

TCET/CMPN/ /OF 2018

Date: 08/01/2018

Notice

To: All HOD

With an objective to inculcate interdisciplinary learning in reference to the meeting held by Dean Academics on 4th Jan 2018, the Department of Computer Engineering is offering bridge courses to students of all disciplines in Self Learning/ Collaborative Learning mode where department faculty shall act as mentors. It is believed that when students from different disciplines work together to serve a common purpose and make connections between different subject areas, learning can be enhanced. The bridge courses have been identified as Basic bridge courses at Second year, Technology based courses at Third year and Research Based courses at Final year from online sources of reputed universities as coursera, udacity, nptel, udemy, edex etc. Kindly promote students of your department to learn beyond curriculum and feel free to approach CMPN Department faculty for guidance.

List of Bridge Courses is attached for reference.
