

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	To identify and describe present state of energy security and its importance.	L1
2	To identify and describe the basic principles and methodologies adopted in energy audit of any utility.	L1, L2, L3
3	To describe the energy performance evaluation of some common electrical installations and identify the energy saving opportunities.	L1, L2, L3, L4
4	To describe the energy performance evaluation of some common thermal installations and identify the energy saving opportunities	L1, L2, L3, L4
5	To analyze the data collected during performance evaluation and recommend energy saving measures	L1, L2, L3
6	To understand the concept of Energy conservation measures in building complex	L1

#### **Detailed Syllabus**

Module No.	Unit No.	Topics	Hrs	Cognitive levels of attainment as per Bloom's Taxonomy
1	Eı	nergy Scenario & Energy Conservation measures	04	L1
	1.1	Present Energy Scenario		
	1.2	Renewable and Non-Renewable form of Energy		
	1.3	Greenhouse Gas effect, Acid Rain, Energy Pricing, Energy Sector Reforms,		
	1.4	Energy Conservation and its Importance: Energy Conservation Act-2001 and its features. Role of Bureau of Energy Efficiency (BEE), Energy Security, Basic idea of Material and Energy balance		
2		Energy Audit & Energy Economics	08	L1, L2, L3
	2.1	Energy Audit: Definition, need, types of energy audit, Steps of detailed Energy Audit, Role of Energy Manager and Internal audit Team,		
	2.2	Measuring instruments & Equipment used during Energy audit		
	2.3	Understanding energy costs, Bench marking, Energy performance, Matching energy use to requirement,		
	2.4	Maximizing system efficiencies, Optimizing the input energy requirements, Fuel and energy substitution		
	2.5	Elements of monitoring & targeting, Data and information analysis.		
	2.6	Energy Economics: Simple payback period (SPP), Net Present value (NPV), Return on investment (ROI), Internal rate of return (IRR)		
3		Energy Management in Electrical System	10	L1, L2, L3, L4
	3.1	Electricity billing, Basic concept of Electrical load management, Maximum demand Control, Energy management through Power factor improvement		
	3.2	Energy efficient equipment and appliances, Star ratings of Electrical Equipment.		
	3.3	Lighting System control: Occupancy sensors, daylight integration, and use of intelligent controllers. Energy efficiency measures in lighting system		
	3.4	Energy conservation opportunities in water pumps, industrial drives, induction motors, soft starters, variable speed drives.		
4		Energy Management in Thermal Systems	10	L1. L2, L3,L4
	4.1	Review of different thermal loads, Steam System: Basic idea of Steam distribution system, Assessment of steam distribution losses, Steam leakages, Steam trapping, Condensate and flash steam recovery system, Energy conservation in Steam distribution system,		

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>rd</sup> Cycle Accreditation w.e.f. 1<sup>rd</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Scheme - 2019

	4.2	Boiler System: General fuel conservation measures in Boilers and furnaces, Waste heat recovery, cogeneration, use of insulation- types and application.		
	4.3	HVAC system: Coefficient of performance, Capacity, factors affecting performance of Refrigeration and Air Conditioning system performance, Energy savings opportunities in HVAC system.		
5		Energy Performance Assessment	04	L1, L2, L3,
	5.1	Performance assessment of Motors, variable speed drive, pumps,		
	5.2	Lighting System calculations: Installed Load Efficacy Ratio (ILER) method,		
	5.3	HVAC system calculations; various terms used in assessment of performance		
6	Energy	conservation in Residential and Commercial Buildings	03	L1
	6.1	Energy Conservation Building Codes (ECBC)		
	6.2	Green Building norms, LEED ratings of buildings, Use of renewable energy sources in building complex		
		Total	39

**<u>Course Objective</u>**: The course intends to apply the concept of Innovation in Business.

#### **<u>Course Outcomes</u>**: Upon completion of the course students will be able to:

L1: Remembering L2: Understanding L3: Applying L4: Analysing L5: Evaluating L6: Creating

