		Prerequisi	te: Database	Managem	ent Sy	stem, I	Data wa	rehousing and Minin	g	

**<u>Course Objective</u>**: The course intends to deliver the fundamental of Data Science for data analysis, learn cutting edge tools and techniques for data analysis and Learn business decision making and Data Visualization.

## **<u>Course Outcomes:</u>** Upon completion of the course student will be able to:

S.No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Provide Insights about the Roles of a Data Scientist and enable to analyze the Big Data	L1, L2,L3
2	Demonstrate knowledge of statistical and exploratory data analysis data analysis techniques utilized in decision making.	L1,L2,L3,L4
3	Apply principles of Data Science to the analysis of business problems.	L1,L2,L3,L4
4	Apply knowledge of Data Visualization solve real-world problems.	L1,L2,L3,L4
5	Understand advanced data analytical methods	L1,L2,L3,L4
6	Provide data science solution to business problems and visualization.	L1,L2,L3,L4,L5

# **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	An Introduction to Data Science Definition, working, benefits and uses of Data Science, Data science vs BI, The data science process, Role of a Data Scientist	04	L1, L2,L3
2	Statistical Data Analysis & Inference Populations and samples, Statistical modelling, probability distributions, fittings a model, Statistical methods for evaluation, Exploratory Data Analysis	08	L1,L2,L3
3	Introduction to Data Visualization and Tools Understanding the fundamentals of data visualization, Introduction to Tableau and Power BI,Exploring the user interface and features of Tableau and Power BI, Data cleaning and transformation for visualization, Choosing appropriate chart types for different data scenarios, Creating interactive visualizations using Tableau and Power BI	12	L1,L2,L3,L4
4	Advanced Visualization and Dashboard Design           Advanced chart types and visualization techniques, Designing effective dashboards for data exploration and presentation , Applying best practices for visual storytelling in Tableau and Power BI, Data Journalism, Interactive dashboards	08	L1,L2,L3,L4
5	Advance Analytical Methods Text Analysis- Text analysis steps, A text analysis example, Collecting raw text and representing text, TF and TFIDF, Categorizing documents by topics, determining sentiments, Time series analytics- overview, ARIMA model,	08	L1,L2,L3,L4
6	Business problems and data science solutions Data Science and Business Strategy: Thinking Data- Analytically, Competitive Advantage with Data Science, Data Science Case Studies, Recommender systems ,Case Study: Global Innovation Network and Analysis	05	L1,L2,L3,L4,L5
	Total Hr.	45	

# List of Practical's/Experiments:

Practical No.	Type of Experiment	Tutorial/Experiment topic	Hrs	Cognitive levels of attainment as per Bloom's Taxonomy
1	Basic	Implementation of data pre-processing algorithms on any database	3	L1, L2,L3,L4
2	experiment	Implementation of basis statistics using R tool	3	L1, L2,L3,L4
3	Design Experiment	Develop a code Data cleaning and transformation for visualization.	2	L1, L2,L3,L4,L5

0

lce

Estd. 2001

4		Develop a code for Data visualization for basic plots	2	L1, L2,L3,L4,L5
5		Develop a code for Data visualization for advance plots	2	L1, L2,L3,L4,L5
6		Design and develop simple dashboard for marks entry	3	L1, L2,L3,L4,L5
		using Tableau.		
7		Design and develop simple dashboard for marks entry	3	L1, L2,L3,L4,L5
		<mark>using power Bi.</mark>		
8		Case study on Text Analysis using TFIDF	2	L1, L2,L3
9	Case study	R tool for data analytics science, usage of algorithms	2	L1, L2,L3
		in different applications		
10	Mini Ducient	Mini project on Business problems and emerging data	8	L1,
	Mini Project	science solutions		L2,L3,L4,L5,L6
		Total Hrs.	30

Prerequ	isite: Subs	tantial progr	amming ex	perience,	softwar	e engin	neering			

<u>Course Objective:</u> The course intends to deliver understanding of fundamentals of blockchain, list the concepts and blockchain technologies that can be used in application development

#### <u>Course Outcomes:</u> Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the components of blockchain and cryptocurrencies	L1,L2
2	Describe the concepts, technology and applications of Blockchain to be applied in the application	L1,L2
3	Distinguish and apply different consensus algorithm as per the requirement of application	L1,L2,L3
4	Get acquainted with different crypto currencies and their characteristics	L1,L2,L3,L4
5	Apply blockchain technology thinking to improve on existing products in IT	L1,L2,L3,L4,L5,L6
6	Design, build, and deploy a distributed application	L1,L2,L3,L4,L5,L6

#### **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Basics of Blockchain Distributed Database, Two General Problem, Byzantine General problem	7	L1,L2
	and Fault Tolerance ,Introduction, Advantage over conventional distributed database, Blockchain Network, Mining Mechanism, Distributed Consensus, Merkle Patricia Tree, Gas Limit, Transactions and Fee, Anonymity, Reward, Chain Policy, Life of Blockchain application, Soft & Hard Fork, Private and Public blockchain.		
2	Distributed Ledger Technology	8	L1,L2
	Cryptography: Hash function, Digital Signature - ECDSA, Memory Hard Algorithm, Zero Knowledge Proof, Digital Trust, Asset, Transactions, Distributed Ledger Technology, Types of network Components of blockchain or DLT, Ledger Blocks, Blockchain, PKI and Cryptography, Private keys, Public keys, Hashing, Digital Signature		
3	Distributed Consensus	8	L1,L2,L3,L4
	Nakamoto consensus, Proof of Work, Proof of Stake, Proof of Burn, Difficulty Level, Sybil Attack, Energy utilization and alternate		
	Cryptocurrency	7	L1,L2,L3,L4
4	Currency ,Double Spending, Cryptocurrenc, P2P Payment Gateway,Wallet, Mining,public blockchain and private blockchain,Other Crypt currencies		
	Ethereum and DAPPs	7	L1,L2,L3,L4,L5, L6
5	Ethereum network, EVM, Transaction fee, Mist, Ether, gas, Solidity, Smart contracts, Truffle, Web3, Design and issue Cryptocurrency, Mining , DApps, DAO		
	Hyperledger Fabric	8	L1,L2,L3,L4,L5,
6	Introduction to Hyperledger , What is Hyperledger , Why Hyperledger , Where can Hyperledger be used , Hyperledger Architecture , Membership , Blockchain ,Transaction , Chaincode , Hyperledger Fabric ,Features of Hyperledger		L6
<u> </u>	Total Hours	45	

#### **Capstone Project Guide Lines**

1. The mini project work is to be conducted by a group of three students

2. Each group will be associated with a subject Incharge/ mini project mentor. The group should meet with the concerned faculty during Laboratory hours and the progress of work discussed must be documented.

