3.3 Students Feedback:

1. Sessions conducted so far were good. We are being taught in detail and all our doubts are also being cleared. I believe that since the students have already completed a course on basic web development, we could learn advanced concepts during lectures. The evaluation sessions were also good since our work is checked on a daily basis and our doubts are also being cleared.

2. The session was very informative with all the basics of JavaScript explained in depth. We could analyze the difference and similarities between JavaScript and other languages in terms of declaration of function, variables etc. The alert, confirm and prompt methods were explained in detail. The way to use JavaScript internally and externally was known. The use of arrays and date were also learnt.

3. The sessions were very nice and interactive. We learnt how to do social media marketing via Facebook. We were taught how to create a Facebook page. We used Canva as a digital tool to

make our logo. In a nutshell, we learnt how to do Facebook marketing and how to reach more people.

4. Facebook Marketing Session helped us to implement digital marketing via creating the Facebook page based on the project ideas. The session was helpful and taught the skillful use of social media - Facebook used on daily basis.

5. A very informative and actually a useful session. SEO has proven fruitful how to rank our website and exist on google and other SEOs and today's session gave an insight about how anyone can be able to achieve it.