Sr. No.	Course Outcomes	<b>RBT</b> level
1	Able to analyze and apply impact of innovation on society	L1,L2,L4
2	Able to understand the role of technology in creating wealth	L1,L2,L3
3	Recognize markers of business models which appear as a response to digital revolution	L1,L2,L3,L4
4	Search for real cases which represent new business models	L1,L2,L3,L4
5	Identify similar and distinguished features of business build on identical business models	L1,L2,L3,L4
6	Know the most important cases of data-driven business founded on new business models	L2,L4

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>th</sup> Cycle Accreditation w.e.f. 1<sup>th</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Spheme - 2019

#### **Detailed Syllabus**

Module No.	Topics	Hrs.	<b>RBT Levels</b>	
01	Sources of Innovation	08	L1,L2,L4	
	Sources of Innovation: Innovation / wealth creation process, three critical trajectories impacting the innovation process creative transformations, the importance of technological Innovation, The impact of technological innovation on society. Case study on impact of technological innovation on society. Industry dynamics of technological innovation, transcending creativity into innovation, innovation as a collaborative effort.			
02	Types and patterns of innovation	06	L1,L2,L3	
	Types and patterns of innovation: Technology S curves, formulation of technological innovation strategy, implementing technological innovation strategies. Managing new product development. Case study on new product development.			
03	Collaboration strategies and Choosing innovative projects	08	L1,L2,L3,L4	
	Collaboration Strategies: The role of technology in the creation of wealth, historical perspective, long-wave cycle, evolution of production technology, technology and national economy. Case study on Collaboration Strategies. Choosing innovative projects: Management of technology, the conceptual frame work, technology and society, knowledge and technology, technology and business. Case study on How to choose innovative projects.			
04	Introduction to Business Models	8	L1,L2,L3,L4	
	What is a Business Model? Importance of Business Model. History of Business Model. Type of Business Model			
05	Business models as a key concept of strategic management.	8	L1,L2,L3,L4	
	Variety of business model frameworks: Canvas, 'Zott-Amit' model, BM navigator, 4W approach, Hybrid business models. Resource-based view (RBV). Industrial organization.			
06	Digital business models.	8	L2,,L4,	
	E-commerce. Innovative business model in retail and consumer goods. Omnichannel retail. Manufacturing business models. Digital manufacturing. Developers as new decision makers. Case-study of Apple, Android, Tinkoff.			
	Total	46

### Detailed Syllabus:

Module No.	Topics	Hrs.	RBT Levels
1	Introduction to Managerial Economics	5	L1,L2,L3,L4
	The meaning, scope and methods of Managerial Economics, Dominic Salvatore model of application of Economics to business decision making. Scarcity, choice & production possibility curve.	-	
2	Consumer Behavior		L1,L2,L3,L4
	Demand, types of demand, factors affecting demand & demand function. Making of linear demand function & linear demand curve. Law of demand. Consumer's surplus. Concept of elasticity of demand and its significance for a businessman. Types of Elasticity – Price Elasticity of Demand, Income Elasticity of Demand, Cross elasticity of demand & Promotional Elasticity of Demand, Demand forecasting – features, significance & methods.	11	
3	Production Function	5	L1,L2,L3,L4,L5
	Concept, Isoquant & Iso-cost analysis. Laws of returns to scale, economies & diseconomies of scale. Revenue Analysis, Cost analysis and break even analysis		
4	Supply	7	L1,L2,L3,L4,L5
	Concept of supply, factors affecting supply& the law of supply Determination of equilibrium price: effects of changes in demand & supply on equilibrium price.		
	Types of markets	9	L1,L2,L3,L4,L5
5	Perfect competition, monopoly, oligopoly & monopolistic competition – features and price determination. Pricing practices: Factors affecting pricing decision. Marginal cost pricing, mark up pricing, transfer pricing, product line pricing, price skimming and penetration price.		
	Profit Management		L1,L2,L3,L4,L5
6	• Profit management • Role of profits in a market economy • Nature and measurement of profit, profit policies • The hypothesis of profit maximization and its alternatives. Demand for capital • Supply of capital • Capital Rationing • Capital Budgeting, Net Present Value (NPV), Internal Rate of Return (IRR). • Appraising - the profitability of projects	8

**Course Objective:** This course discusses taxation, its principles, its objectives, and its effects; the nature and purposes of taxation, whether taxes should be classified as direct or indirect. It also instils an awareness instudents that taxes constitute significant costs to businesses and households and therefore have a major impactin economic and other decision-making, also these costs are potentially controllable through legitimate tax minimisation strategies. The course also shall enable students to appreciate the wider economic, social, administrative-compliance and political contexts within which taxes are imposed.