3. The students may do survey for different application which they can apply blockchain .

4. Students will do Installation, configuration and also try for Cross platform Integrated Development Environment

5. Students will try to Design and implement following points in their Mini Project

- a) Front end
- b) Middleware

c) Backend (Blockchain)

6. Each group along with the concerned faculty shall identify a potential problem statement for project development, on which the study and implementation is to be conducted.

7. Each group may present their work in various project competitions and paper presentations.

8. A detailed report is to be prepared as per guidelines given by the concerned faculty.

## **Capstone Project Hours Distribution:**

Sr. No.	Work to be done	No. of Hours	Cognitive levels of attainment as per Bloom's Taxonomy
1	Study Research papers, articles, mini project title Identification	4	L1, L2
2	Project Title finalization and development of Modules	2	L1, L2
3	Design methodology and tools for implementation	4	L1, L2
4	Implementation of Modules phase 1	4	L1, L2, L3
5	Result Phase I	2	L1, L2, L3, L4
6	Implementation of Modules Phase 2	4	L1, L2, L3
7	Result Phase II	2	L1, L2, L3, L4
8	Testing	2	L1, L2, L3, L4
9	Result validation	2	L1, L2, L3, L4, L5
10	Report Writing	4	L1, L2
	Total Hours	30

<u>Course Objective:</u> : Course should be able to deliver fundamental knowledge of Natural Language Processing and applying knowledge to implement real time problems in fields of natural languages. <u>Course Outcomes:</u> Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand field of natural language processing.	L1, L2
2	Analyze capabilities and limitations of current natural language technologies,	L1, L2, L3, L4
3	Apply the model linguistic phenomena with formal grammars.	L1, L2, L3, L4
4	Analyze and test algorithms for NLP problems & mathematical and linguistic foundations underlying approaches to the various areas in NLP	L1, L2, L3, L4
5	Understanding the concept of deep learning for NLP	L1, L2
6	Apply NLP techniques to design real world NLP applications such as text categorization, text summarization, information extraction	L1, L2,L3

## **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
	Introduction to Natural Language Processing	-	
1	History of NLP, Generic NLP system, levels of NLP, Knowledge in language processing, Ambiguity in Natural language, stages in NLP, challenges of NLP.	8	L1, L2

TCET DEPARTMENT OF INFORMATION TECHNOLOGY (IT

(Accredited by NBA for 3 years, 4th Cycle Accreditation w.e.f. 1st July 2022)

Choice Based Credit Grading System (CBCGS) Under TCET Autonomy

	Word Level Analysis		
2	Morphology analysis –survey of English Morphology, Inflectional morphology & Derivational morphology, Lemmatization, Regular expression, finite automata, finite state transducers (FST), Morphological parsing with FST, Lexicon free FST Porter stemmer. N –Grams- N-gram language model, N-gram for spelling correction.	7	L1, L2, L3, L4
	Syntax Analysis		
3	Part-Of-Speech tagging (POS)- Tag set for English (Penn Treebank), Rule based POS tagging, Stochastic POS tagging, Issues –Multiple tags & words, Unknown words. Introduction to CFG, Sequence labeling: Hidden Markov Model (HMM), Maximum Entropy, and Conditional Random Field (CRF).	7	L1, L2, L3, L4
	Semantic Analysis		
4	Lexical Semantics, Attachment for fragment of English- sentences, noun phrases, Verb phrases, prepositional phrases, Relations among lexemes & their senses –Homonymy, Polysemy, Synonymy, Hyponymy, WordNet, Robust Word Sense Disambiguation (WSD) ,Dictionary based approach ,Pragmatics	8	L1, L2, L3, L4
	Natural Language processing with deep learning		
5	Introduction to deep learning, Neural network models for language understanding tasks, Machine translation, use of tool like tensor flow	7	
	Applications and recent trends in NLP		
6	Information retrieval, Question answers system, categorization, text summarization, sentiment analysis, Named Entity Recognition, spam filter speech recognition.	8	L1, L2,L3
	Total Hours	45	

## **Capstone Project Guide Lines**

- 1. The mini project work is to be conducted by a group of three students
- 2. Each group will be associated with a subject Incharge/ mini project mentor. The group should meet with the concerned
- 3. faculty during Laboratory hours and the progress of work discussed must be documented.
- 4. The students may do survey for different application which they can create project using various tool of NLP.
- 5. Students will do Installation, configuration of Natural Language tool kit (NLTK) or any other tool which is required tool
  - for their project work.
- 6. Students will try to Design and implement following points in their Mini Project (Natural Language Processing)
- a) Implementing a pre-trained model
- b) Deploying the model as an API
- c) Connecting the API to your main application
- d) Write a Python script to serve up predictions.
- e) Write a configuration file to define your deployment.

7.Each group along with the concerned faculty shall identify a potential problem statement for NLP applications, on which the study and implementation is to be conducted.

8. Each group may present their work in various project competitions and paper presentations.

A detailed report is to be prepared as per guidelines given by the concerned faculty.

# **Capstone Project Hours Distribution:**

**Course Objective:** To evaluate storage architectures, including storage subsystems, DAS, SAN, NAS, and CAS. Define backup, recovery, disaster recovery, business continuity, and replication. Examine emerging technologies including IP-SAN. Understand logical and physical components of a storage infrastructure. Identify components of managing and monitoring the data center. Define information security and identify different storage virtualization technologies.