Course	Outcon	ies: Upon	completion	of the cours	e students	will be able to:

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the basic principles of taxation in India and the various provisions of Income Tax Act 1961	L2
2	Understand and apply the computation of taxable income under the heads capital gain and other sources	L3
3	Apply the provisions of clubbing of income, set off of losses and deductions permitted under the Income Tax Act, 1961.	L3
4	Analyze the computation of taxable income under the head Salaries, Income from House Property and Profits and Gains of Business or Profession	L4
5	Differentiate between Direct and Indirect Tax	L4
6	Understand the Concept of Service Tax and laws	L2

#### **Detailed Syllabus**

Module No.	Topics	Hrs.	Cognitive levels as per bloom's Taxonomy
	Introduction-Approach to Industrial Design		
1	Approach to industrial product based on idea generation and innovations to meet the needs of the developing society. Design and development process of industrial products, various steps such as creative process involved in idea marketing, designers, mind- criticism, design process, creation. Ergonomics and aesthetic requirements of product design, quality and maintainability consideration in product design, Use of modeling technique, prototype designs, conceptual design.	4	L1, L2
	Industrial Product Design		
2	General design situations, setting specifications, requirements and ratings, their importance in the design, Study of market requirements and manufacturing aspects of industrial designs. Aspects of ergonomic design of machine tools, testing equipment, instruments, automobiles, process equipment etc. Convention of style, from and color of industrial design.	8	L1, L2, L3
	Design of Consumer Product		
3	Functions and use, standard and legal requirements, body dimensions. Ergonomic considerations, interpretation of information, conversions for style, forms, colors.	8	L1, L2, L3, L4
	Aesthetic Concepts		
4	Concept of unity order with variety, concept of purpose, style and environment, Aesthetic expression of symmetry, balance, contrast and continuity, proportion, rhythm, radiation. Form and style of product: visual effect of line and form, mechanics of seeing, psychology of seeing, influence of line and form, Components of style, Basic factors, effect of color on product appearance, color composition, conversion of colors of engineering products.	8	L1, L2, L3
	Economic Considerations		L1, L2, L3,
5	Selection of material, Design for production, use of standardization, value analysis and cost reduction, maintenance aspects in design.	10	L1, L2, L3, L4
	Design Organization		111214
6	Organization Structure, Designer position, Drawing office procedure, Standardization, record keeping, legal procedure of Design patents.	7	L1, L2, L4, L5,L6

#### **Detailed Syllabus:**

Module No.	Topics	Hrs.	<b>RBT Levels</b>
1	Introduction to Rural Development Meaning, nature and scope of development; Nature of rural society in India; Hierarchy of settlements; Social, economic and ecological constraints for rural development. Roots of Rural Development in India Rural reconstruction and Sarvodaya programme before independence; Impact of voluntary effort and Sarvodaya Movement on rural development; Constitutional direction, directive principles; Panchayati Raj - beginning of planning and community development; National extension services.	06	L1, L2, L3, L4
2	Post-Independence rural Development Balwant Rai Mehta Committee - three tier system of rural local Government; Need and scope for people's participation and Panchayati Raj; Ashok Mehta Committee - linkage between Panchayati Raj, participation and rural development.	09	L1, L2, L3, L4
3	Rural Development Initiatives in Five Year Plans Five Year Plans and Rural Development; Planning process at National, State, Regional and District levels; Planning, development, implementing and monitoring organizations and agencies; Urban and rural interface - integrated approach and local plans; Development initiatives and their convergence; Special component plan and sub-plan for the weaker section; Micro-eco zones; Data base for local planning; Need for decentralized planning; Sustainable rural development	12	L1, L2, L3, L4
4	Post 73rd Amendment Scenario 73rd Constitution Amendment Act, including - XI schedule, devolution of powers, functions and finance; Panchayati Raj institutions - organizational linkages; Recent changes in rural local planning; Gram Sabha - revitalized Panchayati Raj; Institutionalization; resource mapping, resource mobilization including social mobilization; Information Technology and rural planning; Need for further amendments.	06	L1, L2, L3, L4
5	Values and Science and Technology Material development and its values; the challenge of science and technology; Values in planning profession, research and education Types of Values Psychological values — integrated personality; mental health; Societal values — the modern search for a good society; justice, democracy, rule of law, values in the Indian constitution; Aesthetic values — perception and enjoyment of beauty; Moral and ethical values; nature of moral judgment; Spiritual values; different concepts; secular spirituality; Relative and absolute values; Human values— humanism and human values; human rights; human values as freedom, creativity, love and wisdom	07	L1, L2, L3, L4
6	Ethics Canons of ethics; ethics of virtue; ethics of duty; ethics of responsibility; Work ethics; Professional ethics; Ethics in planning profession, research and education	05	L1, L2, L3, L4
	TOTAL	45

Prerequ	isite: Com	puter Progra	mming lar	nguage/s, S	Software	e Engine	eering				

#### **Course Objectives:**

The primary objective is to meet the milestone s formed in the overall project plan decided in Project - I. The idea presented in Project-I should be implemented in Project -II with results, conclusion and future work. The project will culminate in the production of a thesis by each individual student.

#### **Guidelines:**

**Project Report Format:** At the end of semester a student need to prepare a project report should be prepared as per the guidelines issued by the University of Mumbai. Along with project report a CD containing: project documentation, Implementation code, required utilities, Software's and user Manuals need to be attached.

Term Work: Student has to submit weekly progress report to the internal guide and whereas internal guide has to keep track on the progress of the project and also has to maintain attendance report. This progress report can be used for awarding term work marks. In case of industry projects, visit by internal guide will be preferred to get the status of project.

Distribution of marks for term work shall be as follows:

- a) Weekly Attendance on Project Day
- b) Project work contributions as per objective
- c) Project Report (Hard Bound)
- d) Term End Presentation (Internal)

e) The final certification and acceptance of TW ensures the satisfactory performance on the above aspects.

#### B.E. Semester –VIII Choice Based Credit Grading Scheme with Holistic Student Development (CBCGS-H 2019) Syllabus under Autonomy (w.e.f. A.Y. 2021-22)

	BE Computer Engineering					SEM: VIII			
	Co	urse Name:	Summer In	ternship		Course (	Code: SI-CS801		
ſ	<b>Feaching Sc</b>	heme (Progr	am Specifio	c)	Examina	tion Scheme (Forma	ative/ Summativ	e)	
Mo	des of Teacl	hing / Learni	ing / Weigh	tage	Modes of	Continuous Assess	ment / Evaluatio	)n	
	urs : Maxim mmer vaca	um 2 Weeks tion)	s ( 60 to 80 l	Hours		PR	TW	Total	
Theory	Tutorial	Practical	Contact Hours	Credits	-	-	50	50	
-	-	-	120*	3					

Prerequisite: Fundamental knowledge of respective Programmes

#### **Course Objectives:**

To get industry like exposure in the institute laboratories by carrying out activities / projects. Also design innovative techniques / methods to develop the products.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Apply subjects knowledge in the college laboratories for carrying out projects	L3, L4,L5
2	Developed innovative techniques / methods to develop the products	L3, L4,L5
3	Contribute for the society	L3, L4,L5