## <u>Course Outcomes:</u> Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Analyse the limitations of the client-server architecture and evaluate the needfor data protection and storage centric architectures such as Intelligent storage system.	L1,L2
2	Understand, interpret and examine various SAN technologies.	L1,L2,L3,L4
3	Describe and sketch the SAN architecture and its uses.	L1,L2,L3,L4
4	Classify the applications as per their requirements and select relevant SAN solutions.	L1,L2,L3,L4,L5,L6
5	Understand and evaluate different SAN management strategies to fulfill business continuity requirements.	L1,L2,L3,L4,L5,L6
6	Design case studies on NAS, SAN and SAN/ NAS	L1,L2,L3,L4,L5,L6

# **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to Information Storage Technology	7	L1,L2
	Review data creation and the amount of data being created and understand the value of data to a business, Challenges in Data Storage and Management, Data Storage Infrastructure. Introduction to Storage Technologies Overview of Storage Network: - Intelligent Storage Systems (ISS), Data protection (RAID implementation methods). RAID arrays, RAID technologies, RAID levels, RAID impact on disk performance & RAID comparison, SCSI, SAN: FC SAN FC Protocol Stack, IP Storage, InfiniBand, Virtual Interfaces, Comparison of NAS, FC SAN and iSCSI SAN. Disadvantages of traditional server centric architecture, Storage centric architecture and its advantages.		
2	Network Attached Storage, Storage on Network	7	L1,L2,L3,L4
	Network Attached Storage (NAS) NAS hardware and software architecture, NAS connectivity, NAS as a StorageSystem; NAS Hardware devices; NAS software components; NAS connectivity options: NAS connectivity hardware and Software Architecture.		
3	Storage Area Networks Architecture Overview	10	L1,L2,L3,,L4
	Architecture Overview: : SAN Components and Infrastructure Creating Network for storage; Hardware devices: Fibre Channel Switch, Host Bus Adaptors, Putting the Storage in SANs, Fabric Operation from a hardware perspective, SAN hardware considerations; Software Components: The switches operating system, device drivers, the supporting components, considerations for SAN software; Configuration options for SANs: Connecting into the data center, the evolving network and device connections, SAN configuration guidelines. Storage devices in SAN: Disk arrays, Tape libraries, SSDs Host Bus Adapters (HBAs) and their role in SAN connectivity Fabric components: switches, directors, routers Redundancy and fault tolerance in SAN design Virtual SAN (VSAN) and its implementation		
4	Storage Virtualization	7	L1,L2,L3,L4,L5,
4	Forms, Taxonomy, Configuration, Challenges, Types of Storage Virtualizations. SAN Management and Administration SAN configuration and deployment best practices Storage provisioning and allocation in SAN Performance monitoring and optimization techniques Data migration and replication in SAN Troubleshooting common SAN issues		L6
	Management Planning business continuity	9	L1,L2,L3,L4,L5,

Under TCET Autonomy

	Total Hours	45	
6	Storage Security and ManagementSecurity Framework, Storage security domains, List and analyzes the common threats in each domain, Security Implementations.Case studies on NAS, SAN, SAN/NAS.A case study to design a storage area network for an organization considering the following guidelines: SAN Implementation, SAN Management, SAN Virtualization, SAN Disaster Recovery and Security	5	L1,L2,L3,L4,L5, L6
5	Defining the environment, the role of storage networking in business continuity, storage design and implementation of the business continuity planning ; Managing availability: Availability Metrics, Implementing the plan ; Maintaining Serviceability: Tracking the configurations, Investigating the changes and closing the loop on serviceability; Capacity Planning: Storage Analysis, developing and implementing plan for storage, Modelling performance and capacity requirements ; Security considerations: Overview of Information security, Security methods, Storage Security challenges, FC SAN security, NAS security. Overview of Storage Security: Define storage security, Storage security framework: Security attributes (Confidentiality, Integrity, Availability, Accountability), Security Elements: Assets(Information, Hardware, Software, Network Infrastructure), Threats, Vulnerabilities Security Controls: Technical (implemented in hardware, software and firmware), Non-Technical: Administrative(Policies, Standards), FC SAN security, Basic SAN Security Mechanisms, Securing Switch Ports.		L6

## Capstone Project Guide Lines

1. The mini project work is to be conducted by a group of three students

2. Each group will be associated with a subject Incharge/ mini project mentor. The group should meet with the concerned faculty during Laboratory hours and the progress of work discussed must be documented.

3. The students may do survey for different application which they can create Apps using Android.

4. Students will do Installation, configuration of Android Studio & to create AVD and also try for Cross platform Integrated Development Environment (Any Open Source Tool).

- 5. Students will try to Design and implement following points in their Mini Project (Android Apps)
  - a) Widget box for Android phone.
  - b)Use Layouts
  - c) Use Intents
  - d)Use Activity
  - e) Use SQLite
  - f) Use Camera
  - g)Use Location API
  - h)Generate APK file

6. Each group along with the concerned faculty shall identify a potential problem statement for Appsdevelopment, on which the study and implementation is to be

#### conducted.

- 7. Each group may present their work in various project competitions and paper presentations.
- 8. A detailed report is to be prepared as per guidelines given by the concerned faculty.

<u>Course Objective:</u> This course is intended to teach introduction to ERP and related technologies, basics of how ERP (Enterprise Resource Planning) helps businesses grow in many ways. The course also discusses ERP Manufacturing Perspective and ERP modules. It will teach the learners about ERP implementation lifecycle, emphasis on ERP benefits and introduces the ERP tools& how ERP is used with E-business & E-Commerce.