#### **Detailed Syllabus:**

Module No.	Topics	Cognitive levels of attainment as per Bloom's Taxonomy
	Program Specific Internship	
1	• Training and certification on emerging technologies in domains	
	offered by Department of Computer Engineering	L3, L4,L5
	<ul> <li>Applying classroom and laboratory knowledge to design, develop and deploy the products</li> </ul>	
	Inter disciplinary Internship	
2	• To explore and understand issues and challenges in the other disciplines (EXTC, ELEX, MECH and CIVIL)	L3, L4,L5
	• Design, develop and deploy cost effective products using multidisciplinary approach	
	Industry Specific Internship	
3	• To explore and understand issues and challenges in industry	
	• Developing solutions for industry specific problems	L3, L4,L5
	• Design , develop and deploy products for startup and SMEs	
	Interpersonal Internship	
	• To develop interpersonal skills such as leadership, marketing	
4	,publicity and corporate ethics and communication	L3, L4,L5
	• To get competence in problem solving , presentation , negotiation skills	
	Social Internship	
5	<ul> <li>Identify and study different real life issues in the society</li> <li>Identify societal problems and provide engineering solutions to solve these problems</li> </ul>	L3, L4,L5
	Academic Internship	
	<ul> <li>Study report preparation, preparation of presentations, copy table book preparation, business proposal and IPR</li> <li>Capture aspirations &amp; expectations through interviews of students.</li> </ul>	L3, L4,L5
6	<ul> <li>Ways to connect research in technical institutes with industry.</li> <li>Taking inputs from self, local stakeholders and global stake holders which will help to develop process with comparative and competitive study.</li> </ul>

Under TCET Autonomy Scheme - 2019

#### B.E. Semester –VIII Choice Based Credit Grading Scheme with Holistic Student Development (CBCGS-H 2019) Syllabus under Autonomy (w.e.f. A.Y. 2021-22)

Estd. in 2001

		<b>B.E.</b> ( Co	omputer Engi	neering)		<b>B.E.</b> (	SEM : VIII)
		Course N	ame : Cloud C	Computing		Course Code : HS	SD-CSPS801
	Teaching Scheme (Program Specific)				Examination	Scheme (Formativ	e/ Summative)
Ν	lodes of Tea	aching / Learr	ning / Weighta	age	Modes of Co	ntinuous Assessme	nt / Evaluation
Hours Per Week					Presentation	Report	Term Work
Theory	Tutorial	Practical	Contact Hours	Credits	AC	AC	TW
15	-	30	45	2	50	25	75
		LL	Audit	course evaluat	ed by Teacher Guardiar	1	
		Mid	Semester Ass	essment for Te	rm work will be on con	tinuous basis	

**<u>Course Objective:</u>** The course intends to introduce basics of cloud computing, virtualization technology and major concepts related to the computing environment.

#### **<u>Course Outcomes:</u>** Upon completion of the course students will be able to:

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Define Cloud Computing and memorize the different Cloud service and deployment models	L1, L2
2	Describe importance of virtualization along with their technologies.	L1, L2
3	Use and Examine different cloud computing services	L1, L2, L3
4	Analyze the components of open stack & Google Cloud platform and understand Mobile Cloud Computing	L1, L2, L3, L4
5	Describe the key components of Amazon Web Service	L1, L2, L3, L4,L5
6	Design & develop backup strategies for cloud data based on features.	L1, L2, L3, L4

#### TCET ARTMENT OF COMPUTER ENGINEERING

DEPARTMENT OF COMPUTER ENGINEERING (COMP) [Accredited by NBA for 3 years, 3<sup>th</sup> Cycle Accreditation w.e.f. 1<sup>th</sup> July 2019] Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Sphere - 2019

#### **Detailed Syllabus:**

Modul e No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction		L1, L2
	Defining Cloud Computing, Components of Cloud Computing, Cloud types: NIST and Cloud Cube Models, Cloud Deployment Models and Service Models, Cloud computing architecture, Advantages and Disadvantages of Cloud Computing	3	
2	Virtualization		L1, L2
	Virtualization: Characteristics of virtualized environment, Understanding the importance of Hypervisors, Type I & Type II Hypervisors, Taxonomy of virtualization,	2	
3	Cloud Computing Services		L1, L2, L3
	Exploring Cloud Computing Services: SPI Model: Software as a service, Platform as a service, and Infrastructure as a service. Anything as a service or Everything as a service (XaaS): Security as a Service, Identity management as a Service, Database as a Service, Storage as a Service, Collaboration as a Service	3	
4	Cloud Implementation, Programming and Mobile Cloud Computing	2	L1, L2, L3, L4
	Open Stack Cloud Architecture: Feature of Open stack, Components of Open stack, mode of operations. Mobile Cloud Computing: Definition, architecture, benefits and challenges of mobile cloud computing		
5	Exploring the Components of Amazon Web Services	2	L1, L2, L3, L4,
	<ul> <li>AWS cloud computing Platform,</li> <li>a) Elastic Compute Cloud (EC2): Compute Basics, Instance types, Life cycle of instances.</li> <li>b) Simple Storage Service (S3): Basics and Operations, Features, Amazon Glacier.</li> <li>c) Elastic Block Storage (EBS): Basics and Types of EBS Volumes.</li> </ul>		L5
6	Cloud Backup and Solutions	3	L1, L2
	Cloud Backup Solutions and their features, Cloud data management interface (CDMI), Cloud Storage gateways (CSG), Comparison between different cloud platforms: Amazon web services & Open stack (Based on Type of deployment, Services supported and their components).		
	Total Hours	15

Prerequis	site: Subject	knowledge, D	omain knowled	dge				

**Course Objective:** The course intends to create awareness about Intellectual Property Rights, provides an opportunity to interact with industry and helps the students in publishing papers in Conferences and Journals and encourages them to take part in consultancy projects.

#### **<u>Course Outcomes</u>**: Upon completion of the course student will be able to:

S. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand Intellectual Property Rights and its process in details	L1, L2
2	Interact with industry experts regarding their projects and analyse their projects from industry view point	L1, L2,L3
3	Evaluate their projects by publishing their project research in Conferences and Journals	L1, L2, L3, L4,L5
4	Write a research paper and understand technical writing.	L1, L2, L3,L4,15

#### **Detailed Syllabus:**

Module No.	Topics	Contact Hrs.	Self- Study	Cognitive levels of attainment as per
			Hrs.	Bloom's Taxonomy
1	Intellectual Property Rights (IPR) awareness seminar	02	00	L1, L2
	Seminar to be conducted by an industry expert who can			
	guide and motivate students to file IPR.			
2	Industry linkage / visit related to product and	02	04	L1,L2,L3
	domain/Establish start up			
	To understand the usability of their respective project students			

#### **TCET DEPARTMENT OF COMPUTER ENGINEERING (COMP)** (Accredited by NBA for 3 years, 3<sup>tol</sup> Cycle Accreditation w.e.f. 1<sup>tol</sup> July 2019) Choice Based Credit Grading System with Holistic Student Development (CBCGS - H 2019) Under TCET Autonomy Sphere - 2019

		can visit an Industry and conduct a survey and generate a suitable report.			
-	3	<b>IPR filing/ Technology transfer to industry/Testing of</b> <b>product in real environment</b> Once the product is ready, it needs to be tested first in the real environment where it will be deployed and used by the end user. Once the product is tested ok, it can be deployed in the industry in a large scale. IPR/Patent can be suitably filed for the said product.	06	10	L1, L2, L3,L4,L5
	4	Publish paper at institute /national level conference /participate in competition /participate in funded project/consultancy projects The completed project with results can be converted into a research paper and the same can be published in a conference or journal. Students can participate in project competitions at institute and university level. Also they can participate in funded projects and consultancy projects.	02	04	L1, L2, L3, L4,L5
		Total Hrs.	12	18

# APPENDIX

#### **Term work for Internship**

#### (Reference AICTE Internship Policy: Guidelines and Procedures)

AICTE Internship Policy is flexible on the INTERNSHIP duration and prescribes a minimum of 14-20 credits of Internship/ Entrepreneurial activities / Project work/ Seminar and Inter/ Intra Institutional Training may be counted toward B. E. degree programme. One credit is equivalent to minimum 40-45 hours of work. Therefore, a full-time intern is expected to spend 40 - 45 hours per week on Internship, Training, Project work, Seminar activities etc. The total internship duration for the B.E. Programme being 600-800 hours. The flexibility of carrying out the internship based on availability of opportunities as specified by AICTE allows students to complete the requirements of internship credits over the entire duration of the B. E. Programme. The Term work for INTERNSHIP will not lead to non-grant of term. Term work for INTERNSHIP shall be in the form of report.