## <u>Course Outcomes:</u> Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the basic concepts of ERP.	L1,L2
2	Identify different technologies used in ERP.	L1,L2,L3,L4
3	Understand and Apply the concepts of ERP Manufacturing Perspective and ERP Modules.	L1,L2,L3,L4
4	Discuss the benefits of ERP	L1,L2,L3,L4
5	Understand and implement the ERP life cycle.	L1,L2,L3,L4,L5,L6
6	Understand & Apply concepts of E business & E-Commerce with ERP & future of ERP.	L1,L2,L3,L4,L5,L6

## **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction to ERP Concept of ERP, Origin, Evolution of ERP, Conceptual Model of ERP, The Structure of ERP, Need of ERP, Advantages and Disadvantages of ERP, Functions of ERP, Overview of available ERP Packages and Tools. NIT Raipur	4	L1,L2
2	ERP Related Technology and Manufacturing Perspective BPR-Business Processing Reengineering, Data Warehousing, Data Mining, On-line Analytical Processing(OLAP), SCM-Supply Chain Management, CRM-Customer Relationship Management, MIS - Management Information System, DSS - Decision Support System, EIS - Executive Information System	8	L1,L2,L3,L4
3	ERP Manufacturing Perspective and ERP Modules MRP - Material Requirement Planning, BOM - Bill of Material, MRP -Manufacturing Resource Planning, DRP - Distributed Requirement Planning, PDM - Product Data Management Finance, Plant Maintenance, Quality Management, Materials Management	10	L1,L2,L3,,L4
4	Benefits of ERP         Reduction of Lead-Time, On-time Shipment, Reduction in Cycle Time, Improved Resource Utilization, Better Customer Satisfaction, Improved Supplier Performance, Increased Flexibility, Reduced Quality, Costs, Improved Information Accuracy and Design-making Capability.	6	L1,L2,L3,L4
5	<b>ERP Implementation Lifecycle</b> Pre-evaluation Screening, Package Evaluation, Project Planning Phase, Gap Analysis, Reengineering, Configuration, Implementation Team Training, Testing, Going Live, End-user Training, Post- implementation (Maintenance mode).	7	L1,L2,L3,L4,L5,L 6
6	Present & Future Directions in ERP Turbo Charge the ERP System – EIA – ERP and E–Commerce – ERP and Internet – Future Directions in ERP. E Commerce Business, E Commerce Categories, ERP & E Commerce, ERP Features Important for E Commerce Business, E- Business, Types of E- Business, E-Business Structural Transformation, ERP: The Technological Backbone of E-Business, Challenges of E-Business, Enterprise Architecture, E- Procurement Process, Benefits of E-Procurement Process, E-Governance, E- Logistics, E-markets, Electronic Business Process Optimization.	10	L1,L2,L3,L4,L5,L 6
	Total Hours	45	

## **Capstone Project Guide Lines**

- 1. The mini project work is to be conducted by a group of three students
- 2. Each group will be associated with a subject Incharge/ mini project mentor.
- The group should meet with the concerned faculty during Laboratory hours and the progress of

work discussed must be documented.

- 3. The students may do survey for different application which they can create Website (Enterprise or E-commerce)
- 4. Students will do Installation, configuration of softwares which required to implement websites

(Any Open Source Tool).

- 5. Students will try to Design and implement following points in their Mini Project (Website)
- a) Widget box for Android phone.
- b) Use Layouts
- c) Use Intents
- d) Use Activity
- e) Use Database
- f) Use Camera
- g) Use Location API
- h) Host website

6. Each group along with the concerned faculty shall identify a potential problem statement for Website development, on which the study and implementation is to be conducted.

7. Each group may present their work in various project competitions and paper presentations.

8. A detailed report is to be prepared as per guidelines given by the concerned faculty.

## **Capstone Project Hours Distribution:**

Sr. No.	Work to be done	No. of Hours	Cognitive levels of attainment as per Bloom's Taxonomy
1	Study Research papers, articles, mini project title Identification	4	L1, L2
2	Project Title finalization and development of Modules	2	L1, L2
3	Design methodology and tools for implementation	4	L1, L2
4	Implementation of Modules phase 1	4	L1, L2, L3
5	Result Phase I	2	L1, L2, L3, L4
6	Implementation of Modules Phase 2	4	L1, L2, L3
7	Result Phase II	2	L1, L2, L3, L4
8	Testing	2	L1, L2, L3, L4
9	Result validation	2	L1, L2, L3, L4, L5
10	Report Writing	4	L1, L2
	Total Hours	30

#### **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
	Introduction to Evolutionary Computation		
	Introduction and Overview Biological and artificial evolution, Evolutionary computation and AI, Search spaces and fitness landscapes, elements of genetic algorithms, a simple genetic algorithm, genetic algorithms and traditional search methods how do genetic algorithms work?	06	L1, L2
	Genetic Algorithms in Problem Solving		
	Genetic Algorithm -Representation, operators, and standard algorithm. The building block hypothesis and the schema theorem Evolving computer programs- lisp program, cellular automata Data analysis and prediction- predicting dynamical systems, predicting protein structure Evolving neural networks- evolving weights in a fixed network, evolving network architectures, direct encoding, grammatical encoding, evolving a learning rule		L1,L2,L3,L4,L5
	Mathematical Foundations of Genetic Algorithm	08	
		00	
3	Schemas and Two-Armed and k-armed problem, royal roads, exact mathematical models of simple genetic algorithms, Statistical- Mechanics Approaches. When should a genetic algorithm be used? Encoding a problem for a genetic algorithm, adapting the encoding, selection methods genetic operators, parameters for genetic algorithms		
	Genetic Programming		
4	Trees as individuals, Major steps of genetic programming, e.g., functional and terminal sets, initialization, crossover, mutation, fitness evaluation, etc. Search operators or trees, Automatically defined functions, Issues in genetic programming, e.g., bloat scalability, etc., Examples		L2,L3,L4,L5
	Swarm intelligence and Multi - objective Evolutionary Optimization		
5	Particle swarm optimization, Ant colony optimization, Artificial bee colony algorithm, cuckoo search. Pareto optimality, Multi - objective evolutionary algorithms. Modularity and regularity in evolution. The scaling problem and the curse of dimensionality. Evolvability. Module acquisition. Developmental models. Compositional and hierarchical approaches.		L2,L3,L4,L5
	Applications of Genetic Algorithms		
6	Optimization problems and its types, Economics, Neural Networks, Parallelization ,Image Processing, Vehicle routing problems, Scheduling applications, Machine Learning, Robot Trajectory Generation, Parametric Design of Aircraft, DNA Analysis, Multimodal Optimization	07	L2,L3,L4,L5
	Total Hours	45	

#### **Capstone Project Guide Lines:**

1. The mini project work is to be conducted by a group of three students

2. Each group will be associated with a subject In charge/ mini project mentor. The group should meet

with the concerned faculty during Laboratory hours and the progress of work discussed must be documented. 3. The students may do survey for different application which they can create application using any programming language.

4. Students will try to Design and implement in their Mini Project

6. Each group along with the concerned faculty shall identify a potential problem statement for Apps development,

on which the study and implementation is to be conducted.

7. Each group may present their work in various project competitions and paper presentations.

8. A detailed report is to be prepared as per guidelines given by the concerned faculty.

## Capstone Project Hours Distribution:

Sr. No	Work to be done	No. of Hours	Cognitive levels of attainment as per Bloom's Taxonomy
1	Study article/ research paper & identification of project title.	4	L1, L2,L3
2	Finalizing title and identification of project modules.	4	L1,L2,L3,L4,L5
3	Design & Methodology	2	L2,L3,L4,L5
4	Implementation of modules phase I	4	L2,L3,L4,L5
5	Result & discussion of phase I	4	L2,L3,L4,L5
6	Implementation of modules phase II	4	L2,L3,L4,L5
7	Result of phase II and validation of modules	4	L1,L2,L3,L4,L5
8	Report writing	4	L1,L2,L3,L5
	Total hours	30

**Course Objective:** The objective of the course is to familiarize the students with the use of a structured methodology/approach for each and every unique project undertaken, including utilizing project management concepts, tools and techniques and appraise the students with the project management life cycle and make them knowledgeable about the various phases from project initiation through closure.

Course Outcomes: Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Apply selection criteria and select an appropriate project from different options	L1, L2, L3, L4
2	Write work break down structure for a project and develop a schedule based on it	L1, L2, L3, L4
3	Identify opportunities and threats to the project and decide an approach to deal with them strategically	L1, L2, L3, L4
4	Use Earned value technique and determine & predict status of the project	L1, L2, L3, L4
5	Compare and contrast various project execution, Monitoring and Controlling Projects, Project Contracting, Project Leadership and Ethics and Closing the Project	L1, L2, L3, L4
6	Capture lessons learned during project phases and document them for future reference	L1, L2,

R

#### **Detailed Syllabus:**

Module No.	e Topics		Cognitive levels of attainment as per Bloom's Taxonomy	
1	Project Management Foundation	6	L1, L2, L3,	
	Definition of a project, Project Vs Operations, Necessity of project		L4	
	management, Triple constraints, Project life cycles (typical & atypical)			
	Project phases and stage gate process. Role of project manager,			
	Negotiations and resolving conflicts, Project management in various			
	organization structures, PM knowledge areas as per Project			
	Management Institute (PMI)			
2	Initiating Projects	6	L1, L2, L3, L4	
	How to get a project started, Selecting project strategically, Project			
	selection models (Numeric /Scoring Models and Non-numeric models),			
	Project portfolio process, Project sponsor and creating charter; Project			
	proposal. Effective project team, Stages of team development & growth			
	(forming, storming, norming & performing), team dynamics			
3	Project Planning and	8	L1, L2, L3, L4	
	Scheduling			
	Work Breakdown structure (WBS) and linear responsibility chart,			
	Interface Co-ordination and concurrent engineering, Project cost estimation and budgeting, Top down and bottoms up budgeting,			
	Networking and Scheduling techniques. PERT, CPM, GANTT chart, Introduction to Project Management Information System (PMIS)			
4	Planning Projects	8	L1, L2, L3, L4	
4	Crashing project time, Resource loading and levelling, Goldratt's critical	0	L1, L2, L3, L4	
	chain, Project Stakeholders and Communication plan Risk Management			
	in projects: Risk management planning, Risk identification and risk			
	register, Qualitative and quantitative risk assessment, Probability and			
	impact matrix. Risk response strategies for positive and negative risks			
5	Executing Projects, Monitoring and Controlling Projects & Project	10	L1, L2, L3, L4	
	Contracting	10	L1, L2, L3, L1	
	5.1 Executing Projects: Planning monitoring and controlling cycle,			
	Information needs and reporting, engaging with all stakeholders of the			
	projects, Team management, communication and project meetings 5.2			
	Monitoring and Controlling Projects: Earned Value Management			
	techniques for measuring value of work completed; Using milestones			
	for measurement; change requests and scope creep, Project audit. 5.3			
	Project Contracting : Project procurement management, contracting and			
	outsourcing,			
6	Project Leadership and Ethics & Closing the Project	7	L1, L2	
	6.1 Project Leadership and Ethics: Introduction to project leadership,	1		
	ethics in projects, Multicultural and virtual projects 6.2 Closing the			
	Project: Customer acceptance; Reasons of project termination,			
	Various types of project terminations (Extinction, Addition,			
	Integration, Starvation), Process of project termination, completing a			
	final report; doing a lessons learned analysis; acknowledging			
	successes and failures; Project management templates and other			
	resources; Managing without authority; Areas of further study

# **Course objectives:**

1. To understand the importance energy security for sustainable development and the fundamentals of energy conservation.

2. To introduce performance evaluation criteria of various electrical and thermal installations to facilitate the energy management

3. To relate the data collected during performance evaluation of systems for identification of energy saving opportunities.

Course outcomes: After successful completion of the course student will be able:-

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	To identify and describe present state of energy security and its importance.	L1
2	To identify and describe the basic principles and methodologies adopted in energy audit of any utility.	L1, L2, L3
3	To describe the energy performance evaluation of some common electrical installations and identify the energy saving opportunities.	L1, L2, L3, L4
4	To describe the energy performance evaluation of some common thermal installations and identify the energy saving opportunities	L1, L2, L3, L4
5	To analyze the data collected during performance evaluation and recommend energy saving measures	L1, L2, L3
6	To understand the concept of Energy conservation measures in building complex	L1

## **Detailed Syllabus**

Module No.	Unit No.	Hrs	Cognitive levels of attainment as per Bloom's Taxonomy	
1		Energy Scenario & Energy Conservation measures	06	L1
	1.1	Present Energy Scenario	-	
	1.2	Renewable and Non-Renewable form of Energy	_	
	1.3	Greenhouse Gas effect, Acid Rain, Energy Pricing, Energy Sector Reforms,	-	
	1.4	Energy Conservation and its Importance: Energy Conservation Act-2001 and its features. Role of Bureau of Energy Efficiency (BEE), Energy Security, Basic idea of Material and Energy balance		
2		Energy Audit & Energy Economics	08	L1, L2, L3
	2.1	Energy Audit: Definition, need, types of energy audit, Steps of detailed Energy Audit, Role of Energy Manager and Internal audit Team,		
	2.2	Measuring instruments & Equipment used during Energy audit		
	2.3	Understanding energy costs, Bench marking, Energy performance,	-	
	2.4	Matching energy use to requirement,Maximizing system efficiencies, Optimizing the input energy requirements, Fuel and energy substitution	-	
	2.5	Elements of monitoring & targeting, Data and information analysis.	-	
	2.6	Energy Economics: Simple payback period (SPP), Net Present value (NPV), Return on investment (ROI), Internal rate of return (IRR)		
3		Energy Management in Electrical System	10	L1, L2, L3, L4
	3.1	Electricity billing, Basic concept of Electrical load management, Maximum demand Control, Energy management through Power factor improvement		
	3.2	Energy efficient equipment and appliances, Star ratings of Electrical Equipment.		
	3.3	Lighting System control: Occupancy sensors, daylight integration, and use of intelligent controllers. Energy efficiency measures in lighting system		
	3.4	<u>Energy conservation opportunities</u> in water pumps, industrial drives, induction motors, soft starters, variable speed drives.		
4		Energy Management in Thermal Systems	10	L1. L2, L3,L4
•	4.1	Review of different thermal loads,		,,,,
		<u>Steam System</u> : Basic idea of Steam distribution system, Assessment of steam distribution losses, Steam leakages, Steam trapping, Condensate and flash steam recovery system, Energy conservation in Steam distribution system,		
	4.2	<u>Boiler System</u> : General fuel conservation measures in Boilers and furnaces, Waste heat recovery, cogeneration, use of insulation-types and application.		

0

lce

Estd. 2001

	4.3	<u>HVAC system</u> : Coefficient of performance, Capacity, factors affecting performance of Refrigeration and Air Conditioning		
		system performance, Energy savings opportunities in HVAC system.		
5		Energy Performance Assessment	06	L1, L2, L3,
	5.1	Performance assessment of Motors, variable speed drive, pumps,		
	5.2	Lighting System calculations: Installed Load Efficacy Ratio (ILER) method,		
	5.3	<u>HVAC system calculations;</u> various terms used in assessment of performance		
6		Energy conservation in Residential and Commercial Buildings	05	L1
	6.1	Energy Conservation Building Codes (ECBC)		
	6.2	Green Building norms, LEED ratings of buildings, Use of renewable energy sources in building complex		
		Total	45

**Course Objective:** The course intends to apply the concept of Innovation in Business.

#### <u>Course Outcomes</u>: Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Able to analyze and apply impact of innovation on society	L1,L2,L4
2	Able to understand the role of technology in creating wealth	L1,L2,L3
3	Recognize markers of business models which appear as a response to digital revolution	L1,L2,L3,L4
4	Search for real cases which represent new business models	L1,L2,L3,L4
5	Identify similar and distinguished features of business build on identical business models	L1,L2,L3,L4
6	Know the most important cases of data-driven business founded on new business models	L2,L4

# **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
01	Sources of Innovation	08	L1,L2,L4
	<b>Sources of Innovation:</b> Innovation / wealth creation process, three critical trajectories impacting the innovation process creative transformations, the importance of technological Innovation, The impact of technological innovation on society. Case study on impact of technological innovation on society.		
	Industry dynamics of technological innovation, transcending creativity into innovation, innovation as a collaborative effort.		
02	Types and patterns of innovation	06	L1,L2,L3
	<b>Types and patterns of innovation</b> : Technology S curves, formulation of technological innovation strategy, implementing technological innovation strategies. Managing new product development. Case study on new product development.		
03	Collaboration strategies and Choosing innovative projects	08	L1,L2,L3,L4
	<b>Collaboration Strategies:</b> The role of technology in the creation of wealth, historical perspective, long-wave cycle, evolution of production technology, technology and national economy. Case study on Collaboration Strategies.		
	<b>Choosing innovative projects:</b> Management of technology, the conceptual frame work, technology and society, knowledge and technology, technology and business. Case study on How to choose innovative projects.		
04		8	L1,L2,L3,L4
	Introduction to Business Models           What is a Business Model? Importance of Business Model. History of Business Model. Type of Business Model		
05		8	L1,L2,L3,L4
	Business models as a key concept of strategic management. Variety of business model frameworks: Canvas, 'Zott-Amit' model, BM navigator, 4W approach, Hybrid business models. Resource-based view (RBV). Industrial organization.		
06	Digital business models. E-commerce. Innovative business model in retail and consumer goods. Omnichannel retail. Manufacturing business models. Digital manufacturing. Developers as new decision makers. Case-study of Apple,	7	L2,,L4,
	Android, Tinkoff.	45

**Prerequisite: Algorithm, Programming** 

# Course Objective:

The Objective of this course is to deliver the fundamental concepts of theory of computation describing formal mathematical models of computation such as FA,PDA,LBA and TM by comparing their power, limitations, languages and their applications in computation and complexity theory and also to learn that not all problems are solvable by computers.

#### **Course Outcomes:**

Upon completion of the course students will be able to:

		Taxonomy
1	understand the basic concepts of social networks	L1, L2, L3
2	understand the fundamental concepts in social network mining	L1, L2, L3
3	understand the modelling and visualization of network	L1, L2, L3
4	understand the concepts of social network graph analysis	L1, L2, L3,L4
5	Perform visualization and exploration using Gephi software.	L1, L2, L3,L4
6	understand the dynamic social networks	L1,L2

**Course Objective:** This course discusses taxation, its principles, its objectives, and its effects; the nature and purposes of taxation, whether taxes should be classified as direct or indirect. It also instils an awareness in students that taxes constitute significant costs to businesses and households and therefore have a major impact in economic and other decision-making, also these costs are potentially controllable through legitimate tax minimisation strategies. The course also shall enable students to appreciate the wider economic, social, administrative-compliance and political contexts within which taxes are imposed.

#### Course Outcomes: Upon completion of the course, students will be able to:

SN	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand the basic principles of taxation in India and the various provisions of Income Tax Act 1961	L2
2	Understand and apply the computation of taxable income under the heads capital gain and other sources	L3
3	Apply the provisions of clubbing of income, set off of losses and deductions permitted under the Income Tax Act, 1961.	L3
4	Analyze the computation of taxable income under the head Salaries, Income from House Property and Profits and Gains of Business or Profession	L4
5	Differentiate between Direct and Indirect Tax	L4
6	Understand the Concept of Service Tax and laws	L2

**Course Objectives:** Course intended to deliver the fundamental knowledge of basic principles involved in design of new product and its development.

# Course Outcomes: Upon completion of the course, students will be able to:

SN	Course Outcomes	Cognitive levels as per bloom's Taxonomy
1	Identify design and development process of industrial products, considering Ergonomic requirements.	L1, L2
2	Explain market requirements and manufacturing aspects of industrial design.	L1, L2, L3
3	Identify consumer products, functions and use.	L1, L2, L3
4	Explain aesthetic concept, symmetry.	L1, L2, L3, L4
5	Explain economic considerations, value analysis and cost reduction.	L1, L2
6	Employ standard organization structure, standardization, record keeping.	L1, L2, L4, L5, L6

# **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels as per bloom's Taxonomy
	Introduction-Approach to Industrial Design		
1	Approach to industrial product based on idea generation and innovations to meet the needs of the developing society. Design and development process of industrial products, various steps such as creative process involved in idea marketing, designers, mind- criticism, design process, creation. Ergonomics and aesthetic requirements of product design, quality and maintainability consideration in product design, Use of modeling technique, prototype designs, conceptual design.	4	L1, L2
	Industrial Product Design		
2	General design situations, setting specifications, requirements and ratings, their importance in the design, Study of market requirements and manufacturing aspects of industrial designs. Aspects of ergonomic design of machine tools, testing equipment, instruments, automobiles, process equipment etc. Convention of style, from and color of industrial design.	8	L1, L2, L3
	Design of Consumer Product		
3	Functions and use, standard and legal requirements, body dimensions. Ergonomic considerations, interpretation of information, conversions for style, forms, colors.	8	L1, L2, L3, L4
	Aesthetic Concepts		
4	Concept of unity order with variety, concept of purpose, style and environment, Aesthetic expression of symmetry, balance, contrast and continuity, proportion, rhythm, radiation. Form and style of product: visual effect of line and form, mechanics of seeing, psychology of seeing, influence of line and form, Components of style, Basic factors, effect of color on product appearance, color composition, conversion of colors of engineering products.	8	L1, L2, L3
	Economic Considerations		
5	Selection of material, Design for production, use of standardization, value analysis and cost reduction, maintenance aspects in design.	10	L1, L2, L3, L4
	Design Organization		
6	Organization Structure, Designer position, Drawing office procedure, Standardization, record keeping, legal procedure of Design patents.	7	L1, L2, L4, L5,L6
	Total	45

**Course Objectives**: The course intends to deliver the fundamentals of problems and challenges that need IT based solutions. Students will be introduced to the vast array of literature available of the various research challenges in the field of IT. Also To create awareness among the students of the characteristics of several domain areas where IT can be effectively used and to improve the team building, communication and management skills of the students. **Course Outcomes: Upon completion of the course students will be able to:** 

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Discover potential research areas in the field of IT	L1, L2, L3,L4
2	Conduct a survey of several available literature in the preferred field of study	L1, L2, L3
3	Compare and contrast the several existing solutions for research challenge	L1, L2, L3,L4,L5
4	Demonstrate an ability to work in teams and manage the conduct of the research study	L1, L2, L3,L4
5	Formulate and propose a plan for creating a solution for the research plan identified	L1, L2, L3,L4
6	To report and present the findings of the study conducted in the preferred domain	L1, L2, L3,L4

# **Guidelines:**

- 1. The project work is to be conducted by a group of three students
- 2. Each group will be associated with a project mentor/guide. The group should meet with the project Mentor/guide periodically and record of the meetings and work discussed must be documented.
- 3. Department has to allocate 1 day in VII semester and 2 day in VIII semester every week.
- 4. Students will do literature survey in Sem VI or Sem VII.
- 5. Students will do design, implementation and coding in Sem VII.
- 6. Each group along with its guide/mentor shall identify a potential research area/problem domain, on which the study is to be conducted.
- 7. Each team will do a rigorous literature survey of the problem domain by reading and understanding at least 3-5 research papers from current good quality national/international journals/conferences. (Papers selected must be indexed by Scopus/IEEE/Springer/ACM etc.). The list of papers surveyed must be clearly documented.

8. The project assessment for term work will be done at least two times at department level by giving presentation to panel members which consist of at least three (3) members as internal examiners (including the project guide/mentor) appointed by the Head of the department of respective Programme.

9. A report is to be prepared summarizing the findings of the literature survey. A comparative evaluation of the different techniques surveyed is also to be done.

10. Students will do testing and analyze in Sem VIII

11. Teams must analyze all the results obtained by comparing with other standard techniques.

12. Every team must publish their work in national / international conference/journals (if possible publish in Scopus indexed journals).

13. Teams can go for patenting/Copyright of their respective projects if the work is found to be unique.

14. There can be provision for converting project to product to startup.

# **AC= Activity Evaluation**

Total weightage of marks for continuous evaluation of Term Work/ Report : Formative (40%) , timely completion of practical (40% ) and Attendance /Learning Attitude (20%)

Prerequisite: MS-Word

<u>Course Objective</u>: This course will help to create understanding of the LaTeX To understand the fundamentals of Scilab and Utilization Development of Proficiency in English and Communication Skills.

# <u>Course Outcomes:</u> Upon completion of the course students will be able to:

Sr. No.	Course Outcomes	Cognitive levels of attainment as per Bloom's Taxonomy
1	Understand how to Download and install a comprehensive LATEX distribution	L1,L2,L3
2	Review and Create basic types of LATEX documents	L1,L2,L3
3	Understanding how to Import graphics	L1,L2,L3,L4
4	Build a documents using Listing content and references	L1,L2,L3,L4
5	Build large documents with all futures of LATEX	L1,L2,L3,L4,L5,L6
6	Understand how to create professional presentations using LATEX	L1,L2,L3,L4,L5,L6

#### **Detailed Syllabus:**

Module No.	Topics	Hrs.	Cognitive levels of attainment as per Bloom's Taxonomy
1	Introduction	2	L1,L2,L3
	Introduction to LaTeX, installation, and different IDEs. Document creation		
	using LaTeX, organizes content into sections using article and book class		
	of LaTeX.		
2	Styling Pages		
	Examines packages, formats the page by setting margins, customizing	3	L1,L2,L3
	header and footer, changing the page orientation, dividing the document		
	into multiple columns. Reading different types of error messages.		
3	Formatting Content	3	L1,L2,L3,,L4
	Formatting text (styles, size, alignment), adding colors to text and entire		
	page, bullets and numbered items. Process of writing complex mathematics.		
	Tables and Images	3	L1,L2,L3,l4
4	Creating basic tables, adding simple and dashed borders, merging rows and		
	columns, and handling situations with a table exceeds the size of a page.		
	Add an image, explore different properties like rotate, scale, etc.		
	Referencing and Indexing	2	L1,L2,L3,L4,L5, L6
5	Add cross-referencing (refer to sections, table, images), add bibliography		Lo
	(references), and create back index.		
6	Presentation using Beamer	2	L1,L2,L3,L4,L5, L6
0	Introduction to creating slides, adding frames, dividing the slide into		LO
	multiple columns, adding different blocks, etc.		
	Total Hours	15	

# Suggested Practical List:

Sr No.	Type of experiment	Practical/Experiment topic	Hrs	Cognitive levels of attainment as per Bloom's Taxonomy
1	Basic Experiment	Installation of the software LaTeX	2	L1, L, L3,L4
2		Examines and understand packages, formats the page by setting margins, customizing header and footer, changing the page orientation, dividing the document into multiple columns.	3	L1, L2, L3,L4
3	DesignCreate template using Latex compilation Basic Syntex, WritingExperimentequations, Matrix, Tables		3	L1, L2, L3,L4

lce

Estd. 2001

	1			
4		Create Page Layout with Titles and Abstract Chapters	2	L1, L2, L3,L4
5		Create List making environments: Table of contents, Generating new commands, Figure handling numbering, List of figures, List of tables, Generating index.	3	L1, L2, L3,L4
6		Create template with Sections	2	L1, L2, L3,L4
7	Advance	Create template with References, Equation references, citation.	3	L1, L2, L3,L4
8	Experiment	Create a template by Adding an image, explore different properties like rotate, scale, etc.	3	L1, L2, L3,L4
9		create slides, adding frames, dividing the slide into multiple columns, adding different blocks, etc.	3	L1, L2, L3,L4
10	Mini Project	Mini Project	6	L1, L2, L3,L4,L5,L6
		Total	30

Prerequis	ite: Subject	knowledge, I	Domain knov	vledge				

<u>Course Objectives:</u> This course is focused to engage the learner in research using critical thinking, problem solving, coding and technical writing related to upcoming latest technologies.

# <u>Course Outcomes:</u> Upon completion of the course students will be able to:

S.N.	Course Outcome	Cognitive level attainment as per revised Bloom Taxonomy
1	Student will be aware of latest technologies developments in their discipline in a competitive environment.	L1, L2
2	Student will be able to create new idea for problem solving related to industry or societal issues.	L1, L2, L3,L4
3	Students will be to develop the code for given problem definition in a competitive environment.	L1, L2, L3,L4,15,L6
4	Students will be write a research paper and understand technical writing.	L1, L2, L3,L4,15

Module No.	Topics	Cognitive level attainment as per revised Bloom Taxonomy
1	Participation in IPR Awareness seminar	L1, L2, L3
	Participation in IPR awareness seminar.	
2	Industry linkage / visit related to product and domain/Establish start up	L1, L2, L3,L4
	I. Proto type development: Introduction and importance of prototype	
	development., Steps for Idea generation to implementation. Transforming Idea	
	into project with implementation	
	II. Presentations by students and assessment, Experience sharing by entrepreneurs	
	or Hackathon Winners.	

0

Ice

Estd. 2001

	Presentation and evaluation				
3	Building Competitive Attitude	L1, L2, L3,L4			
	I. Participation in project competitions/coding competitions				
	/Working for research grant/consultancy: a) Participating at				
	institute /national level /university level/ conference /participate in				
	competitions. b) Participation in funded project/consultancy projects				
	II. Mock Evaluation/Experience sharing by good coders				
	competition and evaluation				
4	4 Research Paper Publication				
	I. Introduction to Research paper writing: Introduction to research				
	paper writing, review of literature based on idea and developed				
	prototype.				
	II. <b>Publishing:</b> Identification of appropriate journal or conference at				
	national level /university level/conference for submission and				
	Preparation of a review paper.				
	Evaluation of research review paper.