The academic council of the institute on 10th Sept. 2020 has approved the following internship scheme in adherence to the guidelines of AICTE

- INTERNSHIP is mandatory for all UG programmes, otherwise students will not be eligible for the degree.
- One credit of INTERNSHIP is equivalent to 40-45 hrs of engagement and therefore the institute can go for 40 hrs per credit. Students admitted at Second Year of B. E. (SE) degree through lateral entry, required to complete the credits applicable from second year onwards of the course.
- To get the required credit, 640-800 hrs of industry-oriented training to be completed over the duration of four years. In no case it should be less than 600 hrs which is the minimum requirements as per AICTE guideline. For lateral entry at SE, it will be in proportionate with credit.
- Year wise distribution of numbers of hours and equivalent credits are shown in the scheme of the B. E programme.
- Scope of internship will be as per the perspective of various activities stated in the AICTE guidelines.
- INTERNSHIP in case of TCET will be In-house or Out-house and also Online or in face to face mode.
- Online INTERNSHIP students can pursue during the semester but it should not impact the semester attendance and academics
- In case of in-house INTERNSHIP students will be encouraged to supplement the training with some online certification in the related subjects.
- INTERNSHIP credit hours can be accumulated over the years and the credit can be given in only May examinations.
- Proper balance between in-house and outhouse INTERNSHIP needs to be balanced so that all students shall complete in time and become eligible for the award of degree as per the requirement of AICTE guidelines.

Lagdu Singh Chavitable Trust's («Regd.) THAKUR COLLEGE OF ENGINEERING & TECHNOLOGY Autonomous College Affiliated to University of Mumbai Approved by All India Council for Technical Education(AICTE) and Government of Maharashtra(GoM) Conferred Autonomous Status by University Grants Commission (UGC) for 10 years w.e.f. A.Y 2019-20 Amongst: Top 200 Colleges in the Country, Ranked 195<sup>4</sup> in NIRF. India Ranking 2019 in Engineering College category • ISO 9001:2015 Certified • Programmes Accredited by National Board of Accreditation (NRA), New Dellini • Institute Accredited by National Assessment and Accreditation Council (NACL), Dangalore

**Term-work Evaluation:** Evaluation of the Term work will be based on presentation and report. The criteria of evaluation will take into account:

- Quality of content presented
- Proper planning for presentation.
- Effectiveness of presentation.
- Depth of knowledge and skills.
- Attendance record, daily diary, departmental reports shall also be analysed along with the Internship Report.

#### **Programme Specific Term Work**

Laboratory work must contain implementation of minimum 10 experiments. The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing marks in term work.

The weightage of marks for continuous evaluation of term work or report: Formative (40%), Timely Completion of Practical (40%) and Attendance or learning attitude (20%)

The 25 marks of the term work should be divided as below:

25 Marks (total marks) = 10 Marks Lab. Experiments + 10 Marks Formative Assessment + 05 (Attendance: theory + practical)

Term Work is not a separate head of passing; however a learner is eligible to appear for any form of examination only after satisfactorily completion of Term Work in all

#### Major or additional Minor Degree through Specialization

- A student will be eligible to get Under Graduate degree with Honours or additional Minor Engineering, if he/she completes an additional 20 credits. These could be acquired through MOOCs.
- TCET will offer honour degree for major specialization.
- Every department has offered two specializations. Here we will form groups of the departments such that students from any of these groups will take any specialization of department within that group will have major degree and specialization of department belongs to another group will get minor degree.

E.g. Group -1: comprises of COMP, IT, ELEX, E&TC

Group-2: Mechanical

Group-3: Civil

Student of Electronics if takes specialization of IT as both the branch are of the same group student will get major degree and if the student from Civil branch is taking specialization from the COMP department (other group) then he/she will be offered minor degree.

Sr. No.	Name of the Department	Specialization Courses offered by the
		Department
1	Information Technology(IT)	1. Block chain
		2. Infrastructure Security
2	Computer	1. Artificial Intelligence
	Engineering(COMP)	2. Data Science
3	Electronics &	1. IoT
	Telecommunication(E&TC)	2. Communication Networks towards
		5G
4	Electronics(ELEX)	1. IoT
		2. Robotics
		3. Sensor Technology
5	Mechanical(MECH)	1. Energy Engineering
		2. 3 D Printing
6	Civil(CIVIL)	1. Infrastructure Engineering
		2. Green Technology and Sustainabilit

• The list of specialization courses offered by various department are as follows:
